10 years of asking about asthma Register here	Every Child Register here	Every Breath Register here	Every Neighbourhood Register here
- A look back at 10 years of the #AskAboutAsthma campaign and why the 4 Asks still matter today. - What 10 years of data tells us about diagnosis, prescribing, emergency admissions, deaths, air quality and wider determinants of health. - The future air our children will breathe. Climate change, air quality, pollen and asthma in 2036. - National policy, priorities and the ambition to achieve 10 years without preventable asthma deaths.	- Building a future for every child with asthma, with a sharp focus on inequalities and prevention. - Every child in every school: embedding health equity and reaching every child through education settings. - Risk stratification as a safety net for the quiet voice: making every high-risk child visible. - Every culture, every dialogue, every neurotype: creating communication and support that every child and family can access.	- Every breath, every season, every sleep: navigating good asthma control throughout the year. - Every exercise: why children and young people with asthma can and should be physically active. - Every contact: making every interaction count to support and maintain good asthma health. - Every age: supporting good asthma control in childhood to promote healthier adult years.	- Why we must tackle asthma through neighbourhood approaches and understand the evidence for action. - How multidisciplinary teams can work together to improve asthma care for children and young people. Choice of workshops: - Asthma MDT case reviews - Youth and parent perspectives - Emergency care and safety-netting - Building effective follow-up pathways and neighbourhood partnerships *Bookings from the London area will be prioritised
