

# **Revisions Policy for NHS data collected through Unify2**

NHS England Analytical Services

Last reviewed: October 2014

## **Revisions Policy for NHS data collected through Unify2**

This revision protocol relates to the data collected through the Unify2 system and disseminated by the NHS England Analytical Services. The range of published information covered by this policy is shown in the table below. This policy is consistent with the National Statistics Code of Practice<sup>1</sup> and the UK Statistics Authority's guidance on revisions<sup>2</sup>.

### **Dissemination**

The publication of scheduled revised data will be via a statistical press notice every six months, released in line with NHS England's statistical release policy<sup>3</sup>. Revisions to individual providers and commissioners will be reflected in the England total and, for some publications, in the regional totals as well, and the impact on previously published data will be summarised on release. Explanations for any revisions will be made available on request.

### **Timing**

NHS England Analytical Services will normally publish revisions to the data on a six-monthly basis to dates that will be included in NHS England's Statistics 12-month publication plan. However, we reserve the right to make more frequent, unscheduled changes if necessary. Any significant revisions received after the revision period has closed will generally not be disseminated until the next scheduled revision.

### **Historic data**

Revisions will relate usually to the six months prior to the revisions publication date. In exceptional circumstances revisions will go further back, if not doing so would materially distort the historical time series or would unduly impact on the assessment of an organisation's performance against a national target or standard.

### **Decisions about revisions**

NHS England Analytical Services reserve the right to refuse any revisions that do not make material differences to published datasets. Final decisions about publishing revised data will be taken after consultations with senior professional NHS England analysts. The normal pre-release procedure will apply to revisions.

### **Process for submitting revisions**

Revision requests to a given data collection will be made to the email in the table below. More detailed guidance for NHS organisations is posted on the Unify2 site itself.
