

Cancer Waiting Times, January 2018 – Provider Based – Revised Final

The latest monthly Official Statistics on waiting times for suspected and diagnosed cancer patients accessing NHS services, produced by NHS England and NHS Improvement, were released on 11/07/2019 according to the arrangements approved by the UK Statistics Authority.

Waiting Times for Cancer Services – January 2018

The key results for outpatient services and first definitive treatments show that, in England, during the period January 2018:

Two week wait:

- 91.7% of people were seen by a specialist within two weeks of an urgent GP referral for suspected cancer (93.7% in December 2017)
- 82.5% of people urgently referred for breast symptoms (where cancer was not initially suspected) were seen within two weeks of referral (86.1% in December 2017)

One month (31-day) wait from diagnosis to first definitive treatment:

- 95.4% of people treated began first definitive treatment within 31 days of receiving their diagnosis, all cancers (97.1% in December 2017)
- 96.2% of people treated for breast cancer began first definitive treatment within 31 days of receiving their diagnosis (98.0% in December 2017)
- 97.7% of people treated for lung cancers began first definitive treatment within 31 days of receiving their diagnosis (98.8% in December 2017)
- 95.5% of people treated for lower gastrointestinal cancers began first definitive treatment within 31 days of receiving their diagnosis (98.4% in December 2017)
- 92.1% of people treated for urological cancers began first definitive treatment within 31 days of receiving their diagnosis (93.4% in December 2017)
- 95.5% of people treated for skin cancers began first definitive treatment within 31 days of receiving their diagnosis (97.5% in December 2017)

Two month (62-day) wait from urgent GP referral to first definitive treatment:

- 76.3% of people treated began first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP, all cancers (81.0% in December 2017)

- 88.6% of people treated for breast cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (91.5% in December 2017)
- 68.9% of people treated for lung cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (75.8% in December 2017)
- 66.5% of people treated for lower gastrointestinal cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (72.3% in December 2017)
- 68.7% of people treated for urological cancers (excluding testicular cancer) received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (74.7% in December 2017)
- 93.3% of people treated for skin cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (95.7% in December 2017)

62-day wait extensions

- 83.7% of patients began first definitive treatment within 62 days of a consultant's decision to upgrade their priority, all cancers (86.0% in December 2017)
- 84.6% of people began first definitive treatment for cancer within 62 days of referral from an NHS cancer screening service, all cancers (88.8% in December 2017)

The key results for waiting times for second or subsequent treatment show that, in England, during the period January 2018:

31-day wait for subsequent treatment:

- 90.7% of people began treatment within 31 days where the subsequent treatment was surgery (93.5% in December 2017)
- 98.8% of people began treatment within 31 days where the subsequent treatment was an anti-cancer drug regimen (99.5% in December 2017)
- 95.6% of people began treatment within 31 days where the subsequent treatment was a course of radiotherapy (97.9% in December 2017)
