Issues impacting Adult and Childhood Seasonal Flu CQRS Extracts for September Final Update

On 14 October 2022, we advised that two issues had been encountered with the Seasonal Flu service.

Issue 1 – Seasonal Flu Injectable vaccines pharmacy reference sets

This affected all GP Clinical System Suppliers.

The extractions for Cegedim and EMIS were rectified as part of their collections taking place in October.

TPP completed a system fix for the above issue on 7 November. The extraction of October data was collected between 9 and 15 November and September data was re-extracted between 10 and 13 November.

Issue 2 – TPP Seasonal flu reporting issue

TPP were able to fix the issue with the reporting in October and the latest extractions completed in November have rectified this issue.

No further updates will follow
