

Primary care networks: transforming care for local communities

Wednesday 20 March

10.00am - 4.30pm

Exeter Racecourse, Kennford, Exeter EX6 7XS

About this event:

NHS England is hosting a second series of regional events focusing on primary care networks and how they can change the way that services are delivered at a local level to benefit people and communities. The events will provide an update on the national primary care networks programme, in the context of the Long Term Plan, latest planning guidance and GP contract, and provide an opportunity to discuss current progress with PCNs locally, including examples from areas already working as part of a network.

The events are aimed at a broad audience, including general practice providers, primary care providers, the voluntary sector, commissioners, local government, community and mental health services, social care, secondary care and the wider NHS.

The event will provide an opportunity to:

- Hear direct from national colleagues about key changes and opportunities for primary care and primary care network development
- To strengthen local networking and sharing learning across Cornwall, Devon, Somerset and Dorset
- Let's each Primary Care Network take away ideas which will help it plan its own development and make the best of the opportunities coming from the Long Term Plan and funding from the new GP contract
