	Introduction
1	<p>From 1 April 2013, the NHS Commissioning Board adopted the name NHS England, a name that gives people a greater sense of our role, scope and ambitions - as the organisation responsible for allocating the NHS budget, working to improve outcomes for people in England and ensuring high quality care for all, now and for future generations.</p> <p>Our legal name remains the NHS Commissioning Board as set out in our establishment orders. While the NHS Commissioning Board will be known as NHS England in everything that we do, there are times when the statutory name is required for legal and contractual transactions. The following list provides some key examples of legal documentation which requires us to use our full legal name:</p> <ul style="list-style-type: none"> • Human resources contract of employment; • Any documentation involving a court of law, eg litigation claims • Contracts for directly commissioned services. <p>For ease of reference NHS England is the generic term used throughout this policy.</p>
2	<p>Before the introduction of the 2004 NHS Contract, difficulties were experienced by patients seeking registration with many patients having to be assigned to practices and this impacted on patient choice. Clearer processes were established with the introduction of the new NHS Contract in 2004, whereby practices would operate either an open or closed list and therefore patients had the ability to register with any local practice that was operating an open list. However, practices would continue to have discretion over new patient registrations, although fair and reasonable grounds would be expected to be presented in the event of a refusal to accept a patient onto an open practice list.</p> <p>This alteration to the registration procedure significantly reduced the number of patient assignments to practices and the process for registering with a practice became simpler and clearer.</p> <p>In outline, where a practice list is open, a patient may apply for registration either in person or on behalf of another, whether or not they are resident in the practice area or are currently registered at another practice.</p> <p>When registering with a practice, patients may be asked to provide their medical card, which will have details of their name, address, and NHS number; and if the patient does not have a medical card, they</p>

Document Number: OPS_1024	Issue Date: July 2014	Version Number: 01.04
Status: Approved	Next Review Date: July 2016	Page 6 of 22

	<p>will be asked to complete a GMS1 form at the practice. Practices are not required to request any further proof of identification from patients wishing to register and if unclear should seek guidance from the General Medical Services (GMS) and Personal Medical Services (PMS) Regulations relating to discrimination.</p> <p>The regulations state that if a practice is operating a closed list, the practice may only accept new registrations from a person who is an immediate family member of a registered patient whether or not resident in its practice area or included, at the time of that application, in the list of patients of another contractor or provider of primary medical services. Full details regarding the operation of a closed list may be found in the Managing closed lists policy.</p> <p>Although NHS England have overall responsibility for ensuring the smooth running of the registration process within general practice, the registration procedure is managed via the Exeter system between the registering practice and FHS agencies on behalf of NHS England. However, there are circumstances where a patient may not be accepted onto the list of their chosen practice and in these circumstances (see below), the area team would be responsible for assisting patients in registering with a local practice.</p>
	<p>Policy statement</p>
<p>3</p>	<p>NHS England is responsible for planning, securing and monitoring services commissioned by them in respect of primary care, offender health, military health and specialised commissioning.</p> <p>This document forms part of a suite of policies and procedures to support NHS England’s direct commissioning responsibilities in relation to primary care. The suite of documents will form the NHS England’s single operating manual.</p> <p>The policies and procedures underpin NHS England’s commitment to a single operating model for primary care – a “do once” right approach intended to ensure consistency and eliminate duplication of effort in the management of the four primary care contractor groups from 1 April 2013.</p> <p>The development process for the document reflects the principles set out in securing excellence in commissioning primary care, including the intention to build on the established good practice of predecessor organisations.</p> <p>Primary care professional bodies, representatives of patients and the public and other stakeholders were involved in the production of these</p>

Document Number: OPS_1024	Issue Date: July 2014	Version Number: 01.04
Status: Approved	Next Review Date: July 2016	Page 7 of 22

	<p>documents. NHS England is grateful to all those who gave up their time to read and comment on the drafts.</p> <p>The authors and reviewers of these documents were asked to keep the following principles in mind:</p> <ul style="list-style-type: none"> • Wherever possible to enable improvement of primary care • To balance consistency and local flexibility • Alignment with policy and compliance with legislation • Compliance with the Equality Act 2010 • A realistic balance between attention to detail and practical application • A reasonable, proportionate and consistent approach across the four primary care contractor groups. <p>This suite of documents will be refined in light of feedback from users.</p>
4	<p>This policy outlines the approach to be taken by NHS England when managing patient assignments to a practice list.</p>
Scope	
5	<p>The scope of this policy is to set out the processes that NHS England needs to ensure are in place and are implemented in respect of patient assignment to practice lists.</p> <p>This policy provides information regarding the grounds for practice refusal to register a new patient and potential difficulties that may arise following removal from a practice list. Also detailed are the procedures to be followed in the event that patient assignment to a practice list is required.</p> <p>Officers of the following NHS England areas are within the scope of this document:</p> <ul style="list-style-type: none"> • NHS England: <ul style="list-style-type: none"> ○ national teams; ○ regional teams; and ○ area teams • All commissioning support units; • NHS leadership academy; • NHS improving quality; • NHS sustainable development unit; • Strategic clinical networks; and • Clinical senates.

	Roles and responsibilities
6	NHS England has the responsibility for ensuring that every person in its locality has access to primary care services and is able to register with a local GP practice. The area team should ensure that they follow the processes outlined within this policy for managing patient assignments.
	Corporate level procedures
8	NHS England central and regional teams will use this policy for any audit purpose or where a challenge from a contractor arises from the implementation of this policy.
	Distribution and implementation
9	This document will be made available to all staff via the NHS England internet and intranet sites
10	Notification of this document will be included in the all staff email bulletin.
11	A training needs analysis will be undertaken with staff affected by this document.
12	Based on the findings of that analysis appropriate training will be provided to staff as required.
	Monitoring
13	Compliance with this policy will be monitored via the primary care oversight group, together with independent reviews by internal and external audit on a periodic basis.
14	The primary care policy ratification group a formal sub-group of the primary care oversight group will have responsibility for reviewing and updating the policy. The document should be reviewed in 24 months unless guidance or legislation requires an earlier review.
	Equality impact assessment
15	Equality and diversity are at the heart of NHS England's values. Throughout the development of the policies and processes cited in this document, we have given due regard to the need to eliminate discrimination, harassment and victimisation, to advance equality of opportunity, and to foster good relations between people who share a relevant protected characteristic (as cited in under the Equality Act 2010) and those who do not share it.
16	As part of its development this document and its impact on equality has been analysed and no major impact has been identified.
	Associated documents
17	This document should be read together with: <ul style="list-style-type: none"> • Managing contract breaches, sanctions and termination for primary medical services contracts; • Managing closed lists; and

Payment systems for contractors

1. Regardless of the contract type, the vast majority of payments to medical contractors are made through the central registration and payment system known as the Exeter system.
2. The current system of payment to GPs and practices via GMS is complex. In 2004 a new practice-based contract replaced the previous GMS, replacing the Red Book items of service payment. The Exeter system maintains administrative information about practices and individual GPs, registrars, assistants and retainees, including a list of patients registered with each GP.
3. The Exeter system also stores the banking details of each practice and is able to calculate the monthly global sum payment for each contractor in accordance with the terms within the statement of financial entitlements (SFE).
4. Payments for each contractor are generated by the Exeter system based on a range of data gathered from a number of sources and by regular adjustments made by area teams. Primary care teams work closely with their finance colleagues in order to ensure that payments made are accurate.

Where difficulties arise in registration with a practice

5. In most circumstances, practices that are operating an open list do so effectively, and in a reasonable manner, accepting applications for new registrations on a daily basis. There are, however, a number of circumstances when a patient may find it difficult to obtain registration with their local practice and in these circumstances it is important that area teams are fully aware of the grounds under which a practice may refuse registration and the processes that must be followed in order to demonstrate that this refusal has not been on prejudicial grounds.
6. A practice may only refuse to accept a patient onto an open list where it has reasonable grounds for doing so. Reasonable grounds will not relate to the patients race, gender, social class, age, religion, sexual orientation, appearance, disability or medical condition. Reasonable grounds may include that the patient does not live in the practice area. Where a practice refuses to register a patient, the reason for this refusal must be made in writing to the patient within 14 days of the request for inclusion being made.
7. These grounds are also applicable in the event that a practice wishes to remove a patient from their practice list. Where a practice wishes to remove a patient from their practice list, the practice must normally provide the reason for removal in writing to the patient. Removal may normally only be requested, if within the period of 12 months prior to the date of the request, the practice has warned the

Document Number: OPS_1024	Issue Date: July 2014	Version Number: 01.04
Status: Approved	Next Review Date: July 2016	Page 11 of 22

patient in writing that they are at risk of removal and reasons for this have been stated.

8. It may be justified that a written warning was not possible/appropriate in the circumstances that the reason for removal relates to a change of address outside of the practice area including where a patient has been registered as a temporary resident elsewhere and has exceeded the three-month temporary residency period; the practice has reasonable grounds for believing that the issue of a warning would be harmful to the physical or mental health of the patient; or the issue of a warning would put at risk one or more members of the practice team.
9. The practice must record in writing either the date of any warning given and the reasons for such a warning or the reason why no such warning was given. All patient removals must be recorded by the practice, including the reasons and circumstances of the removal and this record must be made available to the area team should it be requested.
10. Practices may remove a patient with immediate effect where the patient has committed an act of violence or behaved in such a way that the contractor, practice staff, other patients, or those present at the place the services were provided have feared for their safety. The incident leading to the request for immediate removal must have been reported to the police. It is highly likely that there are different ways in which challenging patients are managed nationally as services were commissioned in different ways under a 'violent patient' directed enhanced service scheme. For this reason area teams must refer to the full regulations, current guidance and NHS England protocols for managing challenging patients.
11. Patients may experience difficulties in registering where they have been removed from a practice list, although, other than on the grounds of violence or threatening behaviour, this should not ordinarily be a factor considered by practices when approached by new patients. It should also be noted that patients have every right to choose to move from one practice to another, even within the same locality, without providing grounds for doing so.
12. The operation of a waiting list for registrations is not appropriate. Where a contractor feels that it cannot accept new registrations at the time of the patients' application to join the practice, they may need to consider whether the practice list should remain open and enter into discussions in this respect with the area team. See the policy for *Managing closed lists in primary medical services*.
13. In the event that the area team is approached regarding any refusal of registration, contact must be made with the practice to confirm the situation, the area team must address the matter in line with the regulations.

Where patient assignment to a practice list is required

Assignment to an open list

14. The area team may assign a new patient to a practice whose list of patients is open and in making the assignment, the area team shall have regard to:
- the wishes and circumstances of the patient to be assigned;
 - the distance between the patient's place of residence and the practice premises;
 - whether, during the six months ending on the date on which the application for assignment is received by the area team, the patient's name has been removed from the list of patients of any practice in the area of the area team, at the request of the practice;
 - whether the patient's name has previously been removed from the list of patients of any practice in the area of the area team owing to violent behaviour and, if so, whether the practice to which the patient is to be assigned has appropriate facilities to deal with such a patient; and
 - other matters the area team considers relevant.
15. A new patient is defined as a person who:
- is resident (whether temporarily or permanently) within the area of the area team;
 - has been refused inclusion in a list of patients of, or has not been accepted as a temporary resident by, a practice whose premises are within such an area; and
 - wishes to be included in the list of patients of a practice whose practice premises are within that area.
16. In making an assignment, the area team will contact the practice, by telephone, to which the patient is to be assigned to inform them that an assignment is being made. Following this telephone contact, the area team will send an assignment notification (annex 2) to both the receiving practice and FHS agencies for their information. A letter (annex 3) will also be sent to the patient informing them of their registration and provide details as to how they may access the service. In the majority of cases this letter will be issued by the FHS agency; however, area teams should assure themselves that this process is undertaken either through this mechanism or through their own local arrangements.

Assignment to a closed list

17. The area team may not assign a new patient to a practice that has closed its list of patients except in the following circumstances:

Document Number: OPS_1024	Issue Date: July 2014	Version Number: 01.04
Status: Approved	Next Review Date: July 2016	Page 13 of 22

- most or all of the providers of essential services (or their equivalent) whose practice premises are within the area teams area have closed their lists of patients;
- the assessment panel, as will be detailed in the next section of this policy, has determined that patients may be assigned to the practice in question, and that determination has not been overturned either by a determination of the Secretary of State or (where applicable) by a court; and
- the area team has entered into discussions with the practice in question regarding the assignment of a patient, whereby additional support that the area team can offer to the practice may be required. The area team shall use its best endeavours to provide appropriate support and should discuss support in respect of the first assignment of a patient and any subsequent assignments made to that contractor during their list closure.

Assignment based on the determination of an NHS England assessment panel

18. Where the area team has the need to assign a patient to a practice that has a closed list and most or all of the providers of essential services (or their equivalent) whose practice premises are within the locality of the area team have closed their lists of patients, the area team must:
- prepare a proposal to be considered by the assessment panel which must include details of those practices to which the area team wishes to assign patients;
 - ensure that the assessment panel is appointed to consider and determine its proposal and the members of the assessment panel must include:
 - an area team director;
 - a patient representative who is a member of the Local Health and Wellbeing Board or Local Healthwatch organisation; and
 - a member of a Local Medical Committee but not a member of the Local Medical Committee formed for the area in which the contractors who may be assigned patients as a consequence of the panel's determination provide services
 - notify in writing that it has referred the matter of patient assignment to the assessment panel to the following:
 - the LMC for the area of the area team and
 - any contractors whose practice premises are within the area team's jurisdiction that have closed their list of patients and may, in the opinion of the area team be affected by the determination of the assessment panel

Document Number: OPS_1024	Issue Date: July 2014	Version Number: 01.04
Status: Approved	Next Review Date: July 2016	Page 14 of 22

19. In reaching its determination, the assessment panel shall have regard to relevant factors including:
 - whether the area team has attempted to secure the provision of essential services (or their equivalent) for new patients other than by means of their assignment to contractors with closed lists of patients; and
 - the workload of those contractors likely to be affected by any decision to assign such patients to their list of patients.
20. The assessment panel shall reach a determination within the period of 28 days beginning with the date on which the panel was appointed.
21. The assessment panel shall determine whether the area team may assign patients to practices which have closed their lists of patients; and if it determines that the area team may make such assignments, it shall also determine those practices to which patients may be assigned.
22. The assessment panel may determine that the area team may assign patients to practices other than those practices specified by the area team in its proposal, as long as the practices were notified during the preparation stages of the assessment panel being held.
23. The assessment panel's determination must include the factors considered by the panel and be made in writing to:
 - the LMC for the area of the area team and
 - any contractors whose practice premises are within the area team's jurisdiction that have closed their list of patients and may, in the opinion of the area team be affected by the determination of the assessment panel

NHS dispute resolution procedure relating to determinations of the area team assessment panel

24. Where an assessment panel makes a determination that the area team may assign new patients to contractors which have closed their lists of patients, any contractor specified in that determination may refer the matter to the Secretary of State to review the determination of the assessment panel.

Full details of this process can be found in the policy for '*managing disputes for primary medical services*'.

Removal by a contractor of patients assigned to the practice

25. Historically, practices have often applied an unwritten agreement to the retention period of assigned patients. However, area teams should note there are no

Status: Approved	Next Review Date: July 2016	Page 15 of 22

NHS England
Policy for managing patient assignments

formal arrangements in respect of timescales for patient retention in these circumstances. While the significant majority of practices continue to manage assigned patients in the same manner as an ordinarily registered patient, others may commence a formal removal process immediately following assignment. Area teams have a responsibility to ensure that all requests to remove a patient at the request of the contractor must be managed in line with the regulations.

DATE

Dear [Name]

You are now registered with a GP practice

I am writing to inform you that you have been registered with the practice detailed below, following your request to be assigned due to the problems you have been experiencing in registering at a local practice yourself.

Your registered practice is:

[Insert practice name, address and telephone number]

This practice is aware of your registration and your registration with this practice came into effect on [insert date].

Please contact the practice directly for information regarding the services that are delivered and to book any medical appointments as required. However, should you have any problems regarding your registration with the practice then please do not hesitate to contact me at the address above.

Yours sincerely
