

COVID-19 Vaccination Statistics

Week ending Sunday 7th February 2021

Overall Vaccination Activity

- In the week ending the 7th February an additional 2,423,421 people were reported to have received an NHS vaccination for COVID-19 in England. This took the total number of people vaccinated since vaccinations began on 8th of December to 10,523,774.
- By 7th February, 469,159 2nd doses had also been given, taking the total number of vaccinations to 10,992,933.
- Priority groups for vaccination in this initial phase were determined by Government following advice from the Joint Committee on Vaccination and Immunisation (JCVI) and included care home residents and their carers, people aged 80 years old and over, and frontline health and social care workers.
- Of the vaccinations provided over this time, 2,926,728 were provided to people aged 80 years old or over, which is 27% of the total vaccinations given.
- All vaccinations during the week of the 7th to 13th December were administered in NHS hospital hubs. Between the 14th December and 7th February vaccinations were also administered through local vaccination services such as GP practices. Vaccination Centres such as sports stadiums also started providing vaccinations from the 11th January. In total there were 267 hospital hubs, 1,034 local vaccination sites, 194 community pharmacies and 90 Vaccination Centres providing the vaccine over this time period.

Data:

- All data presented in this report has been collected through the National Immunisation Management Service (NIMS) unless otherwise specified. This data system draws on various local point of care immunisation data systems in near real time, such as those used in hospitals and GP practices. It is the System of Record for the COVID-19 vaccination programme.

- Figures used in this report are as held in the NIMS database as of the 9th February 2021. Note that figures may be updated in future weeks as further information flows from local point of care systems.
- Regional and ICS / STP data are provided as raw total counts. Fair shares geographical allocation of the vaccine will ensure that between now and mid-February everyone in the four highest priority groups, independently set by the JCVI, can be offered the first vaccine dose.
- Where population denominators are provided they are based on mid-year 2019 Office for National Statistics estimates, which are the most recent available at time of publication. Where necessary these populations have been mapped from small area (Lower Super Output Area) to NHS geographies by age band to estimate resident populations.
- Data on vaccinations of residents of older adult care homes and care homes visited have been provided by the Department of Health and Social Care, and as held in the Capacity Tracker on the 7th February 11:59pm.
