

'16/17 PSS CQUIN Scheme CA2 Dose Banding for Adult Intravenous SACT
Drug List

This is the initial list of drugs for which tables will be created for the dose banding project.

There are 19 entries but this includes two forms of gemcitabine due to two strengths becoming available – and hence two different sets of doses needed based on the strength stocked.

Final versions of the tables and doses will be available later in March.

Bendamustine
Bortezomib SC
Carboplatin
Cisplatin
Cyclophosphamide (Pick and Mix)
Docetaxel
Doxorubicin (Pick and Mix)
