

# COVID-19 Vaccination Statistics

Week ending Sunday 20<sup>th</sup> December 2020

## Overall Vaccination Activity

- NHS vaccinations in England for COVID-19 began on Tuesday the 8<sup>th</sup> December. In the 13 days to Sunday the 20<sup>th</sup> December 521,594 people received an NHS vaccination.
- Priority groups for vaccination in this initial phase were determined by Government following advice from the Joint Committee on Vaccination and Immunisation and were people aged 80 and over as well as care home residents and staff.
- Of the vaccinations provided over this time 366,715 were provided to people aged 80 or over, which is 70.3% of the total vaccinations given.
- As of the 20<sup>th</sup> December all vaccinations received for COVID-19 were 1<sup>st</sup> vaccinations.
- All vaccinations during the week of the 7<sup>th</sup> to 13<sup>th</sup> December were administered in NHS hospital hubs. In the week of 14<sup>th</sup> to 20<sup>th</sup> December vaccinations were also administered through local vaccination services such as GP practices. In total there were 60 hospital hubs and 423 local vaccination sites providing the vaccine over this time period.

## Data:

- All data presented in this report has been collected through the National Immunisation Management Service (NIMS). This data system draws on various local point of care immunisation data systems in near real time, such as those used in hospitals and GP practices. It is the System of Record for the COVID-19 vaccination programme.
- Figures used in this report are as held in the NIMS database as of the 22<sup>nd</sup> December. Note that figures may be updated in future weeks as further information flows from local point of care systems.
