

STATISTICAL PRESS NOTICE MONTHLY DELAYED TRANSFERS OF CARE DATA, ENGLAND, MAY 2019

Main Findings – MAY 2019:

Delayed Transfers of Care

- There were 139,500 total delayed days in May 2019, of which 91,600 were in acute care. This is a decrease from May 2018, where there were 139,800 total delayed days, of which 92,300 were in acute care.
- The 139,500 total delayed days in May 2019 is equivalent to an average of 4,499 patients delayed per day. This compares to 4,510 in May 2018 and 4,361 in April 2019.
- Both the NHS and the Social Care sectors have seen a decrease in the volume of delayed transfers of care in the last year.
- 62.3% of all delays in May 2019 were attributable to the NHS, 28.1% were attributable to Social Care and the remaining 9.6% were attributable to both NHS and Social Care.
- The proportion of delays attributable to Social Care has decreased over the last year to 28.1%.
- The main reason for NHS delays in May 2019 was “Patients Awaiting further Non Acute NHS Care”. This accounted for 26,300 delayed days (30.3% of all NHS delays). The number of delays attributable to this reason showed an increase between August 2015 and January 2017, but have been generally decreasing since May 2018.
- The main reason for Social Care delays in May 2019 was “Patients Awaiting Care Package in their Own Home”. This accounted for 12,400 delayed days (31.5% of all Social Care delays). The number of delays attributable to this reason had been increasing steadily since April 2014 and reached a peak in December 2016. Delays attributable to this reason have been generally decreasing since May 2018.
- Delays can occur in either an acute or non-acute care setting. The proportion of delays occurring in acute care in May 2019 was 65.6% compared to 66.0% in May 2018.

Table 1 shows information on delayed transfers of care from May 2016 to May 2019.

Table 2 shows the number of delayed transfers of care by type of care, reason for delay and responsible organisation for May 2019.

Details of delayed transfers of care data for individual organisations are available at:

Notes:

1. NA means the combination of reason and responsible organisation is not permitted.
2. As of April 2018, a new 'Other' category has been added for non-acute delays. This category is used for delays reported in NHS Digital's Mental Health Services Data Set (MHSDDS v2.0) which cannot be mapped to existing codes within the Monthly Delayed Transfers of Care collection.

Statistical Notes to Editors

1. Delayed Transfers of Care data

A delayed transfer of care occurs when a patient is medically fit for discharge from acute or non-acute care and is still occupying a bed. For a more detailed definition please read the guidance on NHS England's website at:

<http://www.england.nhs.uk/statistics/delayed-transfers-of-care/>

The average number of patients delayed per day measure is calculated by dividing the total number of delayed days in the month by the number of calendar days.

As of April 2017, the count of patients delayed on the last Thursday of the month is no longer being collected. Historical data for this measure will remain available on the NHS England Statistics website.

Data on delayed transfers of care is collected from providers of NHS funded care and is split by:

- Local Authority that is responsible for each patient delayed
- Agency responsible for delay (NHS, Social Services or both)
- Type of care that the patient receives (acute or non-acute)
- Reason for delay

A detailed breakdown of the data can be found on NHS England's website in CSV format at:

<https://www.england.nhs.uk/statistics/statistical-work-areas/delayed-transfers-of-care/delayed-transfers-of-care-data-2018-19/>

2. Trust and Local Authority level data

Delayed transfers of care data covers NHS patients in English Hospitals, who may or may not reside in England and is published on both a trust and Local Authority basis.

Trust level reflects data at organisation level for those organisations that provide NHS funded care, for example acute Trusts, community providers, mental health trusts and Social Enterprise organisations.

Local Authority data reflects data on a regional population basis, i.e. Councils with Adult Social Services Responsibility (CASSRs) that are responsible for all patients who reside in their region.

3. Data Quality

Monthly delayed transfers of care data has been collected and published since August 2010. Prior to August 2010, data was collected weekly and was un-validated management information.

Delayed transfers of care data published during the early months of the collection from August 2010 to December 2010 should be treated with a degree of caution as a change from a weekly to a monthly data collection led to data quality issues. Since December 2010, there has been a significant improvement in the coverage and accuracy of this data.

4. Data Availability

Delayed Transfers of Care data is published approximately six weeks after the end of the reference period. The next publication of this report and accompanying data will be **8th August** 2019.

5. Revisions

Revisions to previous months' data are made in line with NHS England and NHS Improvement's revisions protocol for performance monitoring data. Future revisions will be made on a six monthly cycle. The revisions protocol can be found on the NHS England website at:

<http://www.england.nhs.uk/statistics/code-compliance/>
