

Immunoglobulin Quality Dashboard 2016/17

Indicator Reference Number	Domain	Theme	Measure	Rationale	Name of Indicator /Description	Numerator	Denominator	Period Type	Frequency	Data Source Numerator	Data Source Denominator	Target	Interpretation Guidance	Notes
PID01	Domain - TBC by CRG	Clinical Process	Immunoglobulin levels measured	Allows adjustment of dose if appropriate	Patients with immunoglobulin trough levels recorded and documented on the national database during the current reporting financial year	Number of patients in denominator who have immunoglobulin trough levels recorded and documented on the national database during the current reporting financial year	Number of Long Term Immunology patients registered on the national database	YTD (To be populated in Q4 only)	Annual	Trust Collected	Trust Collected		Higher is better	Immunology only. All private patients to be excluded in the calculations for the dashboard measures.
PID03	Domain - TBC by CRG	Clinical Outcome	Home care offered	Measures patients offered homecare - provides care closer to home	Proportion of patients who are on homecare	Number of patients in denominator on homecare	Number of Long Term Immunology patients registered on the national database	YTD	Annual	Trust Collected	Trust Collected		Higher is better	Immunology only. All private patients to be excluded in the calculations.
PID04	Domain - TBC by CRG	Workforce	Home care training	Part of draft UKPID standards of care	Proportion of patients on homecare who have received training from an accredited home therapy centre	Number of patients in denominator who received training after accreditation of the home therapy centre	Number of Long Term Immunology patients registered on the national database who are on homecare	YTD	Annual	Trust Collected	Trust Collected		Higher is better	Immunology only. Private patients to be excluded in the calculations.
PID05	Domain - TBC by CRG	Clinical Process	National database registration	Supports appropriate commissioning of IVIG - part of national commissioning policy	Proportion of patients registered on the national database with recorded infusions	Number of patients in denominator with infusions recorded on the national database	Number of Long Term Immunology patients registered on the national database	YTD	Annual	Trust Collected	Trust Collected		Higher is better	All private patients excluded in the calculations
PID15	Domain - TBC by CRG	Clinical Outcome	Annual review	Access to immunoglobulin review	Proportion of patients who receive an annual review with letter sent to the GP notifying them of the review	Number of patients with annual review documented on the national database and a letter is sent to their GP	Number of Long Term Immunology patients registered on the national database	YTD	Annual	Trust Collected	Trust Collected		Higher is better	GP only relevant for Immunology dashboard. All private patients excluded in the calculations.
IVG05	Domain - TBC by CRG	Clinical Process	National database registration	Supports appropriate commissioning of IVIG - part of national commissioning policy	Proportion of patients registered on the national database with recorded infusions	Proportion of patients registered on the national database with recorded infusions (For financial year)	Total number of active patients registered on the national database	YTD	Annual	Trust Collected	Trust Collected		Higher is better	All private patients excluded in the calculations.
IVG06	Domain - TBC by CRG	Clinical Process	Outcome reporting for grey indication	Provides outcome data for rarely used indications which can inform future national guidelines	Proportion of patients receiving immunoglobulin for grey indications who have outcomes entered on the national database within 90 days of treatment	Number of patients who have outcomes entered on the national database within 90 days of treatment commencing	Number of patients receiving immunoglobulin for grey indications during quarter	Quarterly	Quarterly	Trust Collected	Trust Collected		Higher is better	Not suitable for Immunology Patients not grey or black. All private patients to be excluded in the calculations.
IVG07	Domain - TBC by CRG	Clinical Process	Dose and dose frequency review	Supports review of dose and reduction in costs of IVIG	Proportion of Long term patients who have a documented dose review	Number of patients in denominator who have documented dose review (Dose and / or interval can go up or down)	Total number of long term patients treated	YTD	Annual	Trust Collected	Trust Collected		Higher is better	All private patients to be excluded in the calculations.
IVG10	Domain - TBC by CRG	Clinical Outcome	Registration on national database and retreatment	This will be required as part of the national commissioning policy	Rate of patients receiving immunoglobulin for short term conditions who are re-treated (Within last 5 years)	Number of patients in denominator who are re-treated for the same condition	Number of patients receiving immunoglobulin for short term conditions in the last 5 years	Quarterly	Quarterly	Trust Collected	Trust Collected		Lower is better	Not suitable for Immunology Patients - 99% are long term. All private patients to be excluded in the calculations.

Immunoglobulin Quality Dashboard 2016/17

Indicator Reference Number	Domain	Theme	Measure	Rationale	Name of Indicator /Description	Numerator	Denominator	Period Type	Frequency	Data Source Numerator	Data Source Denominator	Target	Interpretation Guidance	Notes
IVG11	Domain - TBC by CRG	Clinical Outcome	Outcome reporting for short term conditions	Provides outcome data and supports review of the national guidelines	Rate of patients receiving immunoglobulin for designated short term red/blue indication who have outcomes reported on the national database within 90 days of treatment	Number of patients in denominator who have outcomes entered on the national database within 90 days of treatment commencing	Number of patients receiving immunoglobulin for designated short term red/blue indications	Quarterly	Quarterly	Trust Collected	Trust Collected		Higher is better	Not suitable for Immunology Patients - 99% are long term. All private patients to be excluded in the calculations.
IVG12	Domain - TBC by CRG	Clinical Process	MDT panel review for grey and grey unlisted indications	Informs commissioners of appropriate approval of use of immunoglobulin by Trust	Proportion of grey & grey unlisted patients reviewed and approved by panel and documented on database before commencing immunoglobulin therapy	Patients who have been reviewed and approved by a multidisciplinary panel that is documented on the national database before immunoglobulin therapy is commenced	Number of patients commencing immunoglobulin treatment for grey and grey unlisted indications	Quarterly	Quarterly	Trust Collected	Trust Collected		Higher is better	Not suitable for Immunology Patients - Not grey. All private patients to be excluded in the calculations.
IVG13	Domain - TBC by CRG	Clinical Outcome	Improvement in neurological condition	Provides outcome data in specific neurological indications	Proportion of long term Neurology patients who have objective measures of improvement documented	Number of patients in denominator who have objective measures of improvement documented	Number of long term Neurology patients treated	YTD	Annual	Trust Collected	Trust Collected		Higher is better	Not suitable for Immunology Patients - Neurology Only. All private patients to be excluded in the calculations.
IVG15	Domain - TBC by CRG	Clinical Outcome	Annual review	Access to immunoglobulin review	Proportion of Long Term patients who receive an annual review	Number of long term patients who receive an annual review which is documented on the national database	Number of long term patients registered with infusions recorded on the national database	YTD	Annual	Trust Collected	Trust Collected		Higher is better	GP only relevant for Immunology dashboard. All private patients to be excluded in the calculations.

Data collection has been approved by the Review of Central Returns - ROCR
ROCR/OR/2230/001MAND
