Statistical Press Notice NHS Continuing Healthcare and NHS-funded Nursing Care data Q1 2019-20

This NHS England statistical press release summarises data on NHS Continuing Healthcare (NHS CHC) and NHS-funded Nursing Care (FNC) activity. The activity includes adults aged 18 and over in England relating to the Q1 2019-20 reporting period.

1 Executive Summary

1.1 NHS Continuing Healthcare

1.1.1 Snapshot

Referrals

The number of incomplete Standard NHS CHC referrals exceeding 28 calendar days was 2,169 as at the last day of Q1 2019-20.

Of these:

- 625 exceeded by up to 2 weeks;
- 347 exceeded by more than 2 weeks and up to 4 weeks;
- 563 exceeded by more than 4 weeks and up to 12 weeks;
- 306 exceeded by more than 12 weeks and up to 26 weeks;
- 328 exceeded by more than 26 weeks.

Activity

The total number of people eligible for NHS CHC was 55,872 as at the last day of Q1 2019-20. Of these, 36,266 were eligible for Standard NHS CHC and 19,606 were eligible for Fast Track NHS CHC.

Local Resolution Requests

The total number of incomplete local resolution requests to CCGs for NHS CHC was 2,799 as at the last day of Q1 2019-20.

1.1.2 Year to Date

Activity

The total cumulative number of cases eligible year to date for NHS CHC was 81,168 up to the end of Q1 2019-20. Of these, 40,605 were eligible via the Standard NHS CHC assessment route and 40,563 were eligible via the Fast Track assessment route.

Previously Unassessed Periods of Care (PUPoC)

The total cumulative number of cases eligible year to date for previously unassessed

periods of care NHS CHC was 246 up to the end of Q1 2019-20.

1.1.3 In Quarter

Referrals

The total number of new referrals was 42,678 in Q1 2019-20. Of these, 17,866 were via the Standard NHS CHC assessment route and 24,812 were via the Fast Track assessment route.

The total number of referrals completed was 42,510 in Q1 2019-20; this includes cases discounted prior to assessment. Of these, 18,402 were via the Standard NHS CHC assessment route and 24,108 were via the Fast Track assessment route.

Of the 18,402 Standard NHS CHC referrals completed in Q1 2019-20, 13,957 (76%) were completed within 28 calendar days.

The total number of referrals discounted before assessment was 4,087 in Q1 2019-20. Of these, 3,094 were via the Standard NHS CHC assessment route and 993 were via the Fast Track assessment.

Assessments

The total number of people assessed for NHS CHC was 38,423 in Q1 2019-20. Of these, 15,308 were via the Standard NHS CHC assessment route and 23,115 were via the Fast Track assessment route.

The total number of people assessed as eligible for NHS CHC was 26,741 in Q1 2019-20. Of these, 3,626 were eligible via the Standard NHS CHC assessment route and 23,115 were eligible via the Fast Track assessment route.

The total number of people assessed as not eligible for Standard NHS CHC was 11,682 in Q1 2019-20.

Other in quarter activity

The total number of people no longer eligible for NHS CHC was 25,296 in Q1 2019-20. Of these, 4,339 were Standard NHS CHC cases and 20,957 were Fast Track cases.

Conversion Rates

The Standard NHS CHC assessment conversion rate was 24% and the Fast Track assessment conversion rate was 100%.

The Standard NHS CHC referral conversion rate was 20% and the Fast Track referral conversion rate was 96%.

Number of Decision Support Tools (DST) completed

The total number of DSTs completed for the Standard NHS CHC assessment route was 14,889 in Q1 2019-20. Of these, 974 (7%) were completed in an acute hospital setting.

Local Resolution Requests

The total number of local resolution requests to CCGs completed was 875 in Q1 2019-20. Of these, 144 (16%) resulted in eligibility.

1.2 NHS-funded Nursing Care

1.2.1 Snapshot

Activity

The total number of people eligible for NHS-funded Nursing Care was 79,326 as at the last day of Q1 2019-20.

1.2.2 Year to Date

Activity

The total cumulative number of cases eligible year to date for NHS-funded Nursing Care was 90,855 up to the end of Q1 2019-20.

1.3 Missing Data

In Q1 2019-20, 191 CCGs contributed to this statistical publication.

Revisions to published data are assessed according to the NHS England revisions policy¹.

The impact of missing data varies depending on the measure being considered. The impact of single CCG omissions will generally be minimal. A notable exception would be where a CCG has contributed heavily to a previous period's activity (such as a very high activity figure). The absence of such a CCG could materially impact England-level activity or performance.

To assess the impact of missing data, we analyse how the omission of a CCG's data would have affected the previous period's activity. Each metric is recalculated at the England-level and any significant (typically more than 1%) changes are identified. As all CCGs contributed to the Q1 2019-20 publication no missing data impact assessment is needed.

2 Statistical Notes to Editors

Definitions and further guidance for all concepts relating to NHS CHC can be found in the National Framework for NHS Continuing Healthcare and NHS-funded Nursing Care².

2.1 NHS CHC Assessment Routes

2.1.1 NHS Continuing Healthcare

NHS Continuing Healthcare means a package of ongoing care that is arranged and funded solely by the NHS where the individual has been found to have a 'primary health need' as set out in the National Framework for NHS Continuing Healthcare and NHS-funded Nursing Care². Such care is provided to an individual aged 18 or over to meet needs that have arisen as a result of disability, accident or illness.

2.1.2 Standard NHS CHC

NHS CHC cases which are not Fast Track. This includes those that have been agreed eligible via the standard NHS CHC assessment route (i.e. positive checklist, DST etc.) and those Fast Track cases that have been reviewed and changed to Standard NHS CHC. It does not include Previously Unassessed Periods of Care (PUPoCs).

2.1.3 Fast Track

Individuals with a rapidly deteriorating condition that may be entering a terminal phase, may require 'fast tracking' for immediate provision of NHS Continuing Healthcare. The Fast Track Tool should be completed by an appropriate clinician, who should give the reasons why the person meets the criterion required for the fast-tracking decision. 'Appropriate clinicians' are those persons who are, pursuant to National Health Service

¹ NHS England revisions policy: <https://www.england.nhs.uk/statistics/code-compliance/>

² NHS CHC National Framework: <https://www.gov.uk/government/publications/national-framework-for-nhs-continuing-healthcare-and-nhs-funded-nursing-care>

Act³ responsible for an individual's diagnosis, treatment or care and who are medical practitioners (such as consultants, registrars or GPs) or registered nurses. The clinician should have an appropriate level of knowledge or experience of the type of health needs, so that they are able to comment reasonably on whether the individual has a rapidly deteriorating condition that may be entering a terminal phase.

2.1.4 Previously Unassessed Period of Care

Claims for Previously Unassessed Periods of Care (PUPoC) refer to a specific request to consider eligibility for a past period of care, where there is evidence that the individual should have been assessed for eligibility for NHS CHC funding. PUPoCs may relate to either deceased or ongoing eligible cases.

2.1.5 Local Resolution Requests

A local resolution request is a request to the CCG to review an eligibility decision, by the individual or their representative, following a full assessment undertaken using the Decision Support Tool (or by use of the Fast Track Pathway tool).

2.1.6 NHS-funded Nursing Care

NHS-funded Nursing Care (FNC) is the funding provided by the NHS to homes providing nursing to support the provision of nursing care by a registered nurse. In all cases individuals should be considered for eligibility for NHS CHC before a decision is reached about the need for FNC.

2.2 NHS CHC Data Collection

NHS CHC data are collected on a quarterly basis from the 191 Clinical Commissioning Groups (CCGs) in England. Each dataset is signed-off by the responsible CCG following their internal processes. The submitted data are quality assured by NHS England and any modifications and queries are addressed before publication.

The data measures NHS CHC activity in three time categories: "snapshot", "year to date" (YTD) and "in quarter". A breakdown of measures collected in each time category can be found below:

	Snapshot	Year to Date	In Quarter
Referrals	X	-	X
Assessments	-	-	X
Activity	X	X	X
Conversion Rates	-	-	X
Local Resolution Requests	X	-	X
Previously Unassessed Period of Care	-	X	-
Decision Support Tool	-	-	X

Table 1: NHS CHC (Standard and Fast Track assessment routes)

	Snapshot	Year to Date	In Quarter
Activity	X	X	-

Table 2: NHS-funded Nursing Care

³ <http://www.legislation.gov.uk/ukpga/2006/41/contents>

For detailed information on measures and datasets please refer to NHS Continuing Healthcare and NHS-funded Nursing Care report⁴.

Population data are sourced from NHS Digital⁵. The population estimate for a quarter is given by the number of patients registered at GP practices on the day after the end of the quarter. E.g. quarter three (October, November and December) population data is the population as at 1st January.

A small number of practice figures may not be allocated to a specific CCG therefore these still come under the England total but do not appear at CCG or area team level. Therefore, the sum of all CCG or area team populations may not reconcile to the England total.

The population methodology contributes to variation between CCGs. This is because there are no weightings included in the GP populations that allow for demographical differences in the composition and health needs of each population, they are simply a count. Whereas this population base may not be perfect for NHS CHC purposes, it is the closest available fit for this cohort.

2.3 NHS CHC Data Availability

NHS CHC activity data are published every quarter. Current data can be found on the NHS England statistics website⁶. CHC activity figures are published to a pre-announced timetable⁷.

2.4 Interpretation of NHS CHC Data

It is essential to note that there may be variations between CCGs, Regional Teams and Regions when compared against each other. This could be due to a wide variety of reasons including (but not limited to) the age dispersion within the local population, variations between geographical areas in terms of their levels of health needs, and the availability of other local services for example step down beds, intermediate care, rehabilitation services, and other CCG community services. In terms of Fast Track NHS CHC there is a wide variety between CCGs in terms of end of life (EOL) services that may or may not be available which may impact levels of Fast Track NHS CHC. Examples of possible EOL services include hospice beds, hospice at home services, night sitting services, and out-of-hours provision of specialist palliative care. These factors therefore need to be taken into consideration when viewing the data and care should be taken when attempting to draw simple comparisons.

3 Additional Information

3.1 Further Reading

For more details on NHS CHC data quality and methodology please refer to NHS Continuing Healthcare and NHS-funded Nursing Care report⁴.

3.2 Feedback welcome

We welcome feedback on the content and presentation of NHS Continuing Healthcare data within this statistical press notice and those published on the NHS England website. If you have any comments on this, or any other issues regarding NHS Continuing Healthcare data, please email england.chcdata@nhs.net.
