

Urology Hot Clinic

Getting it right for Urology patients

Analysis of non-elective urology activity over 6 months indicated that 41% of emergency attendances are discharged on the same day, a venue was needed to see this group of patients outside of ED

As a result a Hot Clinic pilot on Hopkins ward began on 30th August 2018. The team provide rapid assessment, investigation and treatment for patients with urgent Urology problems

In its first 67 days **191 patients** have been able to receive care in an ambulatory setting and in most cases were able to avoid the Emergency department.

Right care = reduced overall length of stay

Comparison with last year	2017	2018	Reduced by
Oct	2.91	2.13	0.78
Nov	2.94	1.89	1.05
