

Southampton Primary Care Limited

Southampton Primary Care Hubs

Number of patients covered: 269,875

Number of practices participating: 29

Names of CCGs covered: Southampton City

Our top three planned service improvements/innovations are:

Our Aim

Strengthen the capacity and accessibility of local general practices

Improve local service integration across existing practices and other providers (aligns with Better Care Fund)

To use this platform to create more community and GP based services enhancing the holistic health and social care for the people of Southampton

Outcomes

Increased local access

Increased patient's choice and flexibility

Continuity of care for patients with LTC

Reduced frequency and severity of exacerbations LTC, and the number and length of stay of unscheduled care admissions

Reduction in the number of non-essential conveyances and ED activity

Increased positive health outcomes

Increases access to holistic health promotion, screening and wellness interventions

Increased patient safety

What Difference

City wide IT solution
