Notes:

1. Only statistical products which are regularly produced are shown in this list. NHS England may release some ad-hoc statistical products – none of these are National Statistics products.
2. The Daily Situation Reports publication is a time-limited product as the underlying data for it is only collected during the winter (from approximately December – March each year) period.
3. Following a consultation, the National Statistics on Imaging and Radio Diagnostics have been discontinued.
4. Following a review undertaken by NHS England the Lead Official for Statistics has concluded that the characteristics of the Friends and Family Test (FFT) data mean it should not be classed as Official Statistics. From October 2015 all FFT data has been published in a single release on [the FFT data pages](#). Historic FFT data and dates for future FFT releases can also be found by following the link above.
5. Early Intervention in Psychosis Access and Waiting Time Experimental Statistics (MHEIPPCm) is a new monthly collection published on 14th April 2016 for February 2016 data, but also for January 2016 and December 2015 data on the same day.
6. General Practice Extended Access is a new collection to be published on 1st December 2016. It provides information about the provision of extended access to pre-bookable appointments by general practices across England. The collection includes the information collected during October 2016 for each GP practice reports totals for England, Regions, Local Offices and CCGs.
