Driving the innovation agenda in the NHS

Sam Roberts
Director of Innovation & Life Sciences, NHS England
What we’ve heard is required to support innovation in the NHS

**A. Build a richer pipeline of proven innovations which meet the needs of patients and the NHS**

1. Integrated service for innovators
2. Expanded real-world testing
3. Single signal of readiness for commissioning
4. Building awareness and demand at point of care

**B. Improving uptake and spread of these proven innovation**

5. Understanding uptake and providing incentives
6. Building capacity and capability in adoption and spread
