

National Electronic Health Check (Learning Disabilities)

Clinical Template

**A summary and overview of the
Learning Disability Annual Health Check
electronic clinical template (2017)**

National Electronic Health Check (Learning Disabilities)

Clinical Template - Summary and Overview

This document provides a content summary and overview of the new National Electronic Health Check template for people with learning disabilities, agreed as part of the GP contract to be initiated from April 2017. The National Electronic Health Check clinical template for people with learning disabilities is to be made available to GP Practices through their GP IT system provider; work is underway to facilitate such. The template offers GP's a systematic approach to the Health Check which is code based, drawing on the existing patient record. This means that the structure of the template (dependant on IT system) can adjust according to the individual patient, for example screening questions will be gender and age appropriate and will only appear for eligible patients; similarly immunisations will be drawn from the existing record whereby current requirements can be determined.

The template has been designed to cover four screens on most systems (this summary content overview covers more pages due to layout restrictions), the first two screens can be completed by any appropriately qualified non-medical practitioner, the last two screens are to be completed by a GP or other suitably qualified practitioner. Example screenshots from the development and pilot phases of the template (in EMIS) are provided as an annexe to this summary.

The template contains coding options for selection in each section, with clinical judgement being applied as to appropriateness; selected free text boxes and action coded options will be pulled through to appear in an automatically generated Health Check Action Plan upon completion of the Health Check. The template and this summary contain prompts throughout, which appear in **Red**.

The template has been developed and piloted in practice by GP's, Learning Disability Nurses and technical staff; it has been through a rigorous review as part of the GP Contract negotiations. The template meets the requirements of the Enhanced Service and incorporates all aspects of the recently refreshed Cardiff Health Check; an updated Step by Step guide to the Health Check is due to be published by RCGP that will support this template.

Thanks to contributors from NHS England, Herts Valleys CCG, RCGP, South West Primary Care Liaison Network, Inclusion Gloucestershire and many individuals and organisations who have given of their valuable time and expertise.

Screen1

Consent - Includes coding for:

- **Capacity** Assessment For Information Sharing
- **Consent** - For Electronic Record Sharing
For SCR with Additional Information
To Share Data with Specified 3rd Party
To Share Data with 3rd Party Details plus free text

Support & Patient Information

Includes coding for:

- Under care of social services
- Social worker involved
- Keyworker Details plus free text

Remember to include any specialist teams e.g. Learning Disability Team

- Has A Carer - Carer's details free text

Remember to record carer demographic details and offer Carer Health Check & Flu Immunisation where appropriate

- Emergency contact details
- Patient Support / accommodation plus free text

Record any recent or planned moves

- Personal Status
- Employment

Disability Details - Includes coding for:

- Disability Severity
- Autism

Specific Syndrome Check - Includes coding for

- :Specific Syndrome Comments plus free text
- Down's Syndrome Diagnosis only appears if the patient has a Downs syndrome diagnosis
- Congenital Heart Disease (P68 Congenital Heart Disease)

Consider specific interventions indicated by syndromes present. If the patient has Down's syndrome please ask other family members, carers or care workers (as appropriate) about any changes that might suggest the need for an assessment of dementia such as:

- Change in behaviour
- Forgetful

14 -17 Years Only

Education, Health & Care Plan (EHC) was formerly known as Statement of Special Educational Needs (SEN) – see RCGP Step by Step guide

Includes coding for:

- Child Status (Looked after child) - Child Support
- Education, Health & Care Plan-Based Care
- Education
- Under Care Of (e.g. Paediatrician, Mental Health team etc.)

Immunisations & Allergies

People with learning disability should have the same regimes as others and the same contraindications apply, except for the following, which all people with a learning disability are entitled to.

Includes coding for:

- Season Influenza Vaccination
- Pneumococcal Vaccination

Pneumococcal Vaccination as guided by Green Book indications

- Hepatitis B Vaccination

Hepatitis B is indicated if patient lives in shared accommodation. A high risk of hepatitis 'B' has been seen in the population of individuals with learning disability living in residential accommodation.

- HPV
- MMR
- Allergies

National Electronic Health Check (Learning Disabilities) Clinical Template Summary

Free text is provided throughout this section for advice that is to appear in Health Action Plan for the patient - **Use simple text.**

Additional Support Needs and Reasonable Adjustments

- Consider time, environment, communication & additional health needs
- Remember Accessible Information Standards
- Include this information in all referrals

Includes coding for:

- Reasonable Adjustment
- Communication
 - Level
 - Assistance
 - Details plus free text
- Seen by Speech & Language Therapist

Functional Life Skills

Includes coding for:

- Mobility

If the patient is immobile, consider postural care needs – see RCGP Step by Step Guide

- Postural Care Needs (free text):
- Mobility status
- Mobility Support
- Mobility Advice
- Walking Aid Use Details plus free text
- Under Care of physiotherapist

Lifestyle & Health Promotion

Includes coding for:

- Patient Diet - Patient advised re diet
- Exercise Level - Patient advised re exercise
- Smoking Status - Smoking cessation advice
- Alcohol Consumption - Patient advised about alcohol
- Substance misuse - Lifestyle advice regarding drug misuse

Daily Living Skills

- Eating
- Hydration
- Dressing Ability
- Bathing
- Toilet Dependency
- Seen by occupational therapist
- Daily Living Support

Screen 2

Sexual Health & Contraceptive Advice

Includes coding for:

- Sexually Active
- General contraceptive advice
- Advice given about risks of unprotected sexual intercourse
- At risk of sexual abuse
- At risk of sexual exploitation

Screening - Includes coding for:

Bowel Cancer Screening - Age Range 60 to 75

- Bowel Cancer Screening - Advice given about bowel cancer screening programme including Easy Read Bowel Cancer Screening Leaflet

Female Screening

- Health ed. - breast examination
- Mammography - Advice given about breast screening programme including Easy Read Breast Screening Guide
- Smear Test - Patient advised to have cervical smear including Easy Read Cervical Screening Leaflet

Male Screening

- Health ed. testicular examination
- Latest Aortic Aneurysm Screening Result
- Abdominal aortic aneurysm screening offered

Baseline Assessment

Baseline assessment forms the last part of the Nurse Check or the first part of the GP Check depending on skills available. Free text is provided for advice that is to appear in Health Action Plan for the patient - **Use simple text.**

Includes coding for:

- Height
- Weight
- Body Mass Index
- Blood pressure reading
- Blood pressure procedure refused

Vision - guidance suggests a person should see an optometrist at least every two years

- Eyesight
- Seen by optometrist

Hearing

- Hearing
- Wax in ear
- Seen by audiologist

Dental - guidance suggests the person should see a dentist at least annually

- Seen by dentist

Screen 3 - GP Section - Start of GP Section

Symptoms

Use clinical judgement in completing the template. The symptom areas have the option of 'no symptom' at the end of each section, or in the individual dropdown lists.

General Symptoms Check if patient or their carer has any specific concerns or worries – includes free text box to record for Health Check Action Plan

- General Symptoms

Respiratory

Be especially concerned if frequent chest infections occurring - consider aspiration and other causes of excess chest infection e.g. reduced immunity.

Includes coding for:

- Asthma
- Chronic Obstructive Pulmonary Disease
- Persistent cough
- Blood in sputum - haemoptysis
- Abnormal sputum
- Breathlessness
- Wheezing
- History of acute lower respiratory tract infection
- No respiratory symptoms

Gastro-Intestinal

Be aware of the possibility of unrecognised reflux oesophagitis as a cause of weight loss, sleep disturbance, undefined pain, behaviour change or dyspepsia.

Includes coding for:

- Dysphagia
If a patient has a cough or choking during eating, consider a SALT swallow assessment
- Indigestion Symptoms / Dyspepsia
- Constipation Symptom
Constipation is a frequent cause of unnecessary hospital admission
- Diarrhoea
- Bowel Assessment
- Rectal Bleeding
- Weight Symptom

Women's Health - Female Only

Includes coding for:

- Menarche
- Menstruation disorders
- Menopause symptoms present

Premature menopause is common in Down's syndrome.

- Menopause Advice

Bladder

Includes coding for:

- Bladder Continence
- Urinary Symptoms
- Seen by continence nurse

Central Nervous System

It is often difficult and not relevant to perform a full neurological examination, however people with a learning disability are particularly prone to abnormalities in vision, hearing and communication - a change in function would suggest further investigation is necessary.

Includes coding for:

- Any Neurological Symptoms
- Stroke
- TIA
- Seen in neurology clinic

National Electronic Health Check (Learning Disabilities) Clinical Template Summary

Epilepsy - Includes coding for:

- Epilepsy
- Seizure Frequency
- Specialist Epilepsy Care (e.g. Under care of psychiatrist /Under care of neurologist)
- Date of last specialist review
- Advice About Epilepsy and monitoring

Includes free text box - record any concerns, medication side effects, increase / decrease or change in seizure type.

Cardiovascular System

Includes coding for:

- Chest pain on exertion
- Dyspnoea
- Nocturnal dyspnoea
- Ankle swelling
- Palpitations
- No cardiovascular symptom

Consider implementing Cardio-metabolic pathway (see RCGP Step by Step guide)

Diabetes

Includes coding for:

- Diabetes
Follow Diabetes standard monitoring guidance with Reasonable Adjustment
- Latest HbA1c (If not in last 12 months consider test request)
- Latest Diabetic Retinopathy Screening

Musculoskeletal

Remember people with reduced mobility /profound & multiple learning disabilities are at high risk of osteoporosis and may need postural care

Includes coding for:

- Advice about posture
- Musculoskeletal Symptoms
- Osteoporosis / At risk of Osteoporosis

Foot

Consider condition of feet as indicator of general quality of care provision

Includes coding for:

- Foot Deformity
- Advice about foot care
- Under care of podiatrist

Additional Symptoms

Includes coding for:

- Chronic pain
- Dermatology

Screen 4

Behaviour & Mental Health

Consider possible physical causes of changed behaviour such as pain, reflux or sensory changes.

Includes coding for:

- Mental health review / status
- Sleep
Consider sleep apnoea
- Self-harm
- Suicide Risk
- Behaviour
- Dementia
Consider early on-set dementia particularly in Down's syndrome
- Personality Disorders
- Complex Mental Health Conditions
- Under Care of Mental Health or Community LD Team

Examination & Measurements - Includes coding for:

- Examination of respiratory system
- Pulse rate
- Pulse Rhythm
- Heart Sounds
- Exam. of digestive system
- Examination of skin
- Decubitus (pressure) ulcer (M270 - Decubitus (pressure) ulcer)
- General observations
General Observations are available so other clinical observations can be recorded e.g. orthopaedic / neurological exam

Medication Review - Inc. STOMP

Consider reduction in antipsychotic medication especially if prescribed for behaviour management or where there is no diagnosis of psychosis

Consider additional drug monitoring e.g. Anti-epileptic drug monitoring.

Consider implementing Cardio-metabolic pathway (see RCGP Step by Step guide)

Consider review by pharmacist

- Medication Review

Latest Test Results

Consider clinically relevant blood tests according to current guidelines. Consider point of care testing as appropriate – see RCGP Step by Step Guide

Remember also:

- Lithium and anti-epilepsy drug levels
- Vitamin D if on AED
- FSH in prolonged amenorrhoea
- PSA (if indicated)
- CRP (if indicated)
- Stool H pylori antigen (if indicated)

The following headings will appear and will be self-populating from the record if blood tests have been done

- Hb1Ac
- Serum Cholesterol
- Full Blood Count
- Serum HDL cholesterol level
- Thyroid Function Test
Regular thyroid function test required for all patients with Downs Syndrome.
- Urea & Electrolytes
- Liver Function Test
- Urine Dipstick

Male Examination

Includes coding for:

- Examination of testicle

Female Examination

Includes coding for:

- Breast Examination
- Female Pelvic Examination If Indicated

National Electronic Health Check (Learning Disabilities) Clinical Template Summary

End of Life Care

Includes coding for:

- Advance care planning
- On Gold Standards Palliative Care Framework

Safeguarding

Try to take a moment alone with patient and ask if they are being hurt by anyone.

Includes coding for:

- Safeguarding Concerns
- Safeguarding Concerns Comments plus free text
- Is the person subject to DOLS
