

Cancer Waiting Times, June 2019 – Provider Based – Provisional

The latest monthly Official Statistics on waiting times for suspected and diagnosed cancer patients accessing NHS services, produced by NHS England and NHS Improvement, were released on 08/08/2019 according to the arrangements approved by the UK Statistics Authority.

Waiting Times for Cancer Services – June 2019

The key results for outpatient services and first definitive treatments show that, in England, during the period June 2019:

Two week wait:

- 90.0% of people were seen by a specialist within two weeks of an urgent GP referral for suspected cancer (90.8% in May 2019)
- 78.0% of people urgently referred for breast symptoms (where cancer was not initially suspected) were seen within two weeks of referral (78.9% in May 2019)

One month (31-day) wait from diagnosis to first definitive treatment:

- 95.96% of people treated began first definitive treatment within 31 days of receiving their diagnosis, all cancers (95.97% in May 2019)
- 97.3% of people treated for breast cancer began first definitive treatment within 31 days of receiving their diagnosis (97.2% in May 2019)
- 97.6% of people treated for lung cancers began first definitive treatment within 31 days of receiving their diagnosis (97.0% in May 2019)
- 96.9% of people treated for lower gastrointestinal cancers began first definitive treatment within 31 days of receiving their diagnosis (96.6% in May 2019)
- 92.4% of people treated for urological cancers began first definitive treatment within 31 days of receiving their diagnosis (92.7% in May 2019)
- 95.7% of people treated for skin cancers began first definitive treatment within 31 days of receiving their diagnosis (96.3% in May 2019)

Two month (62-day) wait from urgent GP referral to first definitive treatment:

- 76.7% of people treated began first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP, all cancers (77.5% in May 2019)

- 88.5% of people treated for breast cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (87.4% in May 2019)
- 68.4% of people treated for lung cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (67.1% in May 2019)
- 64.7% of people treated for lower gastrointestinal cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (69.2% in May 2019)
- 69.1% of people treated for urological cancers (excluding testicular cancer) received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (70.7% in May 2019)
- 95.5% of people treated for skin cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (94.8% in May 2019)

62-day wait extensions

- 81.5% of patients began first definitive treatment within 62 days of a consultant's decision to upgrade their priority, all cancers (83.2% in May 2019)
- 85.1% of people began first definitive treatment for cancer within 62 days of referral from an NHS cancer screening service, all cancers (87.4% in May 2019)

The key results for waiting times for second or subsequent treatment show that, in England, during the period June 2019:

31-day wait for subsequent treatment:

- 91.3% of people began treatment within 31 days where the subsequent treatment was surgery (92.1% in May 2019)
- 99.3% of people began treatment within 31 days where the subsequent treatment was an anti-cancer drug regimen (99.3% in May 2019)
- 96.7% of people began treatment within 31 days where the subsequent treatment was a course of radiotherapy (96.3% in May 2019)

More analyses are published as part of this statistical release on the NHS website.

Annex: Missing and partial returns

Assura East Riding LLP (NYT) and Virgin Care Ltd (NQT) did not make a submission of CWT Data for Two Week Wait From GP Urgent Referral to First Consultant Appointment, One Month Wait from a Decision to Treat to a First Treatment for Cancer, and Two Month Wait from GP Urgent Referral to a First Treatment for Cancer.

George Eliot Hospital NHS Trust (RLT) did not make a submission of CWT Data for Two Week Wait From GP Urgent Referral to First Consultant Appointment, and Two Week Wait Breast Symptomatic (where cancer not initially suspected) From GP Urgent Referral to First Consultant Appointment.

The combined estimated effect on national activity volumes is given in the table below. The estimated impact on national performance is small (for all measures it was less than 0.15 percentage points).

We are working with the providers concerned to resolve the issues and we will be publishing revisions later this year.

Standard	Estimated shortfall in activity
Two Week Wait From GP Urgent Referral to First Consultant Appointment	0.35%
Two Week Wait Breast Symptomatic (where cancer not initially suspected) From GP Urgent Referral to First Consultant Appointment	0.78%
One Month Wait from a Decision to Treat to a First Treatment for Cancer	0.06%
One Month Wait from a Decision to Treat to a Subsequent Treatment for Cancer (Anti-Cancer Drug Regimen)	0.00%
One Month Wait from a Decision to Treat to a Subsequent Treatment for Cancer (Radiotherapy)	0.00%
One Month Wait from a Decision to Treat to a Subsequent Treatment for Cancer (Surgery)	0.00%
Two Month Wait from GP Urgent Referral to a First Treatment for Cancer	0.18%
Two Month Wait from a National Screening Service to a First Treatment for Cancer	0.12%
Two Month Wait Following a Consultant Upgrade to a First Treatment for Cancer	0.00%
