Winter Daily Situation Reports ²	Weekly

Notes

1. Only statistical products which are regularly produced are shown in this list. NHS England may release some ad-hoc statistical products – none of these are National Statistics products.
2. The Daily Situation Reports publication is a time-limited product as the underlying data for it is only collected during the winter (from approximately November – March each year) period.
3. Following a consultation, the National Statistics on Imaging and Radio Diagnostics have been discontinued.
4. Following a review undertaken by NHS England the Lead Official for Statistics has concluded that the characteristics of the Friends and Family Test (FFT) data mean it should not be classed as Official Statistics. From October 2015 all FFT data will be published in a single release on the FFT data pages:
<http://www.england.nhs.uk/ourwork/pe/fft/friends-and-family-test-data/>.

Historic FFT data and dates for future FFT releases can also be found by following the link above to the FFT data pages. Releasing all FFT data on the same day of the month should be beneficial to users as it will provide a single clear and complete picture of monthly FFT data from all FFT care settings.
