

Cancer Waiting Times, October 2016 – Provider Based – Provisional

The latest monthly Official Statistics on waiting times for suspected and diagnosed cancer patients accessing NHS services, produced by NHS England, were released on 8th December 2016 according to the arrangements approved by the UK Statistics Authority.

Waiting Times for Cancer Services – October 2016

The key results for outpatient services and first definitive treatments show that, in England, during the period October 2016:

Two week wait:

- 94.8% of people were seen by a specialist within two weeks of an urgent GP referral for suspected cancer (94.1% in September 2016)
- 96.1% of people urgently referred for breast symptoms (where cancer was not initially suspected) were seen within two weeks of referral (95.7% in September 2016)

One month (31-day) wait from diagnosis to first definitive treatment:

- 97.4% of people treated began first definitive treatment within 31 days of receiving their diagnosis, all cancers (97.4% in September 2016)
- 98.5% of people treated for breast cancer began first definitive treatment within 31 days of receiving their diagnosis (98.5% in September 2016)
- 98.3% of people treated for lung cancers began first definitive treatment within 31 days of receiving their diagnosis (98.1% in September 2016)
- 97.3% of people treated for lower gastrointestinal cancers began first definitive treatment within 31 days of receiving their diagnosis (97.5% in September 2016)
- 95.3% of people treated for urological cancers began first definitive treatment within 31 days of receiving their diagnosis (95.4% in September 2016)
- 97.3% of people treated for skin cancers began first definitive treatment within 31 days of receiving their diagnosis (96.9% in September 2016)

Two month (62-day) wait from urgent GP referral to first definitive treatment:

- 81.1% of people treated began first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP, all cancers (81.4% in September 2016)

- 95.6% of people treated for breast cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (94.8% in September 2016)
- 72.8% of people treated for lung cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (71.7% in September 2016)
- 67.5% of people treated for lower gastrointestinal cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (68.7% in September 2016)
- 74.9% of people treated for urological cancers (excluding testicular cancer) received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (76.0% in September 2016)
- 95.1% of people treated for skin cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (94.7% in September 2016)

62-day wait extensions

- 88.7% of patients began first definitive treatment within 62 days of a consultant's decision to upgrade their priority, all cancers (88.6% in September 2016)
- 91.3% of people began first definitive treatment for cancer within 62 days of referral from an NHS cancer screening service, all cancers (91.9% in September 2016)

The key results for waiting times for second or subsequent treatment show that, in England, during the period October 2016:

31-day wait for subsequent treatment:

- 95.8% of people began treatment within 31 days where the subsequent treatment was surgery (95.2% in September 2016)
- 99.3% of people began treatment within 31 days where the subsequent treatment was an anti-cancer drug regimen (99.2% in September 2016)
- 97.4% of people began treatment within 31 days where the subsequent treatment was a course of radiotherapy (96.5% in September 2016)
