

COVID-19 Vaccination Statistics

Week ending Sunday 14th February 2021

Overall Vaccination Activity

- In the week ending the 14th February an additional 2,320,419 people were reported to have received an NHS vaccination for COVID-19 in England. This took the total number of people vaccinated since vaccinations began on 8th of December to 12,844,193.
- By 14th February, 487,697 2nd doses had also been given, taking the total number of vaccinations to 13,331,890.
- Priority groups for vaccination in this initial phase were determined by Government following advice from the Joint Committee on Vaccination and Immunisation (JCVI) and included care home residents and their carers, people aged 70 years old and over, and frontline health and social care workers. It also includes people who are identified as being clinically extremely vulnerable to COVID-19.
- Of the vaccinations provided over this time, 2,990,480 were provided to people aged 80 years old or over, which is 22% of the total vaccinations given.
- All vaccinations during the week of the 7th to 13th December were administered in NHS hospital hubs. Between the 14th December and 14th February vaccinations were also administered through local vaccination services such as GP practices. Vaccination Centres such as sports stadiums also started providing vaccinations from the 11th January. In total there were 267 hospital hubs, 1,034 local vaccination sites, 194 community pharmacies and 102 Vaccination Centres providing the vaccine over this time period.

Data:

- All data presented in this report has been collected through the National Immunisation Management Service (NIMS) unless otherwise specified. This data system draws on various local point of care immunisation data systems in near real time, such as those used in hospitals and GP practices. It is the System of Record for the COVID-19 vaccination programme.

- Figures used in this report are as held in the NIMS database as of the 16th February 2021. Note that figures may be updated in future weeks as further information flows from local point of care systems.
- Regional, ICS / STP and CCG data are provided as raw total counts by area of residence.
- Where population estimates are provided for reference, they are based on mid-year 2019 Office for National Statistics estimates, which are the most recent available at time of publication. Where necessary these populations have been mapped from small area (Lower Super Output Area) to NHS geographies by age band to estimate resident populations.
- Data on vaccinations of residents of older adult care homes and social care workers, and of care homes visited have been provided by the Department of Health and Social Care, and as held in the Capacity Tracker on the 14th February 11:59pm.
