AACPVIEW_COD	Review of admission avoidance care plan codes	8CMG3	XabFo	100
AACPVIEWDEC_COD	Review of admission avoidance care plan declined codes	8IAe3	XacWP	100
EMHOSPAD_COD	Emergency hospital admission codes	8H2..%	8H2..%	100
<i>End of clusters</i>				

The practice needs to be aware, in order for the care plan started and care plan review codes to be collected they must have inserted into the patient record the care plan started code before any activity is recorded.

AACARESTART_COD Admission avoidance care started codes.

This code must predate the care plan review codes. Please be aware that for an admission avoidance care plan review or admission avoidance care plan review declined code to be found as part of an extraction it must follow a patient's latest admission avoidance care plan agreed code.

If a patient has left the practice for any reason and subsequently re-joins, should the practice put them back onto the AUA care plan register, they must re-enter the admission avoidance care started codes and carry out a care plan review and code it after the date of care plan started. **If they do not then subsequent recorded activity is not collected.**
