Cambridge Diabetes Education Programme (CDEP)

New topic launch - Structured Diabetes Education

Following the success of their other online training modules, CDEP have added structured education to the collection. Aimed at supporting healthcare staff to help them to:

- Motivate people living with diabetes through education
- Raise awareness of the impact of living with diabetes
- Help patients understand how education can play a vital role in self-management

This topic module only takes around 45minutes to complete!

Recently awarded received accreditation by the College of Podiatry. CDEP are very proud to continue to be able to support healthcare professionals with diabetes competency levels.
