1 Annual assessment 2015/16

1.1 Introduction

NHS England conducts an annual performance assessment of CCGs. The assurance framework for 2015/16 assessed CCGs against five components of assurance. The criteria for assessing each component during the year are set out in the [CCG assurance framework](#). The year-end component assessment balances an overview of the CCG's performance during the year with the level of risk it is carrying forward in to the next year.

CCGs may be assessed in four categories: outstanding, good, requires improvement and inadequate. The principles used to create headline assessments from the five components of assurance are:

- **outstanding** is applied where at least one component is outstanding and the others are all good;
- **good** is applied if
 - all components are good; or
 - at least four components are rated as good (or good and outstanding) and one component is requires improvement, unless requires improvement is in the finance, planning or well led component;
- the headline is **requires improvement** if
 - four components are rated as good (or good and outstanding) and the finance, planning or well led components are assessed as requires improvement or inadequate;
 - there is more than one requires improvement component rating; and
 - no more than one component is assessed as inadequate;
- A CCG is **inadequate** overall if
 - more than one component is rated as inadequate;
 - it already has directions (under section 14.z.21 of the NHS Act 2006, as amended) in force.

The table below shows the assurance rating of each CCG. Further details of assurance outputs may be available for public review by the CCG itself.

NHS England provides an annual survey of CCG partners and a summary of the results, the [CCG 360 stakeholder survey 2015/16](#), is published alongside this report.

		2015/16 components of assurance				
CCG	Headline rating	Well led	Delegated functions	Finance	Performance	Planning
