    CCG Accountable Officers

Dear Colleague

Re: Publishing Staffing Data on NHS Choices

As you are aware all Trusts with inpatient beds are required to publish their staffing fill rates (actual versus planned) in hours on the NHS Choices website in June. This letter provides you with a number of documents to enable you to deliver on this expectation. These are:

1. The template that you will need to have populated with your fill rate data from the 1st - 31st May time period, validated and submitted via UNIFY by 12 noon on 10th June
2. A factsheet including answers to queries that you might have and information on how and where to access further support with meeting this requirement

NHS Choices Website

On 24th June, data on staffing fill rates for nurses, midwives and care staff will be presented on the NHS Choices website. Patients and the public will be able to see how hospitals are performing on this indicator in an easy and accessible way. The data will sit alongside a range of other safety indicators.

As well as submitting the May staffing data via UNIFY, all Trusts are also asked to publish their actual versus planned staff fill rates on a ward by ward basis on their Trust website. You will be asked, within the template set up on UNIFY, to provide the URL to your own “safe staffing” web page (or the page where the information is published). The URL will enable the NHS Choices team to establish this link from the NHS Choices website to your Trust website. Each Trust has an NHS Choices nominated member of staff who will be able to coordinate this.

The Template

Appendix 1 sets out a mock-up of the data template. The actual template will be embedded within UNIFY, and is presented here to give you an overview of the cells and level of information required
from you. Your data for 1st to 31st May needs to be entered and uploaded by 12 noon on 10th June. Those Trusts not meeting the 10th June deadline for submission of their data via the UNIFY system will result in a red flag on their NHS Choices hospital webpage.

**Trust Board Reporting**

Reports to your Trust Board must meet the requirements set out in the NQB guidance, with particular reference to page 12 regarding monthly publishing. The guidance states that the Board will be advised of those wards where staffing capacity and capability frequently falls short of what is planned, the reasons why, any impact on quality and the actions taken to address gaps in staffing. This could be presented as an exception report, providing the Trust website publishes ward by ward data on actual versus planned numbers of staff by registered nurse / midwifery / care staff and day duty / night duty.

**Factsheet, Advice and Ongoing Support**

The key document underpinning this requirement is the NQB guidance. In addition, a factsheet has been prepared, and is attached as appendix 2, to provide you with additional information on data collection etc. Further support and guidance can be accessed via the Chief Nurse Offices in the four regions, your area team or the TDA:

- NHS England: North – Hazel Richards hazel.richards1@nhs.net
- NHS England: Midlands and East – Sylvia Knight sylvia.knight@nhs.net
- NHS England: London – Bronagh Scott bronagh.scott@nhs.net
- NHS England: South – Deborah Wheeler deborah.wheeler1@nhs.net
- NHS TDA: Jacqueline McKenna Jacqueline.mckenna@nhs.net

I fully appreciate the amount of work involved in enabling this significant step forward in our strive for openness and transparency and I am grateful for your support in delivering what is a first both in England and much further afield.

With thanks and best wishes

Yours sincerely,

Jane Cummings
Chief Nursing Officer
England

“High quality care for all, now and for future generations”
