

Cancer Waiting Times, October 2022 - Provider Based - Final

The latest monthly Official Statistics on waiting times for suspected and diagnosed cancer patients accessing NHS services, produced by NHS England and NHS Improvement, were released on 13/07/2023 according to the arrangements approved by the UK Statistics Authority.

Waiting Times for Cancer Services - October 2022

The key results for outpatient services and first definitive treatments show that, in England, during the period October 2022:

Two week Wait:

- 76.9% of people were seen by a specialist within two weeks of an urgent referral for suspected cancer (72.3% in September 2022)
- 74.8% of people urgently referred for breast symptoms (where cancer was not initially suspected) were seen within two weeks of referral (67.9% in September 2022)

One month (31-day) wait from diagnosis to first definitive treatment:

- 91.8% of people treated began first definitive treatment within 31 days of receiving their diagnosis, all cancers (91.1% in September 2022)
- 90.3% of people treated for breast cancer began first definitive treatment within 31 days of receiving their diagnosis (90.1% in September 2022)
- 95.3% of people treated for lung cancers began first definitive treatment within 31 days of receiving their diagnosis (94.7% in September 2022)
- 91.8% of people treated for lower gastrointestinal cancers began first definitive treatment within 31 days of receiving their diagnosis (89.2% in September 2022)
- 91.5% of people treated for urological cancers began first definitive treatment within 31 days of receiving their diagnosis (90.7% in September 2022)
- 87.8% of people treated for skin cancers began first definitive treatment within 31 days of receiving their diagnosis (88.2% in September 2022)

Two month (62-day) wait from urgent referral to first definitive treatment:

- 60.3% of people treated began first definitive treatment within 62 days of being urgently referred for suspected cancer, all cancers (60.8% in September 2022)
- 70.0% of people treated for breast cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer (71.2% in September 2022)

- 49.4% of people treated for lung cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer (52.7% in September 2022)
- 38.9% of people treated for lower gastrointestinal cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer (39.3% in September 2022)
- 54.1% of people treated for urological cancers (excluding testicular cancer) received first definitive treatment within 62 days of being urgently referred for suspected cancer (52.9% in September 2022)
- 79.9% of people treated for skin cancers received first definitive treatment within 62 days of being urgently referred for suspected cancer (82.1% in September 2022)

62-day wait extensions

- 74.6% of patients began first definitive treatment within 62 days of a consultant's decision to upgrade their priority, all cancers (73.8% in September 2022)
- 67.3% of people began first definitive treatment for cancer within 62 days of referral from an NHS cancer screening service, all cancers (67.8% in September 2022)

The key results for waiting times for second or subsequent treatment show that, in England, during the period October 2022:

31-day wait for subsequent treatment

- 80.9% of people began treatment within 31 days where the subsequent treatment was surgery (80.9% in September 2022)
- 98.8% of people began treatment within 31 days where the subsequent treatment was an anti-cancer drug regimen (98.0% in September 2022)
- 91.0% of people began treatment within 31 days where the subsequent treatment was a course of radiotherapy (88.2% in September 2022)

The key results for waiting times for urgent referral to a patient being told they have cancer, or that cancer is definitively excluded show that, in England, during the period of October 2022:

28-day Faster Diagnosis (All Routes):

- 68% of people were told by a specialist if they had cancer, or if cancer was definitively excluded within four weeks (28-days) of an urgent referral (67% in September 2022)
