

# Primary Care 2.0

## Leeds West

Number of patients covered: 366,000

Number of practices participating: 37

Names of CCGs covered: NHS Leeds West CCG

### Summary of scheme's work

- Wi-fi cabling being installed in practices in September
- Scoping options for procuring website
- Promoting online services to support student registrations during September
- Web GP to be trialled at two practices along with local e-consultations model

## Our top two areas of progress and one area of challenge are:

### Progress One:

- Developing leadership team; local accountability and implementation across 37 practices, to date has achieved:
  - Launch of pharmacy first scheme across 100% of pharmacies
  - Increased use of online services
  - Sites for e-consultations

### Progress Two:

- Extended hours further developed
  - 18 practices delivering service 5 days per week
  - 15 practices delivering services 7 days a week
- Looking to extend 7 day services locally

### Challenge:

- Engaging and influencing 37 individual practices:
  - How to demonstrate timely progress?
  - How do we communicate effectively?
  - How do we ensure everyone's voice is heard?

We continue to develop as a leadership group to help address the challenges
