Notes to Editors

This dataset covers some key aspects of inpatient and outpatient activity in the NHS.

Provider and Commissioner based data

Commissioner based returns reflect data on a responsible population basis, which is defined as:

- all those patients resident within the Clinical Commissioning Group (CCG) boundary; plus
- all patients registered with GPs who are members of the CCG but are resident in another CCG; minus
- All patients resident in the CCG but registered with a GP who is a member of another CCG

Commissioner based returns also include data for specialised commissioning. These are separate from the CCGs as there are different arrangements for commissioning specialised services.

Provider based returns cover patients who were treated in hospitals in England.
