DHSC Flu Stock Guidance for GPs

Please find attached latest guidance to support all GP practices that may need to access nationally procured stocks of seasonal flu vaccine.

Please note that this is not a signal to commence vaccination of all 50 – 64 year olds and there will be further confirmation nationally as to when this phase of the flu vaccination programme will commence. There are conditions and self-declarations required as part of the drawdown process and I would encourage you to read the attached documentation before proceeding with any ordering.

In the meantime if you have any queries regarding this guidance please contact the Public Health Integrated Commissioning Team via england.swscreeningandimms@nhs.net

Kind regards

Integrated South West Public Health Team
