

IUC ADC February 2023 - comments from lead data suppliers

Data for the IUC ADC are provided by lead data providers for each integrated urgent care service in England. It is the responsibility of commissioners of an IUC service to identify lead data providers and ensure that data are supplied each month. While lead data suppliers are responsible for collating and coordinating information for IUC ADC, they are not necessarily contracted to deliver all NHS 111 and out of hours services in the contract area. Integrated Urgent Care is provided by a variety of organisations, including ambulance services, private companies, not for profit organisations and NHS Trusts.

The quality of data is therefore dependent upon all parts of the IUC service supplying data to the relevant lead data provider. Where figures reflect activity by more than one IUC service provider, there may be wide variation in the underlying performance of individual parts of the service.

This document sets out lead data suppliers' comments where they have been provided about the quality of data returns, reasons for changes since previous months and reasons for differences to provisional data items published last month.

BRISDOC

Comments for 111A15 Bristol, North Somerset & South Gloucestershire

Data item	Description	Comments
A01	Number of calls received	Demand increased during February compared to the previous month, with an additional 50 calls received per weekday and 30 per others.
B01 to B11	Call handling	CAS data not included as unavailable.
D11	Calls with clinician or Clinical Advisor input into the assessment but where the clinician hasn't spoken to the caller	Data currently unavailable.
E19-E30	Number of calls initially given a category 3 or 4 ambulance disposition & Number of calls initially given an ETC disposition	PPG, as NHS111 provider, run bespoke processes for ED and 999 validations data which typically result in higher validation rates than can be captured via ADC; for Feb-23, KPI 7 is 81.2%; KPI 8 is 74.0%.
F02	Directory of Services: no service available other than ED (ED catch-all)	Zero cases - ED catch-all only triggers in exceptional circumstances
G01 to G14	Caller given an appointment	Figures exclude CAS activity as they are unavailable.

G05	Number of calls where the caller was booked into an IUC Treatment Centre	Very few bookings for IUC treatment centres are made directly from 111 (ie not CAS); the vast majority of bookings are via CAS, which are not captured. This will occasionally be zero.
G07	Number of calls where the caller was booked into a UTC	DoS profile for UTC in BNSSG results in increased UTC selections, but not bookings.
G09	Number of calls where caller given a booked time slot with a Type 1 or 2 ED	Direct bookings to ED 1&2 are disabled. Values seen are for UTCs and out-of-region ED services only. Bookings made by CAS are not available to our data capturing process.
G10, G11	DoS selections – SDEC service	SDEC is not being used at all within the contract area.
G16 to G19	Community pharmacy service	Figures exclude CAS activity as they are unavailable.
H01 to H09	NHS 111 Online contacts	CAS data not included as not available.

DEVON DOCS

Comments for 111AH8 Somerset

Data Items	Description	Comments
B01	Calls answered within 60 seconds	Performance impacted by call handling capacity which was really challenged for both providers in February.
B02	Number of calls abandoned	
B07	95th centile call answer time	
D01	Calls assessed by a clinician or Clinical Advisor	
G01	IUC recommendations and callers given appointment	G01 does not aggregate to the sum of G03, G05, G07, G09, G11, G13 and G14 because the 2022/23 ADC specification changes to those items have not yet been implemented.
G10, G11	SDEC service bookings	We currently do not have or book into a SDEC service.

DHU

Comments for 111AJ8 Derbyshire (DHU)

Data item	Description	Comments
A04	Calls transferred from the 999 Ambulance Service	Not applicable to service.
B01	Calls answered within 60 seconds	

B02	Number of calls abandoned	Performance affected by an increase in call volumes above forecast, possibly caused by increase in National Contingency picked up by DHU.
B07	95th centile call answer time	
D01	Calls assessed by a clinician or Clinical Advisor	Disparity with provisional figures can be explained by the timing of the weekly load. If a case that has yet to be closed as of Sunday 23:59:59 and has subsequent clinical input on the Monday, then this will not be captured within the IUC ADC weekly submission values. The clinical input aspect will not have been loaded into our database at the start of the week. However, this would be captured in the monthly submission when data is reloaded.
D12	NLP calls that resulted in the caller speaking to a clinician or Clinical Advisor	Not applicable to service.
G05	Number of calls where the caller was booked into an IUC Treatment Centre	The low KPI outcome is because cases are sent to GP OOH services that are out of area for which no bookings were made.
G11	SDEC service bookings	No activity.
G12, G13	Calls received by dental services	Not applicable to service.
G16 to G19	Community pharmacy service	

Comments for 111AK7 Leicestershire and Rutland (DHU)

Data item	Description	Comments
A04	Calls transferred from the 999 Ambulance Service	Null - not applicable to our service.
B01	Calls answered within 60 seconds	Performance affected by an increase in call volumes above forecast, possibly caused by increase in National Contingency picked up by DHU.
B02	Number of calls abandoned	
B07	95th centile call answer time	
D12	NLP calls that resulted in the caller speaking to a clinician or Clinical Advisor	Null – not applicable to our service.
G10, G11	SDEC service bookings	None recorded this month.
G12, G13	Calls received by dental services	Null - not applicable to our service.
G16 to G19	Community pharmacy service	

Comments for 111AK6 Lincolnshire

Data item	Description	Comments
A04	Calls transferred from the 999 Ambulance Service	Null - not applicable to our service.
B01	Number of calls answered within 60 seconds	

B02	Number of calls abandoned	Performance affected by an increase in call volumes above forecast, possibly caused by increase in National Contingency picked up by DHU.
B07	95th centile call answer time	
C01	Number of calls where person triaged	
D01	Calls assessed by a clinician or Clinical Advisor	Decrease in performance is due to the volume of calls received which was higher than forecasted volumes.
D12	NLP calls that resulted in the caller speaking to a clinician or Clinical Advisor	Null – not applicable to our service.
D23	Number of callers who needed to speak to a clinician or Clinical Advisor within a timeframe over 20 minutes, who were warm transferred or received a call back within the specified timeframe	Performance impacted by staffing during the winter period.
E17	Number of callers recommended self-care at the end of clinical input	There were instances where the clinical staff were understaffed and volumes increased.
E27	Calls initially given an ETC disposition that are validated	Figures are under-reported. DHU do not provide an ED validation services for Lincs and do not have access to this data.
G05	Number of calls where the caller was booked into an IUC Treatment Centre	The low value is because cases are sent to GP OOH services that are out of area for which no bookings were made.
G11	SDEC service bookings	CAS colleagues are unable to book patients into SDEC.
G12, G13	Calls received by dental services	Not applicable to service.
G16 to G19	Community pharmacy service	

Comments for 111AC7 Milton Keynes

Comments for 111AH4 Mid & South Essex

Data item	Description	Comments
A04	Calls transferred from the 999 Ambulance Service into NHS 111	These items are currently not available, due development or not applicable.
A05	External clinician calls to Clinical Assessment Service (CAS)	
B01	Calls answered within 60 seconds	Lowest call performances are at weekends in February, with the peak period of demand driving down this metric.
B07, B08	Call answer centiles	Due to the way that our calls are currently aggregated, centile figures may be inaccurate. We have not yet been able to provide a more granular measurement for centile call time.
D11	Calls with clinician or Clinical Advisor input into the assessment but where the clinician hasn't spoken to the caller	These items are currently not available, due development or not applicable.
D12	Natural Language Processing (NLP) calls that resulted in the caller speaking to a clinician or Clinical Advisor	
D21	95th centile time to clinical assessment for callers requiring assessment within 20 minutes (immediately)	Due to the way that our calls are currently aggregated, centile figures may be inaccurate.
D23	Number of callers who needed to speak to a clinician or Clinical Advisor within a timeframe over 20 minutes, who were warm transferred or received a call back within the specified timeframe	The number of clinicians able to speak in 20 minutes was stable (only increased by 1) but the demand doubled (156% increase).
E17	Number of callers recommended self-care at the end of clinical input	It is likely that we are under-reporting self-care advice when clinicians have advised home management in the consult notes but have not correctly changed the call to a self-care disposition.
E21	Number of calls initially given a category 3 or 4 ambulance disposition that are validated within 30 minutes	Performance affected by clinical capacity following a change in the 111 clinician process.
G03	Number of calls where the caller was booked into a GP Practice or GP access hub	Although this has stabilised over recent months there are not enough bookable appointments across GP and GP hub for patients with the relevant disposition code.
G10, G11	SDEC service bookings	The booking system is not utilised as often as DoS option is being presented. There is ongoing discussion around

		hydrating the SG/SD codes to present more often at clinical CAS endpoints via PaCCs to enable the clinicians to select the EDDI DAB slots.
G12, G13	Calls received by dental services not using DoS	These items are currently not available, due development or not applicable.
G23	Number of patients receiving a face to face consultation in an IUC Treatment Centre within the timeframe agreed	Affected by staffing and rota fill.
H17	NHS 111 Online contacts initially given an ETC disposition which the patient has agreed to clinical contact and provided the necessary information for a callback	These items are currently not available, due development or not applicable.
H18	NHS 111 Online contacts initially given an ETC disposition that are validated	

Comments for 111AG8 Norfolk including Great Yarmouth and Waveney

Data item	Description	Comments
A01	Number of calls received	Historically, demand has dropped in February compared to December and January, following bank holidays and seasonal illnesses. However, 2023 has not seen the expected drop in call volumes. Performance affected by call handler availability at weekends.
A03	Number of answered calls	
A04	Calls transferred from the 999 Ambulance Service into NHS 111	These items are currently not available, due development or not applicable.
A05	External clinician calls to Clinical Assessment Service (CAS)	
B01	Number of calls answered within 60 seconds	Performance affected by call handler availability at weekends.
B07, B08	Call answer centiles	Due to the way that our calls are currently aggregated, centile figures may be inaccurate.
C01	Number of calls where person triaged	Performance affected by call handler availability at weekends.
D11	Calls with clinician or Clinical Advisor input into the assessment but where the clinician hasn't spoken to the caller	These items are currently not available, due development or not applicable.
D12	Natural Language Processing (NLP) calls that resulted in the caller speaking to a clinician or Clinical Advisor	

D21	95th centile time to clinical assessment for callers requiring assessment within 20 minutes (immediately)	Due to the way that our calls are currently aggregated, centile figures may be inaccurate.
G03	Number of calls where the caller was booked into a GP Practice or GP access hub	There are not enough bookable appointments across GP and GP hub for patients with the relevant disposition code.
G11	SDEC service bookings	SDEC is not used on the DoS much; SDEC booking is done by phone not booking system. Numbers will remain low until SDEC services pick up and are profiled on the DoS. There is ongoing discussion around hydrating the SG/SD codes to present more often at clinical CAS endpoints via PaCCs to enable the clinicians to select the EDDI DAB slots which will improve reporting.
G12, G13	Number of calls received by dental services not using DoS	These items are currently not available, due development or not applicable.
H17	Number of NHS 111 Online contacts initially given an ETC disposition which the patient has agreed to clinical contact and provided the necessary information for a call back	
H18	Number of NHS 111 Online contacts initially given an ETC disposition that are validated	

IOW

Comments for 111AA6 Isle of Wight

Outcomes of calls forwarded to remote Clinical Assessment Services (DAS, PHL and MHA) are currently not included in the ADC submission.

Data item	Description	Comments
A01	Number of calls received	Includes around 20-30 calls a month which are received/answered from other NHS 111 providers.
A07	Calls which originated from an external NHS 111 provider	A07 is excluded from our submission as this total (around 20-30 calls a month) is already included in A01.
B01	Calls answered within 60 seconds	Poorer performance this month due to staff sickness and attrition.
B02	Number of calls abandoned	
C01	Number of calls where person triaged	C01 exceeds the sum of A03+A04+A07 due to some paramedics calling through on the wrong line so not counting in the correct (telephony) figures but are still being added as a 111 case entry.

D01	Calls assessed by a clinician or Clinical Advisor	Clinical capacity impacted by sickness, maternity and vacancies within a small team.
E17	Callers recommended self-care at the end of clinical input	Calls forwarded to our remote Clinical Assessment Services (CAS) not included.
E26, E27	Calls initially given an ETC disposition that are validated	We are only validating a small number of SG / SD's as our UTC is profiled to take a vast proportion (approx. 60%) of ED dispositions, therefore negating the need for a '111 First (or 'ED') 'validation'. If we were to record only the calls that would have been referred to an ED, we would be reporting a far higher performance figure, but this metric includes all dispositions regardless of if the call is referred to a more appropriate service before ED.
F01 to F03	Directory of Services	Figures provided have been extracted from the Pathways Intelligent Data Toolkit this month as SSRS reporting is not available following the Adastra outage. This data includes a small number of '111 Online' cases which cannot be excluded within the portal or automatically from the downloaded dataset.
G01 to G10	Callers given appointments and booking types	At this time, we do not book appointments into several services. For example, almost 2/3 of our ETC dispositions are referred to services other than ETC (UTC / IUC etc) where we do not currently book appointments. In addition, high volumes of out of area calls reduces the opportunity to book appointments.
G05	Calls where the caller was booked into an IUC Treatment Centre	At this time our 111 service is not able to book directly into our own IUC or any other IUC services elsewhere, although in some months one or two bookings may come through.
G10, G11	SDEC service bookings	SDEC opened in the last month for telephony referrals and we only have a draft SOP so still not embedded. It was a PACCs clinician only Dx code when it was first introduced and we rarely have a SP on the desk.
G16-G19	Prescription & pharmacy services	IOW are now using DoS service data downloaded from the 'Pathways Intelligent Data Tool' to calculate G16, G17, G18 and G19 (independently of SSRS). We are now able to exclude '111 Online cases' by cross reference to our IUC ADC case lists.
G20 to G23	Face to face consultations	This section of reporting is still being developed.

LAS

Comments for 111AH5 North East London

Data item	Description	Comments
G11	Calls where the caller was booked into an SDEC service	No bookable appointments recorded.

G13	Calls received by dental services not using DoS that resulted in a booked appointment	This is appointment data from SMILE.
-----	---	--------------------------------------

Comments for 111AJ1 North West London

Data item	Description	Comments
G11	Calls where the caller was booked into an SDEC service	No bookable appointments recorded usually.
G20, G21	Number of patients receiving a face to face consultation in their home residence within the timeframe agreed	LCW unable to provide this figure.
G22, G23	Number of patients receiving a face to face consultation in an IUC Treatment Centre within the timeframe agreed	Not applicable to the service.

Comments for 111AD7 South East London

Data item	Description	Comments
D14	Number of callers who needed to speak to a clinician or Clinical Advisor within 20 minutes (immediately), who were warm transferred or received a call back within 20 minutes	Decrease since last month reflects a change in how we calculate figures. Previously we were using the priorities used to manage the queue at LAS, this months' figures include the Dx codes as per the ADC specification.
G11	Calls where the caller was booked into an SDEC service	No bookable appointments recorded.
G13	Number of calls received by dental services not using DoS that resulted in a booked appointment	This is appointment data from SMILE.

LCW

Comments for 11AD5 North Central London

The IUC ADC Reporting Suite in Adastra has not been updated to match the 2022/23 IUC ADC specification, therefore some data items are based on 2021/22 definitions.

Data item	Description	Comments
A01	Number of calls received	SVCC continued to be switched off in February. Activity has increased against forecast and on previous months. National resilience was in place on 20/02/2023.

A02	Calls routed through IVR	We are not using any IVRs.
A03	Number of answered calls	Performance affected by high levels of staff shrinkage due to sickness, annual leave and shortfall in recruitment of Health Advisors. Disparity with provisional figures is due to errors made when submitting the weekly data. Monthly is correct.
A07	Calls which originated from an external NHS 111 provider	Not available in the current suite of reports we run from Adastra. Figure estimated as 2,784.
B01	Number of calls answered within 60 seconds	Performance affected by high levels of staff shrinkage due to sickness, annual leave and shortfall in recruitment of Health Advisors. Disparity with provisional figures is due to errors made when submitting the weekly data. Monthly is correct.
B02	Number of calls abandoned	
B06, B07	Time to call answer	Disparity with provisional figures is due to errors made when submitting the weekly data. Monthly is correct.
C01	Number of calls where person triaged	The logic for C01 has not been updated to meet the updated definitions. C01 figure is higher than sum of A03, A04 & A07, possibly due to us estimating A07.
D04	Calls assessed by a mental health nurse	Not applicable.
D07	Calls assessed by a dental nurse	
D10	Number of calls assessed by a clinician or Clinical Advisor that were warm transferred	Figure is lower than expected.
D12	Natural Language Processing (NLP) calls that resulted in the caller speaking to a clinician or Clinical Advisor	Not applicable for our service.
D20 to D26	Clinical assessment	Not available in the current suite of reports we run from Adastra.
E05	Number of callers recommended to attend Same Day Emergency Care (SDEC)	Figures are low due to restrictive criteria for referral into the service.
E20 to E25	Calls initially given a category 3 or 4 ambulance disposition	Items missing aggregated data due to loss of data feed.
E21	Number of calls initially given a category 3 or 4 ambulance disposition that are validated within 30 minutes	All London region ambulance validation is carried out by LAS. We are trying to re-establish the data feed to submit the complete data set.
E27 to E31	Calls initially given an ETC disposition	The validation figures are lower than actual due to the cases being transferred via the DoS for validation, using final Dx codes and not the interim validation codes for ED validations.

G10, G11	Calls where the caller was booked into an SDEC service	Figures are low due to restrictive criteria for referral into the service. G11 is blank because there are no booked appointments available for those services via the DoS.
G12 to G13	Calls received by dental services not using DoS	N/A as we are not a dental service.
G18-G19	Number of calls where a community pharmacy service was an option on DoS for minor illness	Missing data.
H11 to H12	NHS 111 Online contacts that resulted in DoS selections for SDEC	SDEC services in the area do not offer appointments via the DoS.
H13 to H16	NHS 111 Online contacts that resulted in patient requiring/receiving a face to face consultation within the timeframe agreed	The ADC reporting suite is reporting the outcome after a call back which is not what these data items are collating. Also, H13-H14 are in further investigation as they show the same issue as H15-H16.
H17 to H18	NHS 111 Online contacts initially given an ETC disposition	This data item is lower than expected due to a case type mapping issue.

MEDVIVO

Comments for 111AJ2 BaNES, Swindon & Wiltshire

Data item	Description	Comments	
A01	Number of calls received	Performance impacted by DHU mobilising a new 111 contract in the West Midlands in February. While BSW activity was reduced in February, overall 111 activity for DHU increased. Disparity with provisional data due to a reporting data flow outage one weekend by our 111 partner which resulted in missing data in the weekly report. Monthly figures are correct.	
A03	Number of answered calls		
B01	Number of calls answered within 60 seconds		
B02	Number of calls abandoned		
B06, B07	Time to call answer		
C01	Number of calls where person triaged		
D01	Calls assessed by a clinician or Clinical Advisor		
G11	Calls where the caller was booked into an SDEC service		BSW IUC do not yet book appointments into the SDEC service.

ML CSU (North West including Blackpool)

Comments for 111AJ3 North West including Blackpool

The North West does not have a single integrated contract covering both NHS111 and CAS; NWS is the NHS 111 provider but its CAS role is limited to validation work undertaken within the 999 service. CAS provision is by a range of providers (predominantly OOH providers) who either initially provided CAS or through being specifically commissioned by CCGs to provide CAS either as a standalone contract or as part of a

wider UEC/urgent primary care contract. Given the complex picture of providers in the North West, there is an iterative transition from the submission of NWAS data only in April 2021 to MLCSU submitting data covering all service providers. This month, data includes submissions from NWAS and 7 of the 14 CAS/OOH service providers. Even when CAS providers supply some figures, not all data items can be reported at the granularity required.

Data item	Description	Comments
B01	Number of calls answered within 60 seconds	Performance affected by recruitment, staff retention and sickness absence, all of which remain our biggest challenge.
B06	Total time to call answer	
B07	95th centile call answer time (weekly minimum)	
C01	Number of calls where person triaged	
D01	Calls assessed by a clinician or Clinical Advisor	Disparity with provisional figures is because different providers submit monthly and weekly returns.
D02 to D09	Calls assessed by staff type	Not all CAS/OOH providers can accurately split out 'Calls assessed by a clinician or Clinical Advisor ' into the sublines.
D24, D25	Time to clinical assessment for callers requiring assessment within a timeframe over 20 minutes	Data not available to calculate the average and 95th percentile for these from provider submissions.
E01 to E30	Calls with Clinical Input, IUC Recommendations (Dispositions) and Validation of Dispositions	Figures exclude data from some service providers.
E01	Total number of dispositions	Exceeds number of calls where person triaged (C01) due to double-counting calls reported by NWAS and the other providers. C01 = NWAS only. E01 = NWAS plus CAS providers.
E25	Total wait time to category 3 or 4 ambulance validation (seconds)	CAS providers are unable to provide data for E25.
G01	Number of calls where caller given an appointment	Numbers do not match the sum of parts due to G01 only being collected for 111 service (NWAS) and the others being collected from 111 and CAS services.
G10, G11	SDEC Service	Only NWAS report G10, ALL providers are asked to complete G11 (where relevant).
G03, G05, G07, G09	IUC Service Integration	Figures exclude data from some service providers.
G14	Calls where caller given any other appointment	
H01, H02, H04, H13 to H18	NHS 111 Online Contacts	

NEAS

Comments for 111AA1 North East

Figures exclude outcome/call performance for sub-contracted providers (GatDoc, VoCare & Elm) and initial telephony/triage data for DCAS in Cumbria.

Data item	Description	Comments
A04	Calls transferred from the 999 Ambulance Service	We operate a combined system of both 111 and 999; calls will not be transferred from 999 into 111.
A06	Unscheduled IUC Attendances	This information is outside of our service.
A07	Calls which originated from an external NHS 111 provider	We are unable to separately identify calls that are transferred from another 111 provider in SystemOne.
B02	Number of calls abandoned	Performance continues to improve in line with the increased capacity following HA recruitment in February.
B06, B07	Time to call answer	
B09	Total time of abandoned calls	
D01 to D09	Calls assessed by a clinician or Clinical Advisor	Items are under-reported at system level with clinical assessment not captured for primary care, OOH or UTCs. While the clinical count [D01] includes clinical contacts from system providers who have been sub-contracted either by NEAS or commissioners, due to some of the clinical contacts being performed outside of NEAS we do not have access to the specific role of the clinician who performed the contact. Therefore [D01] includes these instances but the sum of the fields [D02]-[D09] will not equal this total.
D11	Calls with clinician or clinical advisor input into the assessment but where the clinician has not spoken to the caller	We do not presently have the system capability to extract instances where this has occurred.
D12	Natural Language Processing (NLP) calls that resulted in the caller speaking to a clinician or Clinical Advisor	
D26	Number of calls assessed by a clinician or Clinical Advisor by video consultation	We cannot currently provide this information.

E21	Number of calls initially given a category 3 or 4 ambulance disposition that are validated within 30 minutes	This has previously been impacted by our Hear & Advise policy, although changes to recent process will have a positive impact on this measure.
E26	Calls given an ETC disposition	NHS 111 Online cases booked in CAD are included in this figure as we are currently unable to separate them. These cases do not receive a re-validation (E27) as they are passed by clinician for a booking.
E27	Calls given an ETC disposition that are validated	As part of Clinical Safety Plan, the ETC DoS profile is suspended during periods of surge.
G11	Bookings into an SDEC service	Currently not utilised – no bookings or selections recorded.
G12, G13	Bookings into dental services not using DoS	We do not have the system capability to provide this information.
G22, G23	Face to face consultations in an IUC Treatment Centre	Not reported - this information is outside of our service.

NECS

Comments for 111A17 Yorkshire and Humber (NECS)

Data for GP OOH providers includes: 8GY92-LCD, NNF - City Healthcare Partnership CIC, Y01173-Sheffield GP Collaborative, RCD-Harrogate & District, i-Heart - Y05222, NL3-CARE PLUS, NXL01 – FCMS, RJL - Northern Lincolnshire and Goole NHS Foundation Trust, and NNJ-DHU Bassetlaw OOH & RFR Rotherham GPOOH.

Data item	Description	Comments
B01	Number of calls answered within 60 seconds	Performance affected by an increase in demand which followed a similar pattern to the previous 2 years, and recruitment of new staff. Our average handling time has increased and our staff in not ready reason codes have increased due to higher after call work and more experienced staff helping new starters.
B06, B07	Time to call answer	
C01	Number of calls where person triaged	C01 does not equal the sum of items C02, C03, C04, C05 & C06 due to staff changes during the month which aren't always updated on the system in time.
D23	Callers who needed to speak to a clinician or Clinical Advisor within a timeframe over 20 minutes, who were warm transferred or received a call back within the specified timeframe	Reporting still being developed.

E18	Number of callers recommended other outcome	Disparity with provisional figures is because DHU figures are included in the weekly ADC report but haven't been added into monthly figures.
G05	Number of calls where the caller was booked into an IUC Treatment Centre	Figures provided reflect a problem with the booking system. Volumes recommended to attend an IUC treatment centre are similar to figures to pre Adastra outage but due to the issues with direct booking this figure has dropped considerably.
G10, G11	SDEC selections	These figures will remain at low levels or zero until the next Pathways update when some more options to refer to SDEC are made available.
G15	Repeat prescription medication issued	Includes number of cases requesting a repeat script which was then issued by LCD ADC GPOOH (which are not included in E14).
G16, G18	Calls where a community pharmacy service was an option on DoS for repeat prescription medication / minor illness	YAS cannot currently provide these items due to data on DoS options available for each call not being available through Adastra.

Comments for 1111AK5 West Midlands

Data item	Description	Comments
A06	Unscheduled IUC attendances	Data items not applicable at this time.
D10	Calls assessed by a clinician or Clinical Advisor that were warm transferred	WMAS is not currently doing warm transfers
D12	NLP calls that resulted in the caller speaking to a clinician or Clinical Advisor	Data item not applicable at this time.
D14	Number of callers who needed to speak to a clinician or Clinical Advisor within 20 minutes (immediately), who were warm transferred or received a call back within 20 minutes	Ambulance validations have a local validation target of 30 minutes.
E21	Number of calls initially given a category 3 or 4 ambulance disposition that are validated within 30 minutes	We validate a high volume of calls with a senior clinical review to enable better outcomes. This means clinical supervisors review every case as they present in the queue to flag any potential risks.
G01	Calls where callers given an appointment	We can only book appointments into two out of our six OoHs providers.

G05	Number of calls where the caller was booked into an IUC Treatment Centre	Appointment utilisation is impacted upon by the availability of appointments within the triage disposition timeframe. Often, available appointments are after the window for attendance.
G11, G10	Callers booked into an SDEC service	We rarely have SDEC cases and, if so, the numbers tend to be very small.
G12, G13	Calls received by Dental services	Data items not applicable at this time.
G15	Calls where repeat prescription medication was issued within your service	This item is currently missing.
G20 to G23	Face to face consultations	Data not available currently.
H13 to H16	NHS 111 Online contacts	

PRACTICE PLUS GROUP (PPG)

Comments for 111AL2 Devon (PPG)

Vocare data omitted from centile and average metrics as data is received by PPG in aggregated format.

Data item	Description	Comments
A03	Number of answered calls	Performance in Feb affected: <ul style="list-style-type: none"> - Higher than expected staff sickness - Increasing Health Advisor and Clinical Advisor capacity - Increase in national contingency.
B01	Calls answered within 60 seconds	
B02	Number of calls abandoned	
B06, B07	Time to call answer	
C01	Number of calls where person triaged	
D01	Calls assessed by a clinician or Clinical Advisor	
D23	Number of callers who needed to speak to a clinician or Clinical Advisor within a timeframe over 20 minutes, who were warm transferred or received a call back within the specified timeframe	All cases that enter our clinical queue are risk assessed by a clinician within 10 minutes & upgraded to a higher priority if required. Safety calls are also made whilst waiting for clinical call backs to check for any worsening or change of symptoms in our patients.
E17	Callers recommended self-care at the end of clinical input	Performance affected by acuity of patients within clinical queue higher than expected and lack of access to primary care.
E27	Number of calls initially given an ETC disposition that are validated	ED DoS validation is live. This means that a number of ED cases are validated at the DoS stage and referred to another appropriate service such as an MIU and not to an

		ED. These cases are not included in E27. When we incorporate ED DoS validated cases, our ED validation rate (E27/E26) for the month of February is 76.65%.
G01	Number of calls where caller given an appointment	We can only give patients an appointment or booked timeslot with any service if they are made available to us. Looking at total slot utilisation (both ED, UTC, MIS & PC) of the slots made available to 111 to book. In February, 2,015 appointments available with 1,094 (83%) booked – 202 (2%) no slots available (15%)
G05	Number of calls where the caller was booked into an IUC Treatment Centre	Looking at the three IUC Treatment Centres in Devon, Only 5 slots available for Feb, none booked. 2 in Plymouth, 2 in Newton Abbot, and 1 in Tiverton.
G07	Number of calls where the caller was booked into a UTC	Booking capacity at UTCs in Devon has been closed (system issue). This is being reviewed by the local DoS team and UTC Managers to reopen. Also, UTCs are now presenting beneath OOH GP within the DoS. This will affect performance once booking issue is rectified.
G11	Number of calls where the caller was booked into an SDEC service	This SDEC service is not running currently in Devon.

Comments for 111AH2 Gloucestershire

Data item	Description	Comments
B01	Calls answered within 60 seconds	February saw a drop in resource due to higher than expected sickness levels and leave during school half term. There were also 9 separate periods of national contingency activation from other providers totalling 59 hours (an increase of 48% on January).
B02	Number of calls abandoned	
B06	Time to call answer	
D01	Calls assessed by a clinician or Clinical Advisor	
E17	Number of callers recommended self-care at the end of clinical input	With consistent failed access to primary care during in hours, the acuity of our clinical queue remains high. This ultimately impacts the appropriateness of self-care recommendations.
E27	Number of calls initially given an ETC disposition that are validated	Since February 2022, a number of ED cases are validated at the DoS stage and referred to another appropriate service such as an MIU and not to an ED. These cases are not included in E27. When we incorporate ED DoS validated cases, our ED validation rate (E27/E26) for the month of February is 73.84%.
G01	Calls where caller given an appointment	We can only give patients an appointment or booked timeslot with any service if they are made available to us. Looking at total slot utilisation (ED, MIU, GHAC & PC) of the slots

		made available to 111 to book (981), only 24 slots were not booked throughout February meaning 97.55% of the slots available to us were utilised and booked. In 46% of total cases there were no appointments available for 111 to book into.
G05	Calls where the caller was booked into an IUC Treatment Centre	During the Covid pandemic the appointment function for bookable appointments into IUC Treatment Centres (PPG OOH's for Gloucester) was switched off to aid & reduce face to face contact. Since then, all contact cases are sent via ITK for telephone triage in the first instance & OOH's will then book into bases as necessary. In a handful of cases, other area TC's still profile on the DoS with bookable functions.
G09	Calls where caller given a booked time slot with an ED	As with previous months, patients are booked time slots into ED if appointment slots are made available to book. During February there were no slots available for 111 to book directly into in 79% of total appropriate cases. Of the slots made available to 111 (78 slots), only 6.4% (5 slots) of those slots were not booked by our staff. Meaning 93.6% of the slots available to us were utilised and booked.
G11, G10	SDEC selections	The SDEC care service isn't currently active.

Comments for 111AH7 North East Essex & Suffolk

Data item	Description	Comments
B01	Number of calls answered within 60 seconds	During February we saw clinical queues grow in 111 and on occasion we moved HAs from front end answering to Patient Safety Calling of those queues. This kept those patients safe but impacted front end performance.
B02	Number of calls abandoned	
B06, B07	Time to call answer	
C01	Number of calls where person triaged	
D01	Calls assessed by a clinician or Clinical Advisor	Now validated through ED DOS validation.
E27	Calls initially given an ETC disposition that are validated	
G01	Calls where caller given an appointment	Still limited opportunities as triaging for COVID symptoms rather than direct booking.
G05	Calls where the caller was booked into an IUC Treatment Centre	
G07	Calls where the caller was booked into a UTC	Minimal opportunities to do this (just one UTC).
G10, G11	SDEC selections	The SDEC care service isn't currently active.

Comments for 111AK9 South West London

Data item	Description	Comments
B01	Calls answered within 60 seconds	The overall drop in performance for February was impacted by SWL being over contract activity for calls offered and calls answered. This was coupled with increased annual leave and staff sickness.
B02	Number of calls abandoned	
B06	Time to call answer	
B07, B08	95th & 99 th centile call answer time (seconds)	SWL Telephony centile figures exclude LAS data as line data is not available.
C01	Number of calls where person triaged	Disparity with provisional data is because on the 14 th February and each day from 16 th February onwards, LAS changed how they sent the Adastra data. This meant it wasn't loaded in our automated processes and was missing from the weekly submissions.
D01	Calls assessed by a clinician or Clinical Advisor	Performance affected by a CA shortfall due to half term leave as well as increased sickness absence. Additionally, we have started to see loss of hours from agency CAs in the form of last minute cancellation of shifts.
D14	Number of callers who needed to speak to a clinician or Clinical Advisor within 20 minutes (immediately), who were warm transferred or received a call back within 20 minutes	Disparity with provisional data for D01 is because on the 14 th February and each day from 16 th February onwards, LAS changed how they sent the Adastra data. This meant it wasn't loaded in our automated processes and was missing from the weekly submissions.
E17	Number of callers recommended self-care at the end of clinical input	Drop in self-care due to winter symptoms remaining high which require further assessment rather than self care.
E21	Number of calls initially given a category 3 or 4 ambulance disposition that are validated within 30 minutes	Figures are missing 999 validations done by LAS; numbers show the few that were picked up by Practice Plus Group.
E27	Number of calls initially given an ETC disposition that are validated	We run ED DoS validation which shows proportion of calls initially given an ED that are validated at 75% for February. This means that a number of ED cases are validated at the DoS stage and referred to another appropriate service such as an MIU and not to an ED.
F02	Directory of Services: no service available other than ED (ED catch-all)	This is usually very low or zero.

SCAS

Comments for 111AH9 Hampshire & Surrey Heath

Fields listed as zero are legitimate zeros, such as those reported for SDEC and ITK, which we do not operate. Fields left blank fall into one of three categories: a) we have been unable to provide the data due to technical limitations, mostly around telephony; b) metrics which we need more time to investigate, including community pharmacy / prescription booking and DOS options (not DoS selected); c) we have unfortunately been unable to clarify with a number of external IUC providers what metrics they would report against based on their services and been unable to finalise setup of our SFTP site to allow those who have completed the process to submit data to us.

Data item	Description	Comments
A01	Number of calls received	Disparity with provisional figures is down to how DHU data has been apportioned.
A02	Calls routed through IVR	Zero due to no IVR at call start when passed to service
A05	External clinician calls to Clinical Assessment Service (CAS)	Blank as uncertainty whether there is a direct line in this way.
A06	Unscheduled IUC attendances	SCAS does not hold this data – we have experienced problems gathering data from providers.
B01	Number of calls answered within 60 seconds	Disparity with provisional figures is down to how DHU data has been apportioned. Performance affected by daily demand which was higher than in January - service wide we took 381 more calls a day on average with only a small increase in call handler hours.
B02	Number of calls abandoned	
B06	Total time to call answer	
B07, B08	95 th /99 th centile call answer time (seconds)	

B09	Total time of abandoned calls (seconds)	Telephony data are not provided at a transactional level so we are unable to split telephony figures by contract area. Figures are calculated by applying a % based on numbers triaged.
C01	Number of calls where person triaged	The breakdown of triage data across the two SCAS contracts has been calculated based on GP practice, but some CCGs are split across the two contracts so cannot be used. Disparity with provisional figures is down to how DHU data has been apportioned.
C05	Number of calls where person triaged by any other Clinician	Zero. No known "Other" clinicians operate.
C06	Calls where person triaged by another staff type not within the other 4 categories	Contains cases where staff role was unable to be found in system.
D01	Calls assessed by a clinician or Clinical Advisor	Disparity with provisional figures is because the monthly calculation includes a manual workaround to count calls passed via the DoS. We do not have time to add this data into the weekly ADC submission.
D03	Calls assessed by an advanced nurse practitioner	Do not operate this staff type any more.
D12	Number of Natural Language Processing (NLP) calls that resulted in the caller speaking to a clinician or Clinical Advisor	Do not operate Natural Language Processing (NLP)
D14	Callers who needed to speak to a clinician or Clinical Advisor within 20 minutes (immediately), who were warm transferred or received a call back within 20 minutes	Figures impacted by the change in given callback time up to an hour suggested for Cat 3 & 4, as calls are being picked up further down the queue rather than < 30 minutes which would previously have been the case.
E21, E22	Calls initially given a category 3 or 4 ambulance disposition that are validated within 30 minutes / in over 30 minutes and less than 60 minutes	
F01 to F03	Directory of Services	We do not have data for these items as we have not yet had our SSRS feed reinstated after the Adastra outage.

G02 to G09	Callers booked into a service following a DoS selection	Figures this month have been refined to include details combining DoS service types and appointments from external records. Disparity with provisional figures is due to not being able to manually update weekly DoS figures with up to date service types – this is only feasible monthly.
G11	Number of calls where the caller was booked into an SDEC service	No DoS booked appointments listed for SDEC in timeframe
G12, G13	Number of calls received by dental services not using DoS	Figures are considerably lower than in previous months as most of the booking done by dental was moved to be done via the DoS from 21 st January.
G14	Number of calls where caller given any other appointment	Disparity with provisional figures is due to not being able to manually update weekly DOS figures with up to date service types – this is only feasible monthly.
G15 to G19	Community pharmacy service	We do not have data for these items as we have not yet had our SSRS feed reinstated after the Adastra outage.
G20, G23	Number of patients requiring a face to face consultation in their home residence	SCAS does not hold this data – as we have experienced problems gathering data from Providers.
H13, H16	Number of NHS 111 Online contacts that resulted in patient requiring a face to face consultation in an IUC Treatment Centre

SECamb

Comments for 111AI9 Kent, Medway & Sussex

Data item	Description	Comments
A04	Calls transferred from the 999 Ambulance Service into NHS 111	SECamb does not transfer low-acuity 999 calls across to 111. Figures for previous months incorrectly included calls handled by dual trained agents.
B01	Number of calls answered within 60 seconds	Call volume did not drop as much as expected since last month, therefore call answering performance was mixed.
B02	Number of calls abandoned	
B06	Total time to call answer	

B07, B08	95th & 99 th centile call answer time (seconds)	Abandonment rate was kept under control as we mitigated the long tail of call answering.
C01	Number of calls where person triaged	
D01	Calls assessed by a clinician or Clinical Advisor	Disparity with provisional figures due to some late-closed clinical cases which were not included in the weekly submissions but are included in consolidated monthly data.
D21	95th centile time to clinical assessment for callers requiring assessment within 20 minutes (immediately)	Metrics currently in development as agreed with local commissioners.
D24, D25	Time to clinical assessment for callers requiring assessment within a timeframe over 20 minutes	
D26	Calls assessed by a clinician or Clinical Advisor by video consultation	Metric out of scope for our operating model.
E17	Number of callers recommended self-care at the end of clinical input	Self-care outcomes after clinical output are driven predominantly by Pathways.
E21, E22	Calls initially given a category 3 or 4 ambulance disposition that are validated within a specified timeframe	Metrics currently unavailable.
E25	Total wait time to category 3 or 4 ambulance validation	
E30	Total wait time to ETC validation (seconds)	
F02	DoS: no service available other than ED (ED catch-all)	Unable to identify this value in the Cleric platform.
G11	SDEC referrals and bookings	Commissioners are currently working on optimising the DoS profiling and eligibility of SDEC services but for now these data items are unavailable.
G20, G21, G22, G23	Face to face consultations	Agreed with our Lead Commissioner that these are out of scope, as not relevant to our operating model.

VOCARE

Comments for 111NR1 National Resilience

Data item	Description	Comments
C01	Number of calls where person triaged	Disparity with provisional figures is because we were unable to provide Adastra metrics for 25 th and 26 th February for the weekly submissions.
D01	Calls assessed by a clinician or Clinical Advisor	

Comments for 111AF4 Staffordshire

Extended access bookings are not recorded in the data for all areas in Staffordshire due to manual work arounds. The CCG are leading on programme of works to move access of these services to DOS/ITK.

Data item	Description	Comments
G06, G07	DoS selections for UTC DoS selections for UTC	Staffordshire ICS still does not have any UTCs operationalised. Any low numbers that appear in submissions may be due to patients on the service's border.
G10, G11	SDEC referrals and bookings	No cases arose to report.
