

Primary Care Improvers national conference Taking General Practice Forward

**28 March 2017, Kia Oval, London
Start 9.30 for 10 am – 4 pm finish**

A group of likeminded improvement leaders and facilitators will be gathering in London on 28 March 2017 to learn together, recharge their batteries, share stories and connect with others.

Who is the conference for?

All improvement leaders and facilitators who are working in and around primary care. Colleagues who have recently taken part in any element of the Time for Care programme e.g. General Practice Improvement Leaders Programme, Productive General Practice Quick Start, Time for Care learning in action are all welcome. We would welcome delegates to bring along a friend/colleague who is interested in knowing more about quality improvement.

What are the benefits of attending?

The conference will be an informal day where we will use large and small group work, speakers and story tellers and open space time to learn and share together. Participants will benefit from the day in a number of ways:

- Share energy and good ideas - what is working well locally?
- Meet new/reconnect with colleagues making a difference every day to the lives of patients and colleagues
- Refresh knowledge of tried and tested improvement tools and techniques
- Find out more about the newly launched national Primary Care Improvement Community and how to join

How to register a place

The conference will take place at The England Suite, Kia Oval, Harleyford St, Kennington, London SE11 5SS.

To register a place <https://www.events.england.nhs.uk/nhsengland/567/home>

General Practice Forward View

The conference is part of the Primary Care Improvement Community, an element of the General Practice Development Programme that is expressed in the General Practice Forward View. Helping practices implement proven innovations that others have already found useful and have been expressed as 10 High Impact Actions, the forward view helps lay the foundations for new models of integrated care, as well as playing their part in delivering a sustainable and high quality NHS as part of the Sustainability and Transformation Plans process in which general practice has a key role. The programme offers practical implementation support as well as focusing on leaving a legacy of increased capacity and capability in practices and federations to lead service improvement and implement the 10 High Impact Actions.
