

Details of 22 Sept 2014 revision to CSV file

A revised CSV extract was published on the website on Monday 22nd September to correct an error in the previous version.

In the previous version, all figures were double counted. The England Time Series spreadsheet, 2014-15 Q1 file in excel format and the figures included in the commentary in the Statistical Press Notice were all correct and therefore no changes have been made to these files.
