

# COVID-19 Vaccination Statistics

Week ending Sunday 10<sup>th</sup> January 2021

## Overall Vaccination Activity

- In the week ending the 10<sup>th</sup> January an additional 1,212,716 people received an NHS vaccination for COVID-19 in England. This took the total number of people vaccinated since vaccinations began on 8<sup>th</sup> of December to 1,997,304 and the total vaccinations given to 2,371,407.
- Priority groups for vaccination in this initial phase were determined by Government following advice from the Joint Committee on Vaccination and Immunisation (JCVI) and included care home residents and their carers, people aged 80 years old and over and frontline health and social care workers.
- Of the vaccinations provided over this time, 1,329,480 were provided to people aged 80 years old or over, which is 56% of the total vaccinations given.
- Until the 29<sup>th</sup> December, all vaccinations received for COVID-19 were 1<sup>st</sup> vaccinations. Between the 29<sup>th</sup> December and 10<sup>th</sup> January, 374,103 2<sup>nd</sup> vaccinations were given.
- All vaccinations during the week of the 7<sup>th</sup> to 13<sup>th</sup> December were administered in NHS hospital hubs. Between the 14<sup>th</sup> December and 10<sup>th</sup> January vaccinations were also administered through local vaccination services such as GP practices. In total there were 207 hospital hubs and 788 local vaccination sites providing the vaccine over this time period.

## Data:

- All data presented in this report has been collected through the National Immunisation Management Service (NIMS). This data system draws on various local point of care immunisation data systems in near real time, such as those used in hospitals and GP practices. It is the System of Record for the COVID-19 vaccination programme.

- Figures used in this report are as held in the NIMS database as of the 12<sup>th</sup> January 2021. Note that figures may be updated in future weeks as further information flows from local point of care systems.
- Regional data are provided as raw total counts. Fair shares geographical allocation of the vaccine will ensure that between now and mid-February everyone in the four highest priority groups, independently set by the JCVI, can be offered the first vaccine dose.
