

## Annex A

### FDS Activity and Performance by End Reason and Suspected Tumour, August 2025

Suspected Tumour	Diagnosed with Cancer			Cancer Ruled Out		
	Total Told	Within Standard	Performance (%)	Total Told	Within Standard	Performance (%)
Suspected skin cancer	3,442	2,391	69.5%	64,741	52,277	80.7%
Suspected breast cancer	3,633	2,277	62.7%	41,933	36,204	86.3%
Suspected lower gastrointestinal cancer	1,745	986	56.5%	41,399	27,222	65.8%
Suspected gynaecological cancer	669	264	39.5%	24,188	15,941	65.9%
Suspected head and neck cancer	821	264	32.2%	23,204	17,457	75.2%
Suspected upper gastrointestinal cancer	758	502	66.2%	16,794	12,839	76.4%
Suspected urological cancer (excluding testicular)	3,754	1,133	30.2%	15,833	10,844	68.5%
Exhibited (non-cancer) breast symptoms - cancer not initially suspected	107	59	55.1%	7,989	6,743	84.4%
Suspected cancer - referral to non-specific symptom clinic	109	49	45.0%	4,315	3,113	72.1%
Suspected lung cancer	790	429	54.3%	3,745	3,150	84.1%
Suspected haematological malignancies excluding acute leukaemia	403	185	45.9%	1,204	759	63.0%
Suspected sarcoma	77	25	32.5%	1,217	893	73.4%
Suspected children's cancer	1	-	0.0%	988	856	86.6%
Suspected brain or central nervous system tumour	13	10	76.9%	916	758	82.8%
Suspected testicular cancer	62	48	77.4%	784	663	84.6%
Suspected acute leukaemia	6	5	83.3%	32	21	65.6%
Other suspected cancer (not listed)	23	16	69.6%	318	210	66.0%
Missing or invalid	24	12	50.0%	98	66	67.3%
