Issue 57: 1st October 2021

## Immunisation Clinical Advice Response Service

About this bulletin:

For any COVID-19 vaccination related queries or to escalate an incident please contact: <a href="mailto:england.swicars@nhs.net">england.swicars@nhs.net</a>

## PLEASE SHARE WITH ALL RELEVANT STAFF INVOLVED WITH THE VACCINATION PROGRAMME

Please note that ICARS operates from 9am - 5pm Monday to Friday.

Contents:

- Advice to School Aged Immunisation Service teams on the provision of immunisation sessions in schools where there are cases or outbreaks of COVID-19
- 2. <u>COVID-19: vaccine information for people without an NHS number including</u> <u>translations</u>
- 3. COVID-19 vaccination: easy-read leaflets
- 4. <u>COVID-19 vaccination: easy-read resources for children and young people</u>
- 5. <u>COVID-19 vaccine information for people without an NHS number including</u> <u>translations</u>

## 1. <u>Advice to School Aged Immunisation Service teams on the provision</u> of immunisation sessions in schools where there are cases or outbreaks of <u>COVID-19</u>

Published 22nd September 2021 :

https://www.gov.uk/government/publications/covid-19-provision-of-immunisationsessions-for-outbreaks-in-schools/advice-to-sais-on-the-provision-ofimmunisation-sessions-in-schools-where-there-are-cases-or-outbreaks-of-covid-19

The continued offer of vaccines to school-aged children during the coronavirus (COVID-19) pandemic remains an important measure to protect children against vaccine-preventable diseases. This includes COVID-19 vaccination of children aged 12 to 15 years of age and all routine vaccinations against influenza, meningococcal disease, human papillomavirus, diphtheria, tetanus and polio. It also includes immunisations as part of catch-up offers, such as measles, mumps and rubella vaccination and vaccines that may be offered as part of an outbreak control strategy, such as pertussis and hepatitis A.

Schools should already be following Department for Education (DfE) <u>Schools</u> <u>Operational Guidance</u> (endorsed by Public Health England (PHE)) to reduce the risk of transmission of COVID-19. This includes a range of measures such as good hygiene, cleaning, ventilation, and management of positive cases, both symptomatic and asymptomatic. Face coverings for staff and children are not routinely recommended. Self-isolation is not recommended for contacts aged less than 18 years and 6 months and fully vaccinated members of staff.

Under these measures school-based immunisation sessions should go ahead as planned, with all healthcare staff following infection prevention and control measures as set out in the <u>national COVID-19 Infection Prevention and Control (IPC) guidance</u>.

Schools experiencing an outbreak of COVID-19 should follow DfE's <u>contingency</u> <u>framework for education and childcare settings</u>. Local authorities, directors of public health (DsPH) and PHE health protection teams (HPTs) can recommend measures described in the guidance to schools, as part of their outbreak management responsibilities. The main aim of the guidance is to prioritise education, maximise the number of children in face-to-face education and minimise any disruption, in a way that also best manages COVID-19 risks.

There is currently limited evidence to support <u>the use of COVID-19 vaccines as</u> <u>post-exposure prophylaxis or to interrupt transmission during outbreaks</u>. Given the longer-term benefits of vaccines, however, immunisation sessions should still go ahead as planned when a school has a COVID-19 outbreak, unless specifically advised not to by a health protection team (HPT) or Director of Public Health (DPH). Other factors that may impact on the ability to offer immunisation sessions include the number of children still in school and whether the school has had to send some year groups home or close due to lack of staff. Providers of School Age Immunisation Services (SAIS) should work with the school, local authority, HPT and DPH to ensure the risk of transmission of infection is minimised through the use of any additional measures that a risk assessment might identify, or as advised by the provider's IPC team and outbreak control team.

School-aged immunisation teams will need to work with the school to ensure children who missed vaccinations because they were self-isolating at home or for other reasons, including exclusion, are re-offered immunisation at an appropriate time in the future.

## 2. <u>COVID-19: vaccine information for people without an NHS number</u> <u>including translations</u>

A <u>letter</u> from NHS England and NHS Improvement and Public Health England explains how people can get the COVID-19 vaccine and if they want to, register at a GP practice. Whilst stressing that **people do not need to have a GP or an NHS number to get the COVID-19 vaccine,** it reassures that COVID-19 vaccines are safe and available to **every adult** living in the UK, free of charge without any immigration checks. And people can organise their vaccination by contacting their local GP practice or by going to a walk-in or pop-up vaccination centre. Staff and volunteers supporting people who don't have an NHS number, are asked to <u>share this letter</u> which is also published in <u>COVID-19</u>: <u>migrant health guide</u> with their service users.

The letter has now been translated into over 20 languages. The letters can be downloaded here: <u>https://www.gov.uk/government/publications/covid-19-vaccine-information-for-people-without-an-nhs-number</u>

## 3. COVID-19 vaccination: easy-read leaflets

Please find this link with easy read guides providing information on COVID-19 and vaccination, including a print version which are all available for free downloads: <u>COVID-19 vaccination: easy-read leaflets</u>

These resources are aimed at people who have, or care for someone with a learning disability.

- Easy-read leaflet on COVID-19 vaccination for women who might get pregnant, who are pregnant or are breastfeeding their baby <u>(updated on the 6th September)</u>: Printed copies are available to <u>order</u>. Translated versions will be available soon.
- Easy-read leaflet on what to expect after COVID-19 vaccination available in: English, Albanian, Arabic, Bengali, Bulgarian, Chinese, French, Gujarati, Hindi, Li thuanian, Panjabi, Pashto, Polish, Portuguese, Romanian, Russian, Somali, Taga log, Ukrainian, Urdu and Vietnamese.
- Information on COVID-19 vaccination: easy-read leaflet available in: English, Albanian, Arabic, Bengali, Bulgarian, Chinese, French, Gujarati, Hindi, Li thuanian, Panjabi, Pashto, Polish, Portuguese, Romanian, Russian, Somali, Taga log, Ukrainian, Urdu and Vietnamese.

Braille versions are available to order from Health Publications and <u>British Sign</u> <u>Language (BSL) videos</u> of these leaflets are available to view or download.

NHS England Learning Disability and Autism Programme have produced an <u>information about vaccines video</u> for people with a learning disability and their carers. A set of <u>short social media clips</u> of the video are available to download from the Health Publications website.

## 4. COVID-19 vaccination: easy-read resources for children and young people

This easy-read guidance is aimed at children and young people who have a learning disability and is available for download only from this link: <u>COVID-19</u> vaccination: easy-read resources for children and young people

An easy-read consent form is also available for download.

## 5. <u>COVID-19 vaccine information for people without an NHS number including</u> <u>translations</u>

A <u>letter</u> from NHS England and NHS Improvement and Public Health England explains how people can get the COVID-19 vaccine and if they want to, register at a GP practice. Whilst stressing that **people do not need to have a GP or an NHS number to get the COVID-19 vaccine,** it reassures that COVID-19 vaccines are safe and available to **every adult** living in the UK, free of charge without any immigration checks. And people can organise their vaccination by contacting their local GP practice or by going to a walk-in or pop-up vaccination centre. Staff and volunteers supporting people who don't have an NHS number, are asked to <u>share this letter</u> which is also published in <u>COVID-19</u>: migrant health guide with their service users.

The letter has now been translated into over 20 languages. The letters can be downloaded here: <u>https://www.gov.uk/government/publications/covid-19-vaccine-information-for-people-without-an-nhs-number</u>
