

## Annex A

### FDS Activity and Performance by End Reason and Suspected Tumour, November 2025

Suspected Tumour	Diagnosed with Cancer			Cancer Ruled Out		
	Total Told	Within Standard	Performance (%)	Total Told	Within Standard	Performance (%)
Suspected skin cancers	3,469	2,428	70.0%	58,070	46,836	80.7%
Suspected breast cancer	3,581	2,455	68.6%	44,106	38,953	88.3%
Suspected lower gastrointestinal cancers	1,794	1,005	56.0%	43,300	29,485	68.1%
Suspected gynaecological cancers	679	251	37.0%	24,698	17,139	69.4%
Suspected head and neck cancers	813	309	38.0%	24,270	19,157	78.9%
Suspected upper gastrointestinal cancers	759	514	67.7%	17,871	14,046	78.6%
Suspected urological cancers (excluding testicular)	3,896	1,264	32.4%	17,517	12,572	71.8%
Exhibited (non-cancer) breast symptoms - cancer not initially suspected	112	70	62.5%	8,469	7,560	89.3%
Suspected cancer - referral to non-specific symptom clinic	117	68	58.1%	4,285	3,061	71.4%
Suspected lung cancer	895	532	59.4%	4,148	3,623	87.3%
Suspected haematological malignancies excluding acute leukaemia	381	187	49.1%	1,281	868	67.8%
Suspected sarcomas	67	24	35.8%	1,290	889	68.9%
Suspected children's cancer	3	2	66.7%	936	830	88.7%
Suspected brain or central nervous system tumours	9	7	77.8%	1,055	892	84.5%
Suspected testicular cancer	66	50	75.8%	775	676	87.2%
Suspected acute leukaemia	7	4	57.1%	26	19	73.1%
Other suspected cancer (not listed)	18	11	61.1%	270	186	68.9%
Missing or invalid	23	16	69.6%	87	60	69.0%
