

### PHE publications gateway number: HBV Renal GOV-7949

## Hepatitis B vaccine Renal Patient Group Direction (PGD)

This PGD is for the administration of Hepatitis B recombinant DNA (rDNA) vaccine (adsorbed) to individuals who are 15 years of age or over and are on haemodialysis, a renal transplantation programme or have chronic renal failure that is likely to require haemodialysis or transplant.

This PGD is for the administration of Hepatitis B (rDNA) vaccine (adsorbed) (HepB vaccine) by registered healthcare professionals identified in <u>Section 3</u>, subject to any limitations to authorisation detailed in <u>Section 2</u>.

| Reference no: | HepB Renal PGD   |
|---------------|------------------|
| Version no:   | v03.00           |
| Valid from:   | 01 May 2021      |
| Review date:  | 01 November 2022 |
| Expiry date:  | 30 April 2023    |

# Public Health England has developed this PGD to facilitate the delivery of publicly funded immunisation in line with national recommendations.

Those using this PGD must ensure that it is organisationally authorised and signed in Section 2 by an appropriate authorising person, relating to the class of person by whom product is to be supplied, in accordance with Human Medicines Regulations 2012 (HMR2012)<sup>1</sup>. **The PGD is not legal or valid without signed authorisation in accordance with HMR2012 Schedule 16 Part 2.** 

Authorising organisations must not alter, amend or add to the clinical content of this document (sections 4, 5 and 6); such action will invalidate the clinical sign-off with which it is provided. In addition, authorising organisations must not alter section 3 'Characteristics of staff'. Only sections 2 and 7 can be amended within the designated editable fields provided.

Operation of this PGD is the responsibility of commissioners and service providers. The final authorised copy of this PGD should be kept by the authorising organisation completing Section 2 for 8 years after the PGD expires if the PGD relates to adults only and for 25 years after the PGD expires if the PGD relates to children only, or adults and children. Provider organisations adopting authorised versions of this PGD should also retain copies for the periods specified above.

# Individual practitioners must be authorised by name, under the current version of this PGD before working according to it.

Practitioners and organisations must check that they are using the current version of the PGD. Amendments may become necessary prior to the published expiry date. Current versions of PHE PGD templates for authorisation can be found from:

https://www.gov.uk/government/collections/immunisation-patient-group-direction-pgd

Any concerns regarding the content of this PGD should be addressed to:

immunisation@phe.gov.uk

Enquiries relating to the availability of organisationally authorised PGDs and subsequent versions of this PGD should be directed to: See pages 4 and 5

<sup>&</sup>lt;sup>1</sup> This includes any relevant amendments to legislation (eg <u>2013 No.235</u>, <u>2015 No.178</u> and <u>2015 No.323</u>). HepB Renal PGD v03.00 Valid from: 01 May 2021 Expiry: 30 April 2023 Page 1 of 15

# Change history

### 1. PGD development

This PGD has been developed by the following health professionals on behalf of Public Health England:

| Developed by:                                      | Name   | Signature    | Date          |
|--|--|--------------|---------------|
| Pharmacist<br>(Lead Author)                        | Jacqueline Lamberty<br>Lead Pharmacist Medicines<br>Management Services, PHE                     | J.Y.LAMBERTY | 09 April 2021 |
| Doctor   | Mary Ramsay<br>Consultant Epidemiologist and<br>Head of Immunisation and<br>Countermeasures, PHE | Mary Ramony  | 09 April 2021 |
| <b>Registered Nurse</b><br>(Chair of Expert Panel) | David Green<br>Nurse Consultant – Immunisation<br>and Countermeasures, PHE                       | DGieen.      | 09 April 2021 |

This PGD has been peer reviewed by the PHE Immunisations PGD Expert Panel in accordance with PHE PGD Policy. It has been ratified by the PHE Medicines Governance Group and the PHE Quality and Clinical Governance Delivery Board.

### Expert Panel

| Name                  | Designation   |
|-----------------------|---|
| Nicholas Aigbogun     | Consultant in Communicable Disease Control, Yorkshire and Humber<br>Health Protection Team, Public Health England   |
| Gayatri Amirthalingam | Consultant Epidemiologist, Public Health England  |
| Sarah Dermont         | Clinical Project Coordinator and Registered Midwife, NHS Infectious<br>Diseases in Pregnancy Screening Programme, Public Health England                               |
| Ed Gardner            | Advanced Paramedic Practitioner / Emergency Care Practitioner,<br>Medicines Manager, Proactive Care Lead  |
| Michelle Jones        | Senior Medicines Optimisation Pharmacist, NHS Bristol North<br>Somerset & South Gloucestershire CCG   |
| Vanessa MacGregor     | Consultant in Communicable Disease Control, Public Health England,<br>East Midlands Health Protection Team  |
| Alison Mackenzie      | Consultant in Public Health Medicine / Screening and Immunisation<br>Lead, Public Health England (South West) / NHS England and NHS<br>Improvement South (South West) |
| Gill Marsh            | Senior Screening and Immunisation Manager Public Health England / NHS England and NHS Improvement (North West)  |
| Lesley McFarlane      | Screening and Immunisation Manager: Clinical (COVID-19 and Influenza), Public Health England / NHS England and NHS Improvement (Midlands)                             |
| Tushar Shah           | Lead Pharmacy Advisor, NHS England and NHS Improvement (London Region)  |

#### 2. Organisational authorisations

The PGD is not legally valid until it has had the relevant organisational authorisation.

It is the responsibility of the organisation that has legal authority to authorise the PGD, to ensure that all legal and governance requirements are met. The authorising body accepts governance responsibility for the appropriate use of the PGD.

**NHSE&I North East and Yorkshire** authorises this PGD for use by the services or providers listed below:

Authorised for use by the following organisations and/or services

All NHS England & Improvement (NHSE&I) commissioned immunisation services providing immunisation services.

Limitations to authorisation

Authorisation is limited to those registered practitioners listed in Section 3 who are employed by organisations/providers commissioned by NHSE&I North East and Yorkshire (NEY) to deliver immunisation programmes within the whole of the NHSE&I region of North East and Yorkshire.

| Organisational approval (legal requirement)   |                 |      |          |
|---|-----------------|------|----------|
| Role  | Name            | Sign | Date     |
| Assistant Medical Director and<br>Responsible Officer,<br>NHS England and NHS<br>Improvement –NEY | Dr James Gossow | X    | 23/04/21 |

| Additional signatories according to locally agreed policy  |               |            |            |
|--|---------------|------------|------------|
| Role   | Name          | Sign       | Date       |
| NHSE&I NEY PGD<br>Governance assurance review<br>(Medicines Optimisation<br>Pharmacist Lead, NHS NECS)             | Hira Singh    | Am R. Snip | 13/04/2021 |
| NHSE&I NEY PGD<br>Governance assurance review<br>(Screening & Immunisation<br>Coordinator (PHE Y&H<br>/NHSE&I NEY) | Katie Markham | LE lathe   | 14/04/2021 |

Local enquiries regarding the use of this PGD may be directed to your local Public Health England (PHE) screening and immunisation teams. See area specific contacts below:

# For North East and North Cumbria Area (i.e. Northumberland, Tyne & Wear, Durham, Darlington, Tees and North Cumbria) use the following:

NHS England Screening and Immunisation Team: Tel. 011382 53017 / email england.cane.screeingimms@nhs.net or NECS Medicine Optimisation Pharmacists: Hira Singh or Sue White: Tel 01642 746875 or 0191 217 2533 or <u>high.singh@nhs.net</u> / <u>sue.white14@nhs.net</u>

#### For Yorkshire and Humber Area use the following:

West Yorkshire <u>england.wy-screeningandimms@nhs.net</u> South Yorkshire and Bassetlaw <u>england.sybsit@nhs.net</u> North Yorkshire and Humber <u>ENGLAND.NYAHSIT@nhs.net</u> or the Health Protection Team Acute Response Centre (ARC): Contact Number: 0113 3860 300. Please note - All Yorkshire and Humber PGDs can be found at: <u>https://www.england.nhs.uk/northeast-yorkshire/our-work/information-for-professionals/pgds/</u>.

Section 7 provides a practitioner authorisation sheet. Individual practitioners must be authorised by name to work to this PGD. Alternative practitioner authorisation sheets may be used where appropriate in accordance with local policy, but this should be an individual agreement or a multiple practitioner authorisation sheet as included at the end of this PGD.

| Qualifications and<br>professional registration | <ul> <li>Registered professional with one of the following bodies:</li> <li>nurses and midwives currently registered with the Nursing and<br/>Midwifery Council (NMC)</li> <li>pharmacists currently registered with the General Pharmaceutical<br/>Council (GPhC) (Note: This PGD is not relevant to privately<br/>provided community pharmacy services)</li> <li>paramedics and physiotherapists currently registered with the<br/>Health and Care Professions Council (HCPC)</li> <li>The practitioners above must also fulfil the <u>Additional requirements</u><br/>detailed below.</li> <li>Check <u>Section 2 Limitations to authorisation</u> to confirm whether all</li> </ul>    |  |
|---|--|--|
|   | practitioners listed above have organisational authorisation to work<br>under this PGD.  |  |
| Additional requirements                         |  |  |
| Continued training<br>requirements              | Practitioners must ensure they are up to date with relevant issues<br>and clinical skills relating to immunisation and management of<br>anaphylaxis, with evidence of appropriate Continued Professional<br>Development (CPD).<br>Practitioners should be constantly alert to any subsequent<br>recommendations from Public Health England and/or NHS England<br>and NHS Improvement and other sources of medicines information.<br>Note: The most current national recommendations should be<br>followed but a Patient Specific Direction (PSD) may be required to<br>administer the vaccine in line with updated recommendations that<br>are outside the criteria specified in this PGD. |  |

### 4. Clinical condition or situation to which this PGD applies

| Clinical condition or<br>situation to which this<br>PGD applies | Indicated for the active immunisation of individuals who are 15 years<br>of age or over and are on haemodialysis, a renal transplantation<br>programme or have chronic renal failure (CKD stage 4 or 5) that is<br>likely to require haemodialysis or transplant in accordance with the<br>recommendations given in <u>Chapter 7</u> and <u>Chapter 18</u> of<br>Immunisation Against Infectious Disease: 'The Green Book'.   |
|---|---|
| Criteria for inclusion  | Individuals who are 15 years of age or over and are on<br>haemodialysis, a renal transplantation programme or have chronic<br>renal failure (CKD stage 4 or 5) that is likely to require haemodialysis<br>or transplant.  |
| Criteria for exclusion <sup>2</sup>                             | <ul> <li>Individuals for whom valid consent, or 'best-interests' decision, in accordance with the Mental Capacity Act 2005, has not been obtained.</li> <li>Individuals who: <ul> <li>are under 15 years of age</li> <li>have had a confirmed anaphylactic reaction to a previous dose of hepatitis B containing vaccine or to any components of the vaccine</li> <li>are known to have markers of current (HBsAg) or past (anti-HBcore) hepatitis B infection</li> <li>do not have a renal indication for HepB vaccination (see PHE HepB PGD)</li> <li>are suffering from acute severe febrile illness (the presence of a minor illness without fever or systemic upset is not a contraindication for immunisation)</li> </ul> </li> </ul>   |
| Cautions including any<br>relevant action to be<br>taken        | Syncope (fainting) can occur following, or even before any vaccination especially in adolescents as a psychogenic response to the needle injection. This can be accompanied by several neurological signs such as transient visual disturbance, paraesthesia and tonic-clonic limb movements during recovery. It is important that procedures are in place to avoid injury from faints.<br>Use caution when vaccinating individuals with severe (ie anaphylactic) allergy to latex. The HBvaxPRO <sup>®</sup> syringe plunger, stopper and tip cap contain dry natural latex rubber; use an alternative vaccine if available.<br>The immunogenicity of the vaccine could be reduced in immunosuppressed subjects. Vaccination should proceed in accordance with the national recommendations. However, re-immunisation may need to be considered. Seek medical advice as appropriate. |
| Action to be taken if the patient is excluded                   | Individuals who are under 15 years of age who are on<br>haemodialysis, renal transplantation programmes or with chronic<br>renal failure (CKD stage 4 or 5) that is likely to require haemodialysis<br>or transplant, should be referred for specialist advice on the<br>appropriate vaccination schedule. A PSD is required as vaccination<br>of these individuals is outside the remit of this PGD.   |

 <sup>&</sup>lt;sup>2</sup> Exclusion under this PGD does not necessarily mean the medication is contraindicated, but it would be outside the PGDs remit and another form of authorisation will be required
 HepB Renal PGD v03.00 Valid from: 01 May 2021 Expiry: 30 April 2023
 Page 7 of 15

| Action to be taken if the<br>patient is excluded<br>(continued) | Individuals who have had a confirmed anaphylactic reaction to a previous dose of HepB vaccine or any components of the vaccine should be referred to a clinician for specialist advice and appropriate management.                           |
|---|--|
|   | Individuals known to have markers of current (HBsAg) or past (anti-<br>HBcore) hepatitis B infection should be advised that vaccination is<br>not necessary. However, immunisation should not be delayed while<br>awaiting any test results. |
|   | Individuals who do not have a renal indication for HepB vaccination should be managed in accordance with PHE HepB PGD.   |
|   | Individuals suffering acute severe febrile illness should postpone<br>immunisation until they have recovered; immunisers should advise<br>when the individual can be vaccinated and ensure another<br>appointment is arranged.               |
|   | Seek appropriate advice from the local Screening and Immunisation<br>Team, local Health Protection Team or the individual's clinician as<br>required.  |
|   | The risk to the individual of not being immunised must be taken into account.  |
|   | Document the reason for exclusion and any action taken in the individual's clinical records.   |
|   | In a GP practice setting, inform or refer to the GP or a prescriber as appropriate.  |
| Action to be taken if the patient or carer declines             | Informed consent, from the individual or a person legally able to act<br>on the person's behalf, must be obtained for each administration.   |
| treatment   | Advise the individual/parent/carer about the protective effects of the vaccine, the risks of infection and potential complications.  |
|   | Document advice given and the decision reached.  |
|   | In a GP practice setting, inform or refer to the GP as appropriate.  |
| Arrangements for referral for medical advice                    | As per local policy  |

| Name, strength & formulation of drug                       | Hepatitis B recombinant DNA (rDNA) vaccine (adsorbed)* (HepB) eg:   |  |
|--|---|--|
|  | <ul> <li>Engerix B<sup>®</sup> 20micrograms/1ml suspension for injection in pre-<br/>filled syringe</li> </ul>  |  |
|  | <ul> <li>Fendrix<sup>®</sup> 20 micrograms/0.5ml suspension for injection in pre-<br/>filled syringe*</li> </ul>  |  |
|  | HBvaxPRO <sup>®</sup> 40micrograms/1ml suspension for injection in a vial   |  |
|  | *the hepatitis B surface antigen in Fendrix <sup>®</sup> is adjuvanted by AS04C   |  |
| Legal category   | Prescription only medicine (POM)  |  |
| Black triangle▼  | No  |  |
| Off-label use  | Administration of Fendrix <sup>®</sup> by deep subcutaneous injection to patients with a bleeding disorder is off-label administration in line with advice in <u>Chapter 4</u> and <u>Chapter 18</u> of 'The Green Book'.   |  |
|  | Once the primary immunisation schedule has been started with Fendrix®, interchanging with other brands of HepB vaccine is off label.  |  |
|  | Recommendations in 'The Green Book' <u>Chapter 18</u> allow for<br>concomitant administration of HepB vaccine with other vaccines at a<br>separate site when required. For Fendrix <sup>®</sup> , such administration would<br>be off-label as, due to a lack of data, the SPC for Fendrix <sup>®</sup> advises<br>an interval of 2 to 3 weeks be respected between the administration<br>of Fendrix <sup>®</sup> and other vaccines. |  |
|  | Vaccine should be stored according to the conditions detailed in the <u>Storage section</u> below. However, in the event of an inadvertent or unavoidable deviation of these conditions refer to <u>PHE Vaccine</u> <u>Incident Guidance</u> . Where vaccine is assessed in accordance with these guidelines as appropriate for continued use this would constitute off-label administration under this PGD.                          |  |
|  | Where a vaccine is recommended off-label consider, as part of the consent process, informing the individual/patient/carer that the vaccine is being offered in accordance with national guidance but that this is outside the product licence.  |  |
| Route / method of administration                           | Administer by intramuscular injection into the deltoid region of the upper arm. The buttock should not be used because vaccine efficacy may be reduced.   |  |
|  | When administering at the same time as other vaccines, care should<br>be taken to ensure that the appropriate route of injection is used for<br>all the vaccinations. The vaccines should be given at separate sites,<br>preferably in different limbs. If given in the same limb, they should be<br>given at least 2.5cm apart. The site at which each was given should<br>be noted in the individual's records.                     |  |
|  | For individuals with a bleeding disorder, vaccines normally given by<br>an intramuscular route should be given by deep subcutaneous<br>injection to reduce the risk of bleeding (see 'The Green Book'<br><u>Chapter 4</u> ).  |  |
| Continued over page<br>Route / method of<br>administration |   |  |

| (continued)  | The vaccine may settle du<br>administration to obtain a<br>(Fendrix <sup>®</sup> / Engerix B <sup>®</sup> ), wh  | slightly opaque  | e (HBvaxPro®) or   |              |  |
|--|--|--|--|--------------|--|
|  | The vaccine should be visually inspected for particulate matter and discoloration prior to administration. In the event of any foreign particulate matter and/or variation of physical aspect being observe do not administer the vaccine.                                   |  |  |              |  |
|  | -  | The vaccine's SPC provides further guidance on administration and is available from the electronic Medicines Compendium website: |  |              |  |

| (continued)                                      | HBvaxPRO® and Engerix B® may be used interchangeably to complete the vaccine course. Once the primary immunisation schedule has been started with Fendrix®, interchanging with other brands of HepB vaccine is off label.  |  |
|--|--|--|
| Duration of treatment                            | Dependent on vaccine schedule, see <u>Dose and frequency of</u> <u>administration</u> .  |  |
| Quantity to be supplied / administered           | Dose of 0.5ml to 2ml per an administration depending on the vaccine product used, see <u>Dose and frequency of administration</u> .  |  |
| Supplies   | Supplies should be ordered directly from manufacturers/wholesalers.  |  |
|  | Protocols for the ordering, storage and handling of vaccines should<br>be followed to prevent vaccine wastage (see <u>protocol for ordering</u><br><u>storage and handling of vaccines</u> and 'The Green Book' <u>Chapter 3</u> ).  |  |
| Storage  | Store at between +2°C to +8°C.<br>Store in original packaging in order to protect from light.<br>Do not freeze.  |  |
|  | In the event of an unavoidable temperature excursion HBvaxPRO <sup>®</sup> can be administered provided total (cumulative multiple excursion) time out of refrigeration (at temperatures between 8°C and 25°C) does not exceed 72 hours. Cumulative multiple excursions between 0°C and 2°C are also permitted as long as the total time between 0°C and 2°C does not exceed 72 hours. |  |
|  | Stability data indicate Engerix B is stable at temperatures up to 37°C for 3 days or up to 25°C for 7 days. These data are intended to guide healthcare professionals in case of temporary temperature excursion only.   |  |
|  | In the event of an inadvertent or unavoidable deviation of these conditions, vaccine that has been stored outside the conditions stated above should be quarantined and risk assessed for suitability of continued off-label use or appropriate disposal. Refer to <u>PHE</u> <u>Vaccine Incident Guidance</u> .   |  |
| Disposal   | Equipment used for immunisation, including used vials, ampoules, or discharged vaccines in a syringe or applicator, should be disposed of safely in a UN-approved puncture-resistant 'sharps' box, according to local authority regulations and guidance in the <u>technical</u> <u>memorandum 07-01</u> : Safe management of healthcare waste (Department of Health, 2013).           |  |
| Drug interactions                                | Immunological response may be diminished in those receiving<br>immunosuppressive treatment. Vaccination is recommended even if<br>the antibody response may be limited.  |  |
|  | May be given at the same time as other vaccines. When other vaccines are given at the same time as Fendrix® this is off-label (see Fendrix® see <u>Off-label</u> section).   |  |
|  | A detailed list of drug interactions is available in the SPC, which is available from the electronic Medicines Compendium website: <u>www.medicines.org.uk</u>   |  |
| Identification & management of adverse reactions | Local reactions following vaccination are very common such as pain,<br>swelling or redness at the injection site, induration.<br>Low grade fever, fatigue, drowsiness, headache, irritability, appetite  |  |
|  | loss and gastrointestinal symptoms (nausea, vomiting, diarrhoea,   |  |

| (continued)   | The response to HepB vaccine among individuals with renal failure is<br>lower than among healthy adults. However, increased response<br>rates have been reported in vaccines formulated for use in<br>individuals with chronic renal failure. Therefore, the vaccines  |  |  |  |
|---|--|--|--|--|
| Continued over page<br>Special considerations /<br>additional information | <b>Testing for evidence of infection or immunity</b><br>Additional vaccine doses may need to be considered for individuals<br>who do not respond or have a sub-optimal response to a course of<br>vaccinations. See <u>Table 2</u> Booster doses and refer to <u>Chapter 18</u> for<br>advice on response to vaccine and the use of additional doses.<br><b>Choice of HepB vaccine</b> |  |  |  |
|   | <ul><li>known to infect the liver such as hepatitis A, hepatitis C and hepatitis E viruses.</li><li>As with any vaccine, a protective immune response may not be elicited in all vaccinees (see <u>Chapter 18</u> for more detail).</li></ul>  |  |  |  |
|   | <b>Limitations of HepB vaccination</b><br>Because of the long incubation period of hepatitis B, it is possible for<br>unrecognised infection to be present at the time of immunisation.<br>The vaccine may not prevent hepatitis B infection in such cases.<br>The vaccine will not prevent infection caused by other pathogens  |  |  |  |
| Special considerations / additional information                           | completing a course of hepatitis B immunisation.<br>Ensure there is immediate access to adrenaline (epinephrine) 1 in<br>1000 injection and access to a telephone at the time of vaccination.  |  |  |  |
|   | to return for vaccination.<br>Individuals / carers should be informed about the importance of  |  |  |  |
|   | the event of an adverse reaction.<br>When administration is postponed advise the individual/carer when   |  |  |  |
|   | redness and pain at the injection site.<br>The individual/carer should be advised to seek medical advice in  |  |  |  |
| Patient advice / follow up treatment                                      | Inform the individual/carer of possible side effects and their management.<br>Give advice regarding normal reaction to the injection, for example  |  |  |  |
| Written information to be given to patient or carer                       | Offer marketing authorisation holder's patient information leaflet (PIL) provided with the vaccine.  |  |  |  |
|   | Any adverse reaction to a vaccine should be documented in the individual's record and the individual's GP should be informed.  |  |  |  |
| Reporting procedure of adverse reactions                                  | As with all vaccines, healthcare professionals and individuals/carers<br>are encouraged to report suspected adverse reactions to the<br>Medicines and Healthcare products Regulatory Agency (MHRA)<br>using the Yellow Card reporting scheme on:<br><u>http://yellowcard.mhra.gov.uk</u> or search for MHRA Yellow Card in<br>the Google Play or Apple App Store.                      |  |  |  |
|   | rare.<br>A detailed list of adverse reactions is available in the SPC, which is<br>available from the electronic Medicines Compendium website:<br><u>www.medicines.org.uk</u>  |  |  |  |
|   | and abdominal pain) have been commonly reported symptoms after<br>HepB vaccination.<br>Hypersensitivity reactions and anaphylaxis can occur but are very   |  |  |  |

|         | formulated for use in individuals with chronic renal insufficiency<br>should be used for these individuals.<br><b>Pregnant women/breast-feeding</b><br>There is no evidence of risk from vaccinating pregnant women or<br>those who are breast-feeding with inactivated vaccines. Since HepB<br>is an inactivated vaccine, the risks to the fetus are negligible and it<br>should be given where there is a definite risk of infection.   |  |  |

#### 7. Practitioner authorisation sheet

### HepB Renal PGD v03.00 Valid from: 01 May 2021 Expiry: 30 April 2023

Before signing this PGD, check that the document has had the necessary authorisations in section two. Without these, this PGD is not lawfully valid.

#### Practitioner

By signing this patient group direction, you are indicating that you agree to its contents and that you will work within it.

Patient group directions do not remove inherent professional obligations or accountability.

It is the responsibility of each professional to practise only within the bounds of their own competence and professional code of conduct.

I confirm that I have read and understood the content of this Patient Group Direction and that I am willing and competent to work to it within my professional code of conduct.

| Name | Designation | Signature | Date |
|------|-------------|-----------|------|
|      |             |           |      |
|      |             |           |      |
|      |             |           |      |
|      |             |           |      |
|      |             |           |      |
|      |             |           |      |
|      |             |           |      |

#### Authorising manager

I confirm that the practitioners named above have declared themselves suitably trained and competent to work under this PGD. I give authorisation on behalf of **INSERT NAME OF ORGANISATION** 

for the above named health care professionals who have signed the PGD to work under it.

| Name | Designation | Signature | Date |
|------|-------------|-----------|------|
|      |             |           |      |

#### Note to authorising manager

Score through unused rows in the list of practitioners to prevent practitioner additions post managerial authorisation.

This authorisation sheet should be retained to serve as a record of those practitioners authorised to work under this PGD.
