

The childhood routine immunisation changes start on 1st July 2025.

In the East of England, DBS tests for the selective Hep B pathway will continue to be done by the Community School Aged Immunisation Service.

Age	Babies born to women with hepatitis B infection	Provider responsible from 1 st July 2025
Birth	Monovalent HepB	Maternity
4 weeks	Monovalent HepB	CSAIS
8 weeks	DTaP/IPV/Hib/HepB	General Practice
12 weeks	DTaP/IPV/Hib/HepB	General Practice
16 weeks	DTaP/IPV/Hib/HepB	General Practice
18 months	DTaP/IPV/Hib/HepB	General Practice
	Test for HBsAg (between 12-18mths)	CSAIS

Children born **on or before 30 June 2024** should continue to be offered a dose of monovalent HepB vaccine and tested for (DBS) HBsAg on or after their first birthday (alongside Hib/MenC and other vaccines offered at this age. An 18-month DTaP/IPV/Hib/HepB vaccine is not required).
