

## Integrated Urgent Care, England Aggregate Data Collection, June 2022

This publication provides a summary of Integrated Urgent Care Services in England during June 2022. The Integrated Urgent Care Aggregate Data Collection (IUC ADC)<sup>1</sup> covers the whole of integrated urgent care services. Underlying data and further details about the IUC ADC are [here](#).

Figures replace those in the provisional June IUC ADC published last month.

### Key Facts<sup>2,3</sup>

In June 2022 in England:

- 1,900,550 calls were received by NHS 111, an average of 63.4 thousand per day. This is an increase of 7.3 thousand calls per day compared to the previous month, which was 56.1 thousand calls per day. In June 2021 the figure was 64.5 thousand per day.
- 15.9% of calls were abandoned after call steering IVR; this includes 13.8% abandoned after waiting more than 30 seconds. In May 2022, 9.9% of calls were abandoned after call steering IVR; this includes 8.6% abandoned after waiting more than 30 seconds.
- The average time to call answer was 380 seconds and 47.1% of calls were answered within 60 seconds. This compares with 226 seconds and 59.4% of calls in May 2022. In June 2021 calls answered within 60 seconds was 51.4%.
- Callers spoke to a clinician or clinical advisor in 46.4% of triaged calls. This is a decrease of 0.2 percentage points from 46.6% the previous month. In June 2021 the figure was 49.0%.
- 10.3% of triaged calls were referred to the Ambulance service, which was a decrease from 10.6% in May 2022. In June 2021, 11.3% of triaged calls were referred to the Ambulance service.
- 11.4% of triaged calls were recommended to attend an Emergency Treatment Centre (ETC), which is a decrease of 0.8 percentage points from 12.2% in May 2022. In June 2021 the figure was 12.1%.
- 17.5% of callers were recommended self-care after being assessed by a clinician or clinical advisor. This was also the figure in May 2022.

### Scope

The IUC ADC monitors the effectiveness of integrated urgent care services<sup>4</sup> commissioned by the NHS in England through the NHS 111 single entry point. IUC is the provision of a functionally integrated 24/7 urgent care access, clinical advice and treatment service (incorporating NHS 111, Clinical Assessment Services and out of hours services). IUC is provided by a variety of organisations, including ambulance services, private companies, not for profit organisations and NHS Trusts. The IUC ADC covers end to end IUC services, excluding NHS 111 Online contacts, unless otherwise stated.

### Data Quality

Data for the IUC ADC are provided by lead data providers for each integrated urgent care service in England. It is the responsibility of commissioners of IUC services to identify lead data suppliers and ensure that data are provided each month. While lead data suppliers are responsible for collating and coordinating information for the IUC ADC, they are not necessarily contracted to deliver all NHS 111 and out of hours services in the contract area. The quality of data in this report is therefore dependent upon all parts of the IUC service providing data to the relevant lead data supplier. Where figures reflect activity by more than one IUC service provider, there may be wide variation in the underlying performance of individual parts of the service.

Details of comments received from lead data suppliers about specific aspects of data quality can be found [here](#). This includes details about missing or incomplete data; we recommend that this information is considered when interpreting figures.

### Contacts

For press enquiries, please contact the NHS England press office on 0113 825 0958 or [nhsengland.media@nhs.net](mailto:nhsengland.media@nhs.net).

### Footnotes

<sup>1</sup> From April 2022, some data items in the IUC ADC have been revised and not all data items are directly comparable with data collected previously. Users are advised to refer to the specification guidance for each collection when interpreting figures. Underlying data and further details about the IUC ADC are [here](#).

<sup>2</sup> When comparing with previous months' figures, please be aware that call volumes will be affected by the number of days in the month, the number of public holidays and the number of weekend days.

<sup>3</sup> The number of calls received may not reflect total demand for NHS 111 services at a given time. This is because calls received are affected by the national busy message which is routinely turned on during periods of high caller demand (and was almost permanently turned on since June 2021). The busy message causes around 10% of callers to hang up before their call is delivered to a provider. These calls are not included as calls received in the IUC ADC.

<sup>4</sup> Integrated Urgent Care Services are described in detail in the [IUC service specification](#).
