

Cancer Waiting Times, May 2018 – Provider Based – Final

The latest monthly Official Statistics on waiting times for suspected and diagnosed cancer patients accessing NHS services, produced by NHS England, were released on 10/01/2019 according to the arrangements approved by the UK Statistics Authority.

Waiting Times for Cancer Services – May 2018

The key results for outpatient services and first definitive treatments show that, in England, during the period May 2018:

Two week wait:

- 92.2% of people were seen by a specialist within two weeks of an urgent GP referral for suspected cancer (90.8% in April 2018)
- 83.7% of people urgently referred for breast symptoms (where cancer was not initially suspected) were seen within two weeks of referral (84.3% in April 2018)

One month (31-day) wait from diagnosis to first definitive treatment:

- 97.8% of people treated began first definitive treatment within 31 days of receiving their diagnosis, all cancers (97.3% in April 2018)
- 99.3% of people treated for breast cancer began first definitive treatment within 31 days of receiving their diagnosis (98.5% in April 2018)
- 98.4% of people treated for lung cancers began first definitive treatment within 31 days of receiving their diagnosis (97.2% in April 2018)
- 97.9% of people treated for lower gastrointestinal cancers began first definitive treatment within 31 days of receiving their diagnosis (97.7% in April 2018)
- 95.7% of people treated for urological cancers began first definitive treatment within 31 days of receiving their diagnosis (95.1% in April 2018)
- 98.3% of people treated for skin cancers began first definitive treatment within 31 days of receiving their diagnosis (98.1% in April 2018)

Two month (62-day) wait from urgent GP referral to first definitive treatment:

- 81.1% of people treated began first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP, all cancers (82.3% in April 2018)

- 91.5% of people treated for breast cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (94.0% in April 2018)
- 73.8% of people treated for lung cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (72.0% in April 2018)
- 71.5% of people treated for lower gastrointestinal cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (72.4% in April 2018)
- 75.9% of people treated for urological cancers (excluding testicular cancer) received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (79.4% in April 2018)
- 96.1% of people treated for skin cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (95.7% in April 2018)

62-day wait extensions

- 84.8% of patients began first definitive treatment within 62 days of a consultant's decision to upgrade their priority, all cancers (85.3% in April 2018)
- 88.3% of people began first definitive treatment for cancer within 62 days of referral from an NHS cancer screening service, all cancers (88.3% in April 2018)

The key results for waiting times for second or subsequent treatment show that, in England, during the period May 2018:

31-day wait for subsequent treatment:

- 94.8% of people began treatment within 31 days where the subsequent treatment was surgery (94.3% in April 2018)
- 99.5% of people began treatment within 31 days where the subsequent treatment was an anti-cancer drug regimen (99.3% in April 2018)
- 97.3% of people began treatment within 31 days where the subsequent treatment was a course of radiotherapy (97.2% in April 2018)
