

Cancer Waiting Times, July 2017 – Provider Based - Provisional

The latest monthly Official Statistics on waiting times for suspected and diagnosed cancer patients accessing NHS services, produced by NHS England, were released on 14/09/2017 according to the arrangements approved by the UK Statistics Authority.

Waiting Times for Cancer Services – July 2017

The key results for outpatient services and first definitive treatments show that, in England, during the period July 2017 :

Two week wait:

- 94.0% of people were seen by a specialist within two weeks of an urgent GP referral for suspected cancer (94.1% in June 2017)
- 93.5% of people urgently referred for breast symptoms (where cancer was not initially suspected) were seen within two weeks of referral (91.6% in June 2017)

One month (31-day) wait from diagnosis to first definitive treatment:

- 97.7% of people treated began first definitive treatment within 31 days of receiving their diagnosis, all cancers (97.6% in June 2017)
- 98.4% of people treated for breast cancer began first definitive treatment within 31 days of receiving their diagnosis (98.4% in June 2017)
- 98.9% of people treated for lung cancers began first definitive treatment within 31 days of receiving their diagnosis (98.2% in June 2017)
- 98.2% of people treated for lower gastrointestinal cancers began first definitive treatment within 31 days of receiving their diagnosis (97.5% in June 2017)
- 95.6% of people treated for urological cancers began first definitive treatment within 31 days of receiving their diagnosis (95.5% in June 2017)
- 97.6% of people treated for skin cancers began first definitive treatment within 31 days of receiving their diagnosis (97.9% in June 2017)

Two month (62-day) wait from urgent GP referral to first definitive treatment:

- 81.4% of people treated began first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP, all cancers (80.5% in June 2017)

- 93.7% of people treated for breast cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (92.8% in June 2017)
- 70.0% of people treated for lung cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (69.6% in June 2017)
- 70.8% of people treated for lower gastrointestinal cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (69.8% in June 2017)
- 76.2% of people treated for urological cancers (excluding testicular cancer) received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (74.2% in June 2017)
- 96.1% of people treated for skin cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (96.8% in June 2017)

62-day wait extensions

- 88.5% of patients began first definitive treatment within 62 days of a consultant's decision to upgrade their priority, all cancers (87.5% in June 2017)
- 90.5% of people began first definitive treatment for cancer within 62 days of referral from an NHS cancer screening service, all cancers (91.9% in June 2017)

The key results for waiting times for second or subsequent treatment show that, in England, during the period July 2017 :

31-day wait for subsequent treatment:

- 96.0% of people began treatment within 31 days where the subsequent treatment was surgery (96.5% in June 2017)
- 99.6% of people began treatment within 31 days where the subsequent treatment was an anti-cancer drug regimen (99.3% in June 2017)
- 97.0% of people began treatment within 31 days where the subsequent treatment was a course of radiotherapy (96.8% in June 2017)
