

COVID-19 Vaccination Statistics

Week ending Sunday 27th December 2020

Overall Vaccination Activity

- In the week ending the 27th December a total of 243,039 people received an NHS vaccination for COVID-19 in England. This takes the total since vaccinations began on the 8th of December to 786,000.
- Priority groups for vaccination in this initial phase were determined by Government following advice from the Joint Committee on Vaccination and Immunisation (JCVI) and included care home residents and their carers, frontline health and social care workers and people aged 80 years old and over.
- Of the vaccinations provided over this time, 524,439 were provided to people aged 80 years old or over, which is two-thirds of the total vaccinations given.
- As of the 27th December, all vaccinations received for COVID-19 were 1st vaccinations.
- All vaccinations during the week of the 7th to 13th December were administered in NHS hospital hubs. Between the 14th and 27th December vaccinations were also administered through local vaccination services such as GP practices. In total there were 80 hospital hubs and 542 local vaccination sites providing the vaccine over this time period.

Data:

- All data presented in this report has been collected through the National Immunisation Management Service (NIMS). This data system draws on various local point of care immunisation data systems in near real time, such as those used in hospitals and GP practices. It is the System of Record for the COVID-19 vaccination programme.
- Figures used in this report are as held in the NIMS database as of the 29th December. Note that figures may be updated in future weeks as further information flows from local point of care systems.
