Adult Vaccination Programmes Toolkit

Please find attached the South West Adult Vaccination Programmes Toolkit. This toolkit has been prepared to support the effective delivery of routine adult immunisations in Primary Care. It contains a variety of information and best practice guidance on improving uptake in the shingles and pneumococcal programmes. It also includes a brief update on changes to the shingles programme coming in September 2023. More information to follow.

We are always looking for ways to capture best practice so if you have any suggestions that you think we should include in future updates of this toolkit, please email england.swscreeningandimms@nhs.net
