

Cancer Waiting Times, March 2023 - Provider Based - Final

The latest monthly Official Statistics on waiting times for suspected and diagnosed cancer patients accessing NHS services, produced by NHS England and NHS Improvement, were released on 13/07/2023 according to the arrangements approved by the UK Statistics Authority.

Waiting Times for Cancer Services - March 2023

The key results for outpatient services and first definitive treatments show that, in England, during the period March 2023:

Two week Wait:

- 83.8% of people were seen by a specialist within two weeks of an urgent referral for suspected cancer (86.1% in February 2023)
- 77.1% of people urgently referred for breast symptoms (where cancer was not initially suspected) were seen within two weeks of referral (78.7% in February 2023)

One month (31-day) wait from diagnosis to first definitive treatment:

- 91.9% of people treated began first definitive treatment within 31 days of receiving their diagnosis, all cancers (92.1% in February 2023)
- 89.8% of people treated for breast cancer began first definitive treatment within 31 days of receiving their diagnosis (91.1% in February 2023)
- 93.7% of people treated for lung cancers began first definitive treatment within 31 days of receiving their diagnosis (93.6% in February 2023)
- 89.9% of people treated for lower gastrointestinal cancers began first definitive treatment within 31 days of receiving their diagnosis (90.1% in February 2023)
- 91.8% of people treated for urological cancers began first definitive treatment within 31 days of receiving their diagnosis (92.1% in February 2023)
- 90.5% of people treated for skin cancers began first definitive treatment within 31 days of receiving their diagnosis (89.7% in February 2023)

Two month (62-day) wait from urgent referral to first definitive treatment:

- 63.8% of people treated began first definitive treatment within 62 days of being urgently referred for suspected cancer, all cancers (58.4% in February 2023)
- 77.6% of people treated for breast cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer (73.4% in February 2023)

- 54.5% of people treated for lung cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer (47.9% in February 2023)
- 48.3% of people treated for lower gastrointestinal cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer (36.9% in February 2023)
- 50.1% of people treated for urological cancers (excluding testicular cancer) received first definitive treatment within 62 days of being urgently referred for suspected cancer (46.5% in February 2023)
- 87.7% of people treated for skin cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer (83.5% in February 2023)

62-day wait extensions

- 76.7% of patients began first definitive treatment within 62 days of a consultant's decision to upgrade their priority, all cancers (73.6% in February 2023)
- 71.6% of people began first definitive treatment for cancer within 62 days of referral from an NHS cancer screening service, all cancers (64.1% in February 2023)

The key results for waiting times for second or subsequent treatment show that, in England, during the period March 2023:

31-day wait for subsequent treatment

- 77.7% of people began treatment within 31 days where the subsequent treatment was surgery (78.8% in February 2023)
- 98.0% of people began treatment within 31 days where the subsequent treatment was an anti-cancer drug regimen (98.0% in February 2023)
- 88.8% of people began treatment within 31 days where the subsequent treatment was a course of radiotherapy (89.3% in February 2023)

The key results for waiting times for urgent referral to a patient being told they have cancer, or that cancer is definitively excluded show that, in England, during the period of March 2023:

28-day Faster Diagnosis (All Routes):

- 74.1% of people were told by a specialist if they had cancer, or if cancer was definitively excluded within four weeks (28-days) of an urgent referral (74.99% in February 2023)
