

Cancer Waiting Times, January 2025 - Provider Based - Final

Changes to Cancer Waiting Times Standards

Following a consultation on the cancer waiting times standards, NHS England had approval from government in August 2023 to implement changes to the standards from 1 October 2023.

In March 2022, NHS England published the recommendations for consultation. The [consultation paper](#) set out the proposed new standards, the rationale for the changes, and the evidence collected in support of those proposals. Annex B of the [consultation paper](#) showed the expected impact of the changes to performance standards.

In August 2023, NHS England published a [consultation response report](#).

The statistics on cancer waiting times have been updated to ensure that they follow the changed operating framework for cancer, and address responses to the consultation on disaggregation of the standards. NHS England will initially adopt an official statistics badge for all the updated statistical outputs.

The Office for Statistics Regulation have now completed their assessment of the Cancer Waiting Time statistics and have identified four requirements to be met in order to satisfy the requirement to become accredited official statistics. We will be addressing those during the remainder of 2025. The report is available here: [Statistics about cancer waiting times in England – Office for Statistics Regulation](#)

The latest monthly Official Statistics on cancer waiting times produced by NHS England were released on 09/10/2025 according to the arrangements approved by the UK Statistics Authority.

The key results for England show that:

28-day Faster Diagnosis:

- 73.4% of people were told if they had cancer, or if cancer was definitively excluded within four weeks (28-days) of an urgent referral (78.0% in December 2024)

31-day Combined:

- 88.9% of people treated began first or subsequent treatment of cancer within 31 days of receiving a decision to treat/earliest clinically appropriate date (91.6% in December 2024)

62-day Combined:

- 67.6% of people treated began first definitive treatment of cancer within 62 days of an urgent suspected cancer referral, breast symptomatic referral, urgent screening referral or a consultant upgrade (71.7% in December 2024)

More analyses are published as part of this statistical release on the NHS website.
