Adult Vaccination Programmes Toolkit

Please find attached the South West Adult Vaccination Programmes Toolkit. This toolkit has been prepared to support the effective delivery of routine adult immunisations in Primary Care. It contains a variety of information and best practice guidance on improving uptake in the shingles and pneumococcal programmes. This latest version includes all changes to the shingles programme introduced in September 2023.

Please note, although best efforts have been made to ensure the content is comprehensive and up to date at time of writing, please always refer to the most up to date guidance online using the links in the toolkit.

We are always looking for ways to capture best practice so if you have any suggestions that you think we should include in future updates of this toolkit, please email SW Vaccination & Screening Team (VaST) england.swvast@nhs.net

COVID-19:

No items.

FURTHER INFORMATION

If you have any questions or wish to provide feedback, please contact the SW Vaccination and Screening Team at england.swvast@nhs.net. Back issues of these bulletins and attachments are available on the NHS England website [here](#). **Please note that if there are no items for your information a Bulletin will not be circulated.**
