

GP Receptionist Immunisation and Screening Training **Somerset**

The training aims to maximise the role of receptionist/admin staff in increasing uptake of routine immunisation and cancer screening

By the end of the training participants will:

- Be familiar with the childhood and adult immunisation schedule
- Be familiar with the cancer screening programmes
- Understand and feel more confident in their role in relation to maximising patient access to these programmes
- Be more confident communicating messages about immunisation and cancer screening
- Have increased understanding of the importance of the data flow that underpins these programmes

The training will be piloted in the Somerset area and then rolled out in the wider region later in 2018
