

Cancer Waiting Times, August 2019 – Provider Based – Final

The latest monthly Official Statistics on waiting times for suspected and diagnosed cancer patients accessing NHS services, produced by NHS England and NHS Improvement, were released on 09/01/2020 according to the arrangements approved by the UK Statistics Authority.

Waiting Times for Cancer Services – August 2019

The key results for outpatient services and first definitive treatments show that, in England, during the period August 2019:

Two week wait:

- 89.4% of people were seen by a specialist within two weeks of an urgent GP referral for suspected cancer (90.9% in July 2019)
- 86.0% of people urgently referred for breast symptoms (where cancer was not initially suspected) were seen within two weeks of referral (82.5% in July 2019)

One month (31-day) wait from diagnosis to first definitive treatment:

- 96.1% of people treated began first definitive treatment within 31 days of receiving their diagnosis, all cancers (96.5% in July 2019)
- 97.6% of people treated for breast cancer began first definitive treatment within 31 days of receiving their diagnosis (97.7% in July 2019)
- 97.5% of people treated for lung cancers began first definitive treatment within 31 days of receiving their diagnosis (97.9% in July 2019)
- 96.4% of people treated for lower gastrointestinal cancers began first definitive treatment within 31 days of receiving their diagnosis (97.8% in July 2019)
- 93.1% of people treated for urological cancers began first definitive treatment within 31 days of receiving their diagnosis (93.3% in July 2019)
- 95.5% of people treated for skin cancers began first definitive treatment within 31 days of receiving their diagnosis (95.98% in July 2019)

Two month (62-day) wait from urgent GP referral to first definitive treatment:

- 78.7% of people treated began first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP, all cancers (77.8% in July 2019)

- 89.0% of people treated for breast cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (88.8% in July 2019)
- 65.9% of people treated for lung cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (64.6% in July 2019)
- 67.0% of people treated for lower gastrointestinal cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (71.2% in July 2019)
- 74.4% of people treated for urological cancers (excluding testicular cancer) received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (70.6% in July 2019)
- 94.0% of people treated for skin cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer by their GP (94.1% in July 2019)

62-day wait extensions

- 83.4% of patients began first definitive treatment within 62 days of a consultant's decision to upgrade their priority, all cancers (83.7% in July 2019)
- 87.9% of people began first definitive treatment for cancer within 62 days of referral from an NHS cancer screening service, all cancers (85.8% in July 2019)

The key results for waiting times for second or subsequent treatment show that, in England, during the period August 2019:

31-day wait for subsequent treatment:

- 91.4% of people began treatment within 31 days where the subsequent treatment was surgery (92.3% in July 2019)
- 99.4% of people began treatment within 31 days where the subsequent treatment was an anti-cancer drug regimen (99.2% in July 2019)
- 96.2% of people began treatment within 31 days where the subsequent treatment was a course of radiotherapy (97.2% in July 2019)
