In a Parliamentary Written Answer [155465] [16 May 2013: Column 373W] data was provided for the amount allocated for all clinical drug treatments in prisons up to the 2012-13 financial year. Could you now supply me with the amount spent in the (i) 2013-14 and (ii) 2014-15 financial year?"

FOI-008566 01/10/2015

Total net expenditure on mental health services by NHS England in 2013/14 and 2014/15. • Total net expenditure on mental health services by NHS England in 2013/14 and 2014/15 on a comparable basis to the programme budgets published in 2012/13. It is apparent from the programme budget tool for 2013/14 that there is a significant proportion of expenditure which is no longer recorded within the programme budget. For example, total net expenditure in the mental health programme budget in 2012/13 was recorded as £11.3bn. In 2013/14, it was £8.1bn. It does not seem conceivable that mental health spending has fallen by £3.2bn! • Total net expenditure by NHS England on specialised mental health services for 2013/14 and 2014/15, for each Clinical Reference Group (CRG) within the National Programme of Care for Mental Health, i.e. CRGs C01 through to C11, and for each CCG, such that it is possible to identify net expenditure on each CRG for each CCG.

"Please could you kindly send me the number of UDA's completed up to 31/7/15 for the following NHS contracts for Crown Court Dental Practice, 203 High Street, Rochester , Kent ME1 1HB.

1. Contract number 664197 / 0008
2. Contract number 664197 / 0005
3. Contract number 664197 / 0001

Please could you kindly let me know how long it will take to obtain this information

NHS England holds some information relevant to your request.

However, as primary care dental providers have up to two months to submit claims for treatment, activity completed up to 31 July 2015 cannot be established until at least 30 September 2015. As activity reports do not attribute activity to particular months and there is a mid-month cut off for the production of activity schedules, at no point will an activity schedule available to us identify activity completed by 31 July 2015.

However, a bespoke manual activity report could be created after 30 September 2015 to produce this. As such, you may wish to resubmit your enquiry during or after October 2015.

I would like to request a bespoke manual activity report (for the contract activity below) as per your email response below - I have highlighted the relevant section in red.

I originally asked this question: "If a secondary care hospital dermatology department who are not a Specialised Dermatology Services Centre (see <http://www.england.nhs.uk/commissioning/spec-services/npc-crg/group-a/a12/>), in

other words not licensed by NHS England as Specialised Dermatology Services Centre, are not referring patients who need urgent Specialised Dermatology Services to the designated Specialised Dermatology Services Centres, for reasons of exploiting the Payment by Results (PbR) system, which quality control external organisation is there to prevent this exploitation of public funds by a NHS Trust?" You said this is a scenario and you are not certain about what information you hold is being asked. I am / was talking about the various government funded organisations dealing with state healthcare. You must have some information about the organisations you are connected to which deal with scenarios I have originally asked you about and I quote above My question is to "which organisation" deals with this scenario. If a dermatology department is breaking your NHS specialised dermatology contracts for financial gain by not referring specialised dermatology conditions patients to specialised dermatology centres, "which organisation" deals with taking them to task?

FOI-008580 02/10/2015

"Do any private organisations that the NHS outsources work to hold personal data about patients on their own servers or systems which are outside of the Trust networks?

- Is any data held by private companies who undertake work on behalf of the NHS, shared or stored outside of the UK, but within Europe. If so, what legislation, or data governance rules allow them to do this?'

Section 2 relates to patient personal data and in particular the patient NHS reference number. "

FOI-008631 08/10/2015

In November 2009, Sir David Nicholson, then NHS chief executive, announced the Quality, Innovation, Productivity and Prevention (QIPP) challenge as a means of helping the NHS find up to £20bn of efficiency savings by 2014-15 while simultaneously improving quality. The NHS subsequently implemented QIPP under 12 workstreams. The workstreams were initially recognised as those described in the March 2010 NHS Guide to QIPP, as follows: Long-Term Conditions Urgent Care End of Life Care Safety Challenges Right Care Staff Productivity Medicines Use and Management Primary Care Commissioning Staffing and Back-office Procurement Innovation Clinical Support Ref:

http://webarchive.nationalarchives.gov.uk/20130107105354/http://www.dh.gov.uk/prod_consum_dh/groups/dh_digitalassets/@dh/@en/@ps/documents/digitalasset/dh_113807.pdf In later descriptions, such as the one published in August 2010 update, the above given Innovation workstream was apparently described as "Technology And Digital Vision" and assigned to the then DH CIO Christine Connelly. The workstreams were then described thus: Long Term Conditions Urgent Care End Of

Life Care Safe Care Right Care Productive Care Medicines Use And Procurement Primary Care Contracting and Commissioning Back Office Efficiency And Optimal Management Procurement Technology And Digital Vision Clinical Support Ref: http://webarchive.nationalarchives.gov.uk/+/www.dh.gov.uk/en/Healthcare/Qualityandproductivity/DH_112316" By June 2011, these appeared to have been reduced to 11, as described then on the dedicated NHS QIPP website: Long Term Conditions Urgent Care End Of Life Care Safe Care Right Care Productive Care Medicines And Procurement Primary Care Commissioning Back Office Efficiency QIPP Procurement Clinical Support Rationalisation Ref: <http://webarchive.nationalarchives.gov.uk/20130107105354/http://dh.gov.uk/health/category/policy-areas/nhs/quality/qipp/> Christine Connelley's workstream was not given in these web materials. The June 2013 update to the QIPP Workstreams introduced further changes. Nine of the original 12 workstreams were recognisable. And three new workstreams appeared to have been introduced. The 12 were then given as follows: Long Term Conditions Urgent And Emergency Care End Of Life Care Safe Care Right Care Productive Care Medicines Use And Procurement Primary Care Procurement Mobilisation Workforce Right Care Shared Decision Making Ref: <https://www.gov.uk/government/news/qipp-national-workstreams-updated> Over the life of the programme then, it seems three workstreams completed early, three were introduced late and nine were kept running throughout the duration of the QIPP challenge. So these nine seem to have run throughout: Long Term Conditions Urgent And Emergency Care End Of Life Care Safe Care Right Care Productive Care Medicines Use And Procurement Primary Care Procurement These three seem to have terminated early: Back Office Efficiency Technology Clinical Support And these three seem to have been introduced late: Mobilisation Workforce Right Care Shared Decision Making Would you please clarify that I have interpreted these developments correctly and provide any corrections necessary to map those QIPP workstreams, over the life of the challenge, that (i) ran for its duration (ii) completed early, (iii) were introduced late, and (iv) may otherwise be necessary to account for all those workstreams that have been described if they are not already addressed by (i),(ii) and (iii). Would you provide end dates for those that finished early, start dates for those that started late, and scheduled end dates or end conditions for each of the remaining workstreams if it is not intended that they continue indefinitely. Would you also please list, for each year of the challenge, the amount of savings each workstream made if it was running. Please cite the names of any reports and other sources from which these savings amounts were gathered. If any other sources of savings contributed to the £20bn target, please cite them with the amounts they counted to the total.

1. Expenditure on staff by NHS Foundation Trusts in the year to 31 March 2015
2. Total expenditure by NHS Foundation Trusts in the year to 31 March 2015
3. Expenditure on staff by NHS Trusts (other than foundation trusts) in the year to 31

March 2015 4. Total expenditure by NHS Trusts (other than foundation trusts) in the year to 31 March 2015 We note from the Department of Health Annual Report and Accounts 2014 – 15 in Note 2.2 that the figures shown for NHS Providers are: • Staff Costs £47,088,889,000 • Total expenditure £74,202,933,000. However, it is impossible to tell how this breaks down between NHS Foundation Trusts, NHS Trusts and other bodies. We also note the following figures from the NHS foundation trusts: consolidated accounts 2014/15 in Note 5.1: • Employee expenses – executive directors £159,000,000 • Employee expenses – staff £27,554,000,000 • Non-executive directors £21,000,000 • Total Operating Expenses £43,452,000,000.

1. please provide copies of the unpublished minutes and materials from the care.data Programme Board in original format. (to the end of October 2015 not yet on <http://www.england.nhs.uk/ourwork/tsd/care-data/documents/>). This should include all meetings held to date in 2015, meeting dates, attendees list, and any documents used at each meeting and/or produced in association, such as addendum and presentations. If these materials are to be published on the website, please confirm the planned date. 2. With reference to the 2014 papers which were published on August 14, 2015 in response to the Freedom of Information request SDR- 339659

https://www.whatdotheyknow.com/request/caredata_programme_board_minutes , please can you confirm if and when they will also be made available on the care.data Programme Board webpage. This would be in line with transparency and TOR published policies, and to maximise public benefit. (Simply: yes with a date, or no.) 3. With reference to the January 14, 2015 decision: 'Proposal on Transparency and Publication of care.data papers' <http://www.england.nhs.uk/wp-content/uploads/2015/06/cd-prog-brd-mins-150114.pdf> "TK noted that this document aims to define the separation of the Programme Board meeting into two (2) sessions. The first session will be the main session and the supporting agenda, papers and

minutes of this session will be made available on the care.data Programme website. The second session will be a private session where items that are commercial in confidence will be discussed and the supporting agenda, papers and minutes of this session will not be made available on the care.data Programme website." I note that to date in all the 2013-2015 published papers from all care.data programme board meetings only one redaction has ever been made on the basis of commercial confidence (section 43 exemption). I therefore request any written exchange before or after the Jan 14 2015 meeting between any of the named individuals in the meeting, file p1 <http://www.england.nhs.uk/wp-content/uploads/2015/06/cd-prog-brd-mins-150114.pdf> and/or Mr. Simon Stevens and/or Mr. Bastable or other third party, regards this topic of separation of the Programme Board meeting into two sessions. This may include why, what the two parts would include or exclude, how the decision on content will be taken, and by whom. This is to understand for example but not exclusively, if there will be any indication at all in the main meeting agenda whether a part two of any meetings take place, and if so, its high level contents, or whether the second part of meetings may occur without any record at all, and their contents ("the supporting agenda, papers and minutes of this session") opaque.

Please can you respond to the following questions: 1. When will NHS England be implementing the programme of BRCA testing announced on the 2 July 2015 (<https://www.england.nhs.uk/2015/07/02/annual-investment-decisions/>) 2. Please can you supply the most recent commissioning policy relating to BRCA testing (note that I can find the following marked as draft https://www.engage.england.nhs.uk/consultation/specialised-services-consultation/user_uploads/brca-policy.pdf so I am interested in obtaining a copy of the 'final' policy)

FOI-008679 12/10/2015

I would like either an answer to a single question, or a copy of the contract which may contain the answer. Patient Services are commissioned by NHS England to, amongst many things, transfer patient records from one practice to another when patient's move to new addresses. I need to find out if a contractor who has been commissioned to provide patient services has the contractual right to dictate the format in which the patient information can be transferred by. With many practices including ours now being fully digitised, we are finding that certain regional patient services and some individual practices are refusing to accept patient information on CD ROMs, even though national NHS IG rules are being followed, by having these removable media formats encrypted and password protected. They are sent with full instructions how to access the information as well. Some patient services contractors are insisting that all records are printed out in full before they will accept them, which is causing an incredible amount of waste in paper, toner and time, not to mention the costs of transferring information in this physical format. In summary therefore, I need a definitive answer as to if another primary care contractor or patient services contractor can refuse patient data in removable media format, provided it follows national IG guidelines.

I am writing you asking if you could please provide for me the following data for your CCG: 1. The percentage of your budget allocated to non-NHS providers. The percentage should be computed as the contract expenditure with non-NHS providers out of the total expenditure on acute hospital provision. Would you be able to provide me the longest time series that you have available? Would you be able to provide me those data broken down at financial year level, please?

FOI-008682 13/10/2015

My research is focused on looking at the effects of prescription drugs on the behaviour of aquatic invertebrates, with a particular focus on antidepressants. It would be beneficial for my background research and literature review if I was to have access to information on the current percentage of the adult population in the UK that are being prescribed both SSRI's and SNRI's. I do not require any patient specific information. Please let me know if it would be possible to obtain this information through the NHS. If this is not possible, a suggestion as to an alternative pathway for securing this information would also be appreciated.

Q) Where can I find information on how does the agency nursing market operate? i.e. Market share of temporary nursing staffing agencies, which ones are most favoured/preferred by NHS trusts and why? Q) How much does the NHS overall (and on average) spend on agency nursing staff? In 2010, 2011, 2012, 2013, 2014 and currently in 2015. Q) Which companies are used to fill in agency nursing position? Q) Which regions tend to use agency nursing staff more/less in comparision to other regions? For example, does London use more agency nurses in comparison to Manchester? Q) What consists in a typical contract between an NHS trust and a company that provides temporary/agency nursing staff? How many years are the NHS tied down to? Costs? is there a standard contract? Q) How much does the NHS spend on an average shift on a temp/agency nurse? How much does the agency pay the nurse on average for a shift that was covered? What are the margins ? Q) What are the budgets set for NHS trusts (individually, regional and overall). What is the budget given to the NHS trust for expenditure on agency nursing staff? Q) What consists in a NHS nurse contract? Are they allowed to perform temp work for an agency in their free time? What are the rules and regulations behind this arrangement? Q) If I (hypothetically speaking) wanted to set up a temp nursing agency what regulations do I need to cover? NMC checks? Vetting? Can I do these checks myself or does this need to be outsourced? Q) Does an agency have to adhere to national frameworks? What are the frameworks for providing temporary nursing staff?

My request to you is regarding the NHS policies and procedures governing the NHS Continuing Healthcare Retrospective Review Process. The head of the National Health Service had hoped that all such Retrospective Review cases would be expedited by the NHS and would have been resolved before the end of 2009, but he had accepted that some may remain outstanding. Frustratingly for me, despite my ceaseless urging for my particular case to be progressed, it is only now that this is at last being achieved. No time deadline applies. I have been unable to locate on the internet the information that I need. (1). Under the Freedom of Information Act, I request you to find and email to me all NHS information relating to the NHS Continuing Healthcare Retrospective Review Process. (2). In addition, if it is indeed available anywhere on the internet, please tell me where it can be found. To assist you in identifying the specific subject, I attach a copy of the September 2010 legal reminder and Flow Chart issued to relevant bodies by the NHS solicitors Bevan Brittan.

When a general practitioner requests that there patient is to be seen by a urologist.

I would like to request the percentage that are referred successfully and also the percentage that are deemed ""non emergency"

Any information on this in my area/given area by yourselves (within reason) would be helpful.

Example: my GP requested that I was seen by a urologist twice, and twice I was refused."

"Martin Houghton, the IRP Secretary has confirmed that the recommendation to NHS England to secure independent external support applies to all three referrals - Cossham, Frenchay Community Hospital and Interim Rehabilitation Beds at Southmead.

1. What action, if any, has NHS England taken in response to the IRP recommendation that NHS England be tasked with securing the independent, external support necessary to rebuild relationships and ensure that existing proposals are completed within an acceptable timescale?

ORIGINAL RESPONSE:

Following the IRP recommendation, NHS England has been working to secure independent external support. NHS England has identified an independent management consultant with relevant experience and with the potential to provide independent support in this regard.

SUBSEQUENT REQUEST:

1. What is the name and biography of the consultant appointed by NHS England?
2. What arrangements has NHS England made with the consultant to ensure that he/she consults with all involved parties, including the public, to agree the scope of support required?"

"I am writing to enquire if the governments awful decision to accept 20,000 migrants into the UK will affect the budget of the NHS. Surely with so many nhs trusts now running huge deficits to not provide extra funding specifically for them could be catastrophic, especially if as I suspect migrants are dumped in already deprived areas. I would appreciate a response as to what extra funding the government is providing.

"Our team is commissioned by NIHR to research the harms and benefits of fibrin sealants in surgical procedures to inform health care in the NHS and we would like to estimate the use of this product in non-emergency surgery.

One proxy we thought we might use is the costs of fibrin sealants to the NHS budget and wondered if NHS England could provide us with these costs?

"I sent the following questions to the FoI Team at the 8 NW London CCGs:

[REMOVED] in a press interview of 18 November last year said: 'We don't think the changes at the A&E at Hammersmith and Central Middlesex are the major impact on the local hospitals. We think there are many other factors going on across London. We've asked for an external review, of experts to come in to review that and see if there's anything we need to learn to get it right.'

Under the terms of the Freedom of Information Act, please:

1. Send me a copy of the 'independent review' and any tabulations and appendices;
2. Identify its authors;
3. Tell me how much the review cost;
4. Confirm that the authors had had no part in Shaping a Healthier Future or in the planning of any health services in North west London;
5. Detail the tendering process for the commissioning of the 'independent review';
6. Provide the rationale for the agreement with the reviewers 'that their main analysis should compare October 2015 (the first whole month post-implementation) with October 2014' – these 2 months in isolation cannot be judged to provide a full analysis. The latest published data show that LNWHT continues to be the worst-performing Trust in the country for Type-1 attendances.

Their response was:

The review was undertaken by NHS England (London Region) to look at the impact of the closure of Central Middlesex and Hammersmith Hospitals Accident and Emergency (A&E) departments on performance against the A&E targets. As part of that was to also review how the changes were made, the SaHF Programme Team was not involved in the procurement, contracting or drafting of that review. NHS England (London Region) provided us with a copy of the report upon completion.

The report is available online. Information to fulfil your other questions is not held by the CCG.

You should send your request to NHS England's Freedom of Information Team which will process this appropriately – www.england.nhs.uk / england.contactus@nhs.net.

Under the terms of the Act will you, please, now answer the questions 1 to 6 above?

Please note that I already have the document referenced in the 'online' link, as I had explained to the CCGs; I am interested in the document referred to at the bottom of page 3 of it:

5. Independent Review of A&E Performance

Introduction

NHS England commissioned an independent review of A&E performance on behalf of the Tripartite.

The reviewers were asked to

- Review A&E performance at all North West London urgent and emergency care sites
- Investigate links between performance and the A&E changes. We agreed with the reviewers that their main analysis should compare October 2014 (the first whole month post-implementation) with October 2013.
- Make recommendations regarding any lessons that should be learnt regarding the planning for and implementation of, the changes.

I am surprised that the personnel in NW London do not have a copy of this independent review, since they cite it in their own paperwork. Please note that if you have the original version of this document, there was an error in the second bullet point, which had read: '...their main analysis should compare October 2015 (the first whole month post-implementation) with October 2014.'

I must add that time is of the essence, since the review was promised last November.

I wish to incorporate any evidence in my own review of A&E performance for publication, and you may reply by e-mail."

"In response to a written question tabled by Greg Mulholland on NHS Labour Turnover, [REMOVED] stated:

"NHS England conducts exit interviews with staff who leave to help understand issues which affect retention and ensure they can be addressed." (11636, Daily report 21 October 2015)

1. Please state the total number of these exit interviews NHS England has conducted in each of the following years: a) 2010, b) 2011, c) 2012, d) 2013, e) 2014 and f) 2015 so far.
2. Please break the yearly totals down by type of NHS employee (i.e. doctors, nurses, paramedics, administrative staff etc.)
3. Please provide a copy of the questionnaire used to conduct these interviews (if questionnaires are role specific, please provide copies of all questionnaires used).

If you are encountering practical difficulties complying with this request, please contact me so that we can discuss the matter and if necessary I can modify the request.

"We have today received details of your decision regarding Concord Medical Centres PMS Review. In the letter we received you say:

'A small number of PMS returns identified individual services which the practice consider to be contractually specified and funded within their PMS contract. We have considered whether a contractual relationship is evidenced by the submissions and concluded that is not the case. Therefore NHS England as contract holder cannot serve notice on those services the practice has identified, and no impact on PMS 'premium' calculation or pace of change applies.'

We were one of that small number of practices that identified the contracted services. Please would you provide all records of any and every discussion regarding the contracts we specified in our submission for avoidance of doubt this shall include detail of all reasoning and consideration that lead to your conclusion that a contractual relationship is not the case? "

"I write to request the release of some NHS statistics regarding the usage of the NHS by men and women. I am compiling an article on NHS expenditure and these resources will form the basis of my analysis and opinion.

I kindly request any data you might possess on the percentage of NHS resources that go towards treating women as opposed to treating men. I imagine this statistic may not exist, but perhaps you have details of, for instance, prescription percentages, GP visit percentages, A&E percentages, or indeed the percentage cost of maternity/contraceptive care (as a percentage of overall NHS expenditure). If you could provide me with the raw data then I may be able to conduct a processing and analysis myself.

"I am looking to locate where a Doctor is now practising and which surgery, if any, they are based at.

I have already spoken on the phone with NHS England and provided the Doctor's GMC number and name. The preliminary search returned no information but confirmed that the Doctor was registered with a licence.

I have therefore been advised to ask for a Freedom of Information request and for a more thorough search to be conducted in order to find out where this doctor is registered now.

Her details as follows:

Name: [REMOVED]

GMC number: [REMOVED]

I would really appreciate if this search could be done and the findings reported back to me.

FOI-008822 26/10/2015

We would like to request the following information from North West Medicines Information Centre

- 1) Does your organisation provide a drug evaluation service? – Need some clarification on what is meant by this, the phrase 'drug evaluation service' is too nebulous. I suspect, from the second question, they are asking whether there is some form of 'contractual' relationship where the customer such as a local APC determines work plans. The North West MI centre produces a national document under the auspices of the national collaboration of regional MI centers (UKMI). This document does contain an element of evaluation and it is utilized across the UK by all networks mentioned in second question. However, there is no direct support provided to local groups by NWMI. If we assume the latter with a clarification phrase, then the national document would not come under this – any guidance on how to approach this appreciated.
- 2) Please provide the names of the organisations to whom you provide this service (eg CCGs, NHS Trusts, Area Prescribing Committees, Drug and Therapeutic Committees, Local Formulary Groups). North West MI centre does not provide an evaluation service directly to any local groups in the form of a contractual working relationship.
- 3) What date/year was your organisation established? 1970s
- 4) Please provide a list of members with involvement in drug evaluation, including name and job role. Who are the principals? None, as per Q2. All staff involved in the national document.
- 5) Please provide a list of work streams / planned activities / priorities for the drug evaluation service for 2015/16 and 2016/17 To be worded by Justine Scanlon as head of Specialist Pharmacy Services and responsible for commissioning services at a national level from UKMi.
- 6) Has your organisation produced any guidance documents containing drug evaluation information for GLP-1s and insulins? If yes, please may we have copies of any relevant documents. If the national document is to be included then "National document Prescribing Outlook published on NICE evidence. <https://www.evidence.nhs.uk/>" is answer, if not, then Q not applicable based on response to Q2)
- 7) For each document, please also provide the following: publically available via NICE evidence (for national document)

- a. Document title
- b. Date of publication
- c. Date of review
- d. Sources referenced in producing the document

Request for Re-use

If your organisation does hold this information and is in a position to pass it on, then I would like to submit the following request for re-using the information:-

We [REMOVED] request permission to re-use as a part of an independent analysis into regional drug evaluation boards, which has been commissioned by one of our clients. The contents of the report will not be made available publically, but may be used by other IMS Health Group entities and service suppliers. The information in the report will be presented in a factual manner with all publication details staying true to the publisher.

I do hope you will be able to assist, however, please do not hesitate to contact

Freedom of Information Request

Dear Sir/Madam,

We are currently studying issues related to public safety associated with prescription medicines and I require data on concerns or complaints received by your organisation from any source relating to the third party prescription ordering system for each of the following pharmacy contractor organisations;

Boots

Lloydspharmacy

Well (formerly Coop)

For each pharmacy contractor named above I request the following information for the past year (ie October 2014 – till now):

1. The number of significant events or complaints received by your organisation regarding the third party ordering prescription service offered by the pharmacy companies (per company).
2. Anonymised complaints from the public or elsewhere regarding the pharmacy companies outlined relating to third party ordering systems.
3. Details of the nature of the complaint. For example, the patient had died and would not have needed medicines, prescription not ordered by patient, prescription not required, misuse of the system, poor processes, patient had not consented to the third party ordering system, or other issues but despite these issues, the medicine was ordered and charged to the NHS. (per company).
4. The number of incidents that you have been made aware of where patients were incentivised to join the third party ordering system by being given gift vouchers or similar. (per company).
5. What was the outcome for the contractor pending investigation?
6. Are there any occasions where any of these or associated matters have been discussed at committee meetings and if so, can we have copies of the minutes associated papers and any available analysis."

"Clarification

Thank you for your email please note the following clarifications:

- What is meant by the term 'financial packages' in the context of your request.
- Please confirm how much the bid was originally for, how much was awarded or earmarked for award, how much has been allocated and spent from that sum to date.
- This applies to each project, for example, project A bid for £100,000, it was awarded £75,000 it has so far pulled down / spent £25,000 of that amount
- If your request refers to all vanguard sites or a particular type of site e.g urgent and emergency vanguards, multispecialty community provider vanguards etc.
- The application relates to the following specific schemes:
 - o PM Challenge Fund Phase One
 - o PM Challenge Fund Phase Two
 - All of the vanguard types. My priority is the MSCP but it would be useful to know the details of the other sites"

freedom of information request as a private individual,

It has come to my attention that the NHS has recently begun issuing fines to patients who mistakenly claim free healthcare. A number of particular cases I have found include patients who have been fined for claiming free prescriptions. But, I am aware that patients are levied other fines in a variety of instances.

The information I would like to know is:

- Details of any and all circumstances which might cause an NHS patient to receive a fine.
- What are the total number and value of fines issued to NHS patients, ideally broken down by reason for fine.
- The number of complaints received about fines to patients
- The number of fines waived by the NHS after patients complained
- The total cost to NHS Business Services (staff time & associated costs) with issuing and recovering fines from patients.

I would appreciate data as far back as it goes, but understand this is a relatively new scheme.

First of all could you tell me how many patients over the last two years have been funded by the NHS to have provision of Artificial Eyes through a private provider, rather than the National Artificial Eye Service, and to how much this costs to the NHS amounts.

Secondly could you provide me with the number of Artificial Eyes over the last two years and the cost incurred by the Bolton NHS Foundation Trust Hospital, for the provision of Artificial Eyes from private providers, which I believe can be provided to the said Trust free from the National Artificial Eye Service.

For both these information requests if possible could you supply the details of the private providers who have been paid by NHS England and how much they have received.

My concerns with both the above is regarding NHS funding being given to private providers for a service which is already available and funded by the NHS.

Please can you advise me who I need to contact to get data on the dementia diagnostic gap by CCG?

I was able to obtain this data up until March 2015 from the Primary Care Prevalence Calculator.

I understand that a new methodology has been implemented - the Cognitive Function and Ageing Study II (CFASII) methodology.

I also see from the document The Forward View into action, that CCGs are required to report this monthly to Unify?

As we report this as our local measure for the BCF, please can you advise what sources are open to us to get this data?

I'm looking into the potential for remanufacturing single-use medical devices (SUDs) across the NHS. I hold data on average savings per hospital, but to make a system-wide estimate I would need to know the number of NHS hospitals using invasive cardiovascular, laparoscopic or surgical devices.

Is this information available? The HSCIC can only provide a list of all NHS hospitals, but cannot distinguish between those carrying out invasive/surgical work, those that do not.

This would feed into a report and recommendations, with a ball-park estimate for potential NHS savings – therefore the number of hospitals do not have to be exact, but functional. An underestimate for instance can be accounted for.

It's also worth checking that this work is not being duplicated within NHS England? Would you be able to check with any relevant teams?

FOI-008942 11/11/2015

We at the Department of Health are looking into the viability, benefits and risks of remanufacturing single-use medical devices (SUDs) across the NHS - with a view to supporting and encouraging the practice if deemed valuable. We are already collecting information from third-party remanufacturers on percentage savings per type of SUD. To understand potential savings for the NHS as a whole, we would need to apply savings figures to the total spend on each type of SUD. After searching for the data internally, I was signposted to external associations such as yourselves as potentially holding this.

Do you, or any affiliate associations, hold data on total spend across the NHS in England and/or within a typical trust or hospital, on any or all of the following SUDs:

Cardiovascular

- Cardiac Stabilisation and Positioning Devices
- Electrophysiology (EP) Catheters
- Ultrasound Catheters

Laparoscopic/Operating Room

- Endoscopic Trocars And Components
- Harmonic/Ultrasonic Scalpels
- Pulse Oximetry Sensors

Brent APMS Practices subject to tendering as part of NHSE Tranche 4

I should be grateful if you could confirm to me which voting members of the joint committee were at the June and September meetings, parts B dealing with the primary care contracts and the paper delivered by Julie Sands, and details of any special conflicts of interest which were made in that context, and anyone who did not

vote or absented themselves from the discussion as a result. I should also like details of the way in which parties voted.

Apart from the general question, if [REMOVED] was present and voting, I do need to know if he made any declaration about his position in relation to Integrated Health CIC (one of the practices to be tendered), and his extremely hands-on involvement as chair of the shadow board of that social enterprise for around 12 months up to the granting of the contract in 2013, and whether and how he voted.

To hopefully help limit the amount of information I am primarily interested in the health/medical condition screening/testing initiatives, programmes and policies that were introduced and should have been made available/offered to male patients and any that were introduced that were/are supposed to screen and/or test both male and female patients.

As I don't know when any health/medical condition screening/testing initiatives, programmes and policies may have been introduced, when they were or may have been updated improved or removed/withdrawn nor what age groups they may have applied to at the time of their launch, improvement or removal, it may help if I identify a the dates (years) and ages of patients.

I am interest in information about what health/medical condition screening/testing initiatives, programmes and policies etc. were/are or should have been made available/offered to male patients who were are the time or became;

1. 30 or more years of age on or after 01 January 1995.
2. 70 or more years of age on or after 01 January 1995. (in addition to 1 above i.e. any specific to elderly patients)
3. 75 or more years of age on or after 01 January 2000. (in addition to 1 and 2 above i.e. any specific to elderly patients)

4. 40 or more years of age on or after 01 January 2005.

5. 50 or more years of age on or after 01 January 2015.

I am approaching you both with regards to a request for information that CQC is considering under the provisions of the Freedom of Information Act 2000 (FOIA).

The request is for data relating to notifications of deaths.

Some of the data that we are considering for disclosure has been provided through the national reporting and learning system (NRLS). NRLS is provided by the Imperial College NHS Trust under contract to NHS England.

The data that CQC is considering for disclosure is attached. The data confirms the organisation that the data relates to but does not include any patient specific information.

The purpose of this correspondence is to seek NHS England's views on disclosure of this information under FOIA. CQC is conducting this consultation in accordance with the code of practice issued under section 45 of FOIA.

I apologise for such short notice for this consultation but if at all possible could you please provide feedback by 3pm today?

If I need to be liaising with any other individual within NHS England please let me know.

Thank you for your consideration in this matter.

First of all could you tell me how many patients over the last two years have been funded by the NHS to have provision of Artificial Eyes through a private provider, rather than the National Artificial Eye Service, and to how much this costs to the NHS amounts.

Secondly could you provide me with the number of Artificial Eyes over the last two years and the cost incurred by the Bolton NHS Foundation Trust Hospital, for the provision of Artificial Eyes from private providers, which I believe can be provided to the said Trust free from the National Artificial Eye Service.

For both these information requests if possible could you supply the details of the private providers who have been paid by NHS England and how much they have received.

My concerns with both the above is regarding NHS funding being given to private providers for a service which is already available and funded by the NHS.

Under the Freedom of information Act please provide:

1. Costs claimed by Ahmedia Ltd for NHS England staff unable to attend their Health Care Strategy Forum over the last 4 years?

Ahmedia offer 'complimentary tickets' to attend, but if staff fail to attend for any reason it incurs cost to the Authorities of over £2200

NB From just 20 FOI requests to NHS Trusts, I have evidence of over £10k having been claimed from just 5 Trusts.

2. How many staff from NHS England have attended the Health Care Strategy Forum over the last 4 years?

3. Is the Board of NHS England aware of the strict terms and conditions for non attendance?

4. I also note that [REMOVED] was a speaker at this years event in October. Is he aware of the strict terms and conditions for non attendance and the costs to the NHS? (there are no reasons accepted for non attendance)

FOI-008990 16/11/2015

I note with interest the proposal by NHS England and the HSCIC to develop a ""single national GP dataset"".

As far as I understand:

- NHS England assert their opinion that ""a compelling case"" that the initial care.data GP dataset, as agreed with the BMA and RCGP, and approved by the (now abolished) GPES IAG, ""requires further review""
- The proposed ""single national GP dataset"" will process extracted and uploaded data for ""purposes beyond direct care"", which most refer to as ""secondary purposes""
- The HSCIC will be tasked with extracting and uploading this dataset from GP practices, and the data set will include NHS numbers, DOBs, gender and postcodes, prescriptions, referrals and diagnoses
- The data extracted and uploaded will therefore be ""personal confidential data"", as defined by the DPA
- A public consultation is to be held regarding this proposed dataset

Please could you provide with the following information:

- Is the extraction and uploading of this dataset simply still care.data, albeit with an ""updated"" dataset, or will this proposal be an additional, parallel, extraction of data, outwith the care.data programme, for a different project ?
- Please could you provide me with the Privacy Impact Assessment that you (must) have undertaken regarding such an extended dataset (unless you are relying on the care.data PIA - if so, please say so)
- Please can you confirm that patients in England will have the right to object to the extraction and uploading of their data, as defined by this dataset, for the (secondary) purposes that their PCD will be processed for
- Assuming NHS England and the HSCIC intend to respect such an objection, please can you confirm that patients who have already objected to their GP about the extraction and uploading of their data for secondary purposes - that is, the addition of the 9Nu0/XaZ89 read code to prohibit, for example, care.data and the National Diabetes Audit - can be reassured that their data automatically will not be uploaded for the purposes intended by this proposed ""single national GP dataset"".
- Or will patients who have already requested that their GP add the 9Nu0/XaZ89 read code to their record be required to to opt-out, yet again, with yet another, different read code ?

FOI-008996 16/11/2015

Please provide:

1. The 2015-16 direct commissioning budgets of each of NHS England's regional teams, sub-regions, and specialised commissioning hubs, separated by their different responsibilities. The attached file, released by NHS England for a

previous year, indicates the likely format. I am requesting programme budgets, if these are held distinctly from, for example, running costs of the team.

2. NHS England is thought to have calculated indicative or hypothetical spending on (and/or budgets/allocations for) general practice services (and/or wider primary care services) at the level of individual CCGs, in light of consideration of "whole place" budgets/allocations, and the co-commissioning policies. Please provide: The indicative figures for each CCG for 2015-16 and any previous years calculated.

I am aware indicative budgets may be published in the future covering 2016-17, however this request covers 2015-16 and previous years, therefore should not be covered by a future publication exemption.

3. Calculations of "whole place" indicative spending/budgets/allocations for each relevant area covering the whole country, for 2015-16, if held."

I would like to request details of correspondence between the Medical Director for NHS England, Sir Bruce Keogh and the Secretary of State for Health Rt Hon Jeremy Hunt within the last 6 months with regards to the recently published data on weekend mortality in the NHS (Fremantle et al, Increased mortality associated with weekend hospital admission: a case for expanded seven day services? BMJ Sept 5th 2015). In particular, I would be interested to know whether any correspondence exists between Sir Bruce Keogh and Rt Hon Jeremy Hunt explaining how this data should be interpreted.

FOI-008999 16/11/2015

We are currently studying issues related to public safety associated with prescription medicines and I require data on concerns or complaints received by your organisation from any source relating to the third party prescription ordering system for each of the following pharmacy contractor organisations;

Boots

Lloydspharmacy

Well (formerly Coop)

For each pharmacy contractor named above I request the following information for the past year (ie October 2014 – till now):

1. The number of significant events or complaints received by your organisation regarding the third party ordering prescription service offered by the pharmacy companies (per company).
2. Anonymised complaints from the public or elsewhere regarding the pharmacy companies outlined relating to third party ordering systems.
3. Details of the nature of the complaint. For example, the patient had died and would not have needed medicines, prescription not ordered by patient, prescription not required, misuse of the system, poor processes, patient had not consented to the third party ordering system, or other issues but despite these issues, the medicine was ordered and charged to the NHS. (per company).
4. The number of incidents that you have been made aware of where patients were incentivised to join the third party ordering system by being given gift vouchers or similar. (per company).
5. What was the outcome for the contractor pending investigation?
6. Are there any occasions where any of these or associated matters have been discussed at committee meetings and if so, can we have copies of the minutes associated papers and any available analysis."

Thanks for your response. I am requesting information from the whole of England. In terms of question 2, I am requiring information just in respect of formal complaints which have been investigated and responded to. In terms of question 4, this relates to all formal complaints which have been investigated and responded to, issues raised and concerns raised leading to feedback.

FOI-009001 17/11/2015

I would like to make an application under the Freedom of Information Act.

I wanted to find out if an internal investigation has or will take place into the [REMOVED] in relation to the death of [REMOVED] following his appointment at the surgery on [REMOVED].

My questions are as follows:

1. Has an internal investigation taken place?

2. If so, who led the investigation?
3. How long did the investigation last?
4. What were the results of the investigation?
5. Has anyone left the surgery or been reprimanded as a result of the investigation? What were these reprimands and who were they for?
6. If there has been no investigation, why was this not deemed appropriate?
7. What measures have been introduced at the practice following [REMOVED] death on [REMOVED]?

I would also like a copy of the report into the centre's handling of the situation if it exists.

FOI-009002 17/11/2015

Regarding the DDRB report chaired by [REMOVED] published on July 16th 2015. Has anyone met with [REMOVED] to discuss the issues relating to the future DDRB report? If so I would like to see the minutes, records and email communications relating to any meetings.

The applicant requests access to :

1. Total numbers implanted in the UK;
2. Total numbers sold in the UK;
3. The Patient Time Incident Rate (PTIR) from 2000
4. A breakdown of the reasons for revision according to the NJR's reporting categories; and
5. The Kaplan-Meier estimates of the cumulative percentage probability of revision (95% CI) at 1, 3, 5, 7 and 10 years (as available) for the following hip systems:
 - a) The Finsbury Adept femoral head in combination with a Finsbury acetabular cup (the Finsbury Adept THR); and
 - b) The sub 48mm Finsbury Adept resurfacing system (the Finsbury Resurfacing).
6. With regards to information provided in response to this request, the applicant also requests a further breakdown of the PTIR and Kaplan-Meier estimates as follows:
 - a) The Finsbury Adept THR
 - i. In combination with the following femoral stems:

- a. Cementless JRI Furlong
- b. Cementless Finsbury Adept
- c. Freeman Hip System Stem
- d. Liverpool Proximal Replacement (LPR)
- e. Finsbury Type C
- f. MS 30 Centrepulse
- ii. For the following sized femoral heads:

 - e. 46mm
 - f. 48mm
 - g. 50mm
 - h. 52mm
 - i. 54mm
 - j. 56mm
 - k. 58mm

The applicant does not require any personal data relating to individual patients. At present the data is to be used for internal purposes only. The data requested is the same in nature to that already published in the NJR's annual reports and is (presumably) only not included in the annual reports as there were fewer than 250 patients implanted with the named implants"

I am making a Freedom of Information request to see the report produced by [REMOVED] describing how a young, teenage girl, with learning disabilities, was flown to Scotland against her will, in a ""Guantanamo-style"" kidnapping.

Apparently, according to reports in the press, the young lady, was about to turn 18 years old and was given heavy psycho-active drugs, so that she could not give her consent, and was made incapable.

The newspapers also say, that they poor young woman, was so distressed by her treatment, that medical staff, refused to allow her to see or speak to her own parents, and forcibly bound her hands, feet and ankles, so that she was immobile when they put her on a plane to Scotland, to a place unknown.

She was later, secretly sent to a care home, where they staff were imprisoned for battering and abusing their clients, and stealing their money.

The same care home, Winterbourne, was later closed by the police and the owner, also sent to prison for exploiting vulnerable people.

I was so shaken by what I have read, that I would appreciate it, if you could provide me with a copy of that report, so that I may read it in my own time.

I would like to find answers to the following Individual Funding Request nomenclature questions:

1. Why is the phrase ""Individual Funding Request"" being used by both NHS England and by the Clinical Commissioning Groups when they are 2 different ports of call for doctors and consultants in context of organisations and routes?
2. Why is there a suffix or prefix such as NHSE for NHS England and CCG for Clinical Commissioning Group -- Not being linked to the phrase ""Individual Funding Request"" so that it becomes ""NHSE Individual Funding Request"" or ""Individual Funding Request NHSE"" and ""CCG Individual Funding Request"" or ""Individual Funding Request CCG"" to avoid confusion of 2 different organisations and routes?
3. If solution given at 2. is difficult why are there not totally different phrases being put into contracts and procedural policy to avoid confusion of 2 different organisations and routes?
4. Why are there no riders being put on NHS England website which tell readers to avoid confusion between ""Individual Funding Request""

similar phrase at both NHS England and at Clinical Commissioning Groups?"

FOI-009036 19/11/2015

We note that you are unwilling to supply the information requested in our letter of 20 October 2015 concerning the Pinnacle Ultamet prosthesis.

We note that NHS England does not “hold” the information sought and that in order to respond to this request you estimate that the NJR would have to undertake analysis taking up to 5 working days.

With your stated objection in mind, we have tailored our request for information as follows:

- 1) Total numbers implanted in the UK;
- 2) The current and any previously generated Patient Time Incident Rate (PTIR);
- 3) The cumulative percentage probability of revision (95% CI) at 1, 3, 5, 7 and 10 years (as available);

For the following hip systems:

- a) The Articuleze femoral head in combination with the Pinnacle Ultamet metal liner and Pinnacle acetabular cup (the Articuleze/Ultamet); and
- b) The SROM femoral head in combination with the Pinnacle Ultamet metal line and Pinnacle acetabular cup (the SROM/Ultamet).

We are aware that the NJR already “holds” information described in points (1) to (3) above, as per the document previously disclosed to us by the NJR entitled “NJR Implant Investigation, Pinnacle MoM Hip Replacement, 20 th June 2013”. This document provides an analysis of PTIRs for the Pinnacle MoM device used in conjunction with an SROM or Articuleze stem, as of June 2013. We understand that the 2013 investigation updated previous audits of this device, including “NJR Implant Investigation, Pinnacle MoM Hip Replacement, 9th July 2012 release 3” and that subsequent audits were also planned; “a rerun of this data and report” were recommended after 12 months (i.e. c. June 2014).

For that reason, we now request provision of the information listed in points (1) to (3) above, in response to our amended request; and/or copies of “NJR Implant Investigation, Pinnacle MoM Hip Replacement, 9th July 2012”, and any prior or subsequent audits in this series; redacted as necessary.

We note that you have suggested that we use the research facilities available through the NJR in order to obtain the information originally requested in our letter of 20 October 2015, however, upon investigation we do not consider that either the “data request” or “research” procedure is available to us as non-academic and non-clinical applicants. As we understand it “data requests” of the NJR are intended to supply data for the purpose of “internal clinical audit”, the data that we originally requested was not intended for that purpose. Similarly, the “research” procedure appears to be aimed at providing academic researchers with data for the purpose of academic publications, once again our original request did not intend to use the data for that purpose. On that basis it seems unlikely that we can obtain the data we

require through any means other than FOI requests to HQIP/NHS England/NJR. If we have misinterpreted the "data request" and "research" procedures that you flagged to us in previous correspondence we would be very grateful for your further advice. You will note that it is against this backdrop that we submit this amended request for information."

1) How many compromise agreements has NHS England entered into with its staff or former staff?

2) How many of these compromise agreements require staff members not to disclose the existence of the compromise agreement itself?

3) How many of these compromise agreements contain non-disparagement clauses that require staff members not to criticise the employees of NHS England?

4) How many of these compromise agreements were entered into by NHS England with staff who had previously made public interest disclosures, (whether or not these were raised by formally invoking NHS England's internal whistleblowing policy)?

5) If staff who have entered into a compromise agreement with NHS England were to voice concerns about NHS England reprisal for whistleblowing, would NHS England consider this to be a breach of non-disparagement clauses, or would it consider the raising of such concerns to be qualifying disclosures under PIDA?

Additionally, please advise what monitoring arrangements, if any, NHS England has in place to track the use of compromise agreements across provider organisations and clinical commissioning groups. If monitoring data is published, please direct me to it. If NHS England holds monitoring data but has not published it, please share this data.

Please also advise if NHS England has undertaken any analysis of the use of compromise agreements across provider organisations and clinical commissioning groups. If an analysis or analyses have been undertaken and published, please direct me to this data. If the data is not published, please share it.

1. How many colonoscopies were performed between 2013-2014 by NHS England. Please provide the information preferably per commissioning group or alternatively as a whole across England.

2. How much does it approximately cost per patient who has a colonoscopy procedure, as an outpatient to receive the preparation instructions and appointment letter. This includes printing, development and distribution costs of the appointment and preparation instructions that the patient receives via the post.

If it is not possible to provide the information requested could you please provide assistance in identifying the necessary organisation that may possess this information.

I look forward to your response within 20 working days, as stipulated by the act.

If you have any queries please do not hesitate to contact me via email and I will happily clarify what I am asking for.

FOI-009125 30/11/2015

I have sent an FOI request to NHS Aylesbury Vale CCG on 6th Nov 2015. Find the attachment above of the response from the CCG and a Data Entry form. As per their response the NHS South, Central and West Commissioning Support Unit provides IM&T services to the CCG. But I suppose NHS ENGLAND does handles the IM&T spend of this CCG. So I would like to request details of the following information for FY 2013-14, FY 2014-15 and FY 2015-16 under Freedom of Information Act (2000):

- Please provide Total organisational IM&T Revenue and Capital spend for the year 2013-14, 2014-15 and 2015-16.
- Please provide Total Revenue and Capital spend in Software, IT Services, IT staff and Other IT for the year 2013-14, 2014-15 and 2015-16.
- Please provide the No. of IM&T staff and indicate whether they are Whole time equivalent (WTE) or Full time equivalent (FTE).

I am asking about any patient safety assessments that have taken place, or any modelling predicting patient safety, surrounding the changes to safeguards around junior doctor working hours.

I totally appreciate that there are new caps to hours and provisions being put into place to try to reduce junior doctors' standard working hours, but I'm also very aware that this is the main concern of junior doctors. They believe that with their bosses being in charge of their working hours - including overtime - they won't be able to say no to overtime requests which are now not subject to safeguards - especially as the same boss is in charge of their career progression.

Given that this safeguard on overtime hours is being taken away, has there been any work done looking at patient safety? If so, please may you share it? If someone else has done the assessment work, would you let me know who? Or if there has been no modelling or assessment of patient safety, please would you let me know?

I'm a freelance journalist, working across newspapers and magazines. I'm working on this story for the end of the week, so please do get back to me tomorrow.

If this is not information you are happy to share immediately, please would you give me any background/guidance to help me in the interim, and consider this a formal

I have been investigating an incident resulting from a incorrectly used medical device, in particular, the programming of such a device, and so it failed to function properly. This could either be considered a 'human error', due to failure to recognise the incorrect inputs or otherwise a 'device fault' as the device failed to detect or prevent the error.

Would you be able to tell me from reports, how common events of this type are, or otherwise whether it is possible to extract this information from the existing data analysis?

FOI-009186 04/12/2015

NHS England issued the following statement 'mental health has until recently been the poor relation but the good news is that this year we are now seeing a turnaround with investment in mental health care going up markedly faster than last year and by a much higher percentage than other services.

In fact, local CCGs report half-way through this year that while their overall funding will have gone up by 3.7% they will be increasing mental health spending by 5.4%- a decisive move towards parity of esteem.

What's more, the NHS is for the first time in 25 years now planning on introducing clear waiting times standards for mental health care, beginning in April.

On enquiry I was informed that the data in this statement "was taken as a national average based on 6 monthly returns from CCGs" . Under the Freedom of Information legislation I am asking if I can have a copy of the returns that were used to calculate this information. I am specifically requesting information at individual CCG level, the base line spend in 2014/15, the collected data at quarter 2 and the details of the calculation that allowed the above statement to be made

FOI-009187 03/12/2015

Further to previous discussion with you regarding the adequacy of the Professional Indemnity insurance with which I have presented you, I confirm that I have sought advice from Tania Francis, a partner at Hempsons Solicitors.

In line with her advice, and in consideration that I have a right to appeal your decision to refuse my Indemnity officially, before a PLDP is listed, I would ask you for the following information, in writing:

1. Which section of the Performers List Regulations; specifically which subsection of paragraph 7; are you relying on?
2. Do you have information about the indemnity/insurance arrangements for all the dentists on your list and whether you have any other dentists with insurance from AllMedPro?

3. Why will you not accept evidence about the policy given by AMP, particularly your refusal to accept their statement of fact, that the policy meets all GDC guidelines?

FOI-009227 08/12/2015

Please could you provide me with the England average GP referral rate? There are a number of other indicators that are not GHLIs that I would like to know the England average of e.g. the number of planned operations per capita (in patient, day case and outpatient total); the prescribing comparator of ASTRO-PU/capita; and another that would be useful is the % of patients discharged at first outpatient appointment. Ideally as well as England averages for these indicators the rates for each practice plotted on an England funnel as they are for the other GPHLIs would be helpful too as great pressure is brought to bear on practices for "unacceptable levels of variation" when in fact they are probably not practicing statistically different medicine it is just random chance and small numbers. I would like to know where there is real variation not trumped up presentation of data to make it look like there is real statistically valid and meaningful variation. GPHLIs are great because they are presented properly but no planned care indicators or an overall prescribing indicator.

Maybe somewhere these are available but HSCIC have been unable to provide them, neither has my CSU and I cannot find them. I have wasted a lot of time on this when I could have had it in seconds. Eventually maybe the CSU will produce it – months later when I could have had it in seconds. I am really begging you to give us

back NHS Comparators – it was a wonderful resource. An excellent website for commissioners. Now everything is so very fragmented - Data in particular. You are failing us totally in helping make rational evidence based decisions. www.productivity.nhs.uk is not in my opinion easy to use or interpret the information. It is a black box that assumes far too much that I am being asked to trust – and based on the huge miss-use of data by this government I have no reason to trust this data and without more detail cannot interpret it sufficiently to even be able to know what it is really telling me.

This is a complaint about the lack of a good comparative data source to allow good commissioning decisions to be made.

FOI-009247 09/12/2015

Can you please be kind enough to advice how much TAX is paid by UK pharmacies collectively to the treasury.

We are seeking a list of the serious incidents requiring investigation (SIRIs) that were reported by each 111 service area in the 2014/15 financial year, as well as summaries of each case.

We understand that 111 serious incidents are reported by service providers to the national medical advisor for NHS 111.

For each SIRI, please provide:

- The incident date
- A brief summary of the incident. We have pasted an example of a SIRI summary below, however this is merely for guidance - please provide this information in whatever form it is held
- The status of the SIRI (ongoing, closed), and if it is closed, the outcome (this is likely to include ""root cause"" and ""actions to be taken"")
- And which service reported the SIRI (eg SCAS, SECamb and so on)

Example of SIRI summary: ""Patient died following call to NHS 111 with chest/ back problems and an ambulance disposition was reached following re-triage. However, the call was not transferred to 999, therefore the Page 8 of 23 ambulance was not dispatched. Patient's husband called 999 as patient was unconscious and breathing 'noisily'. Patient went into cardiac arrest whilst the patient's husband was on phone to 999. Crew and back up arrived. Cardio pulmonary resuscitation (CPR) was administered, but unsuccessful. Thames Valley Police (TVP) called to attend due to unexpected death. Incident declared a SIRI.""

We would like as much information as possible that is held by NHS England about each SIRI, although we understand you will have to take into account factors such as patient confidentiality if there is personal data included in the reports.

We acknowledge that the data you retrieve may be quite raw and while we understand that you cannot "manipulate" the information to cleanse it of details that might lead to the identification of individuals, we are aware that it is common practice in FOIs to redact parts of texts. With that in mind, please feel free to block out/obscure words/phrases that might include patients' personal data.

It would also be helpful if you could confirm that non-NHS organisations such as Care UK also submit SIRIs to NHS England in a similar way to ambulance trusts, so we can be sure that the information will include their data as well.

As you will be aware, we have already discussed the wording and scope of this request with the department via the press office to ensure it will fall within the cost limit - which we expect that it now does. However, if for whatever reason you feel it

will exceed the statutory limit, could you please contact me by email or telephone rather than send us a Section 12 letter, to ensure this is handled as expeditiously as possible.

I would be grateful if you could send me a copy of the report (pdf) referred to in the following article.

Trust chief refuses to quit over damning leaked report, Daily Echo, 12th December 2015

A health boss is refusing to resign after a damning report said her trust failed to investigate the unexpected deaths of more than 1,000 people. Katrina Percy, chief executive of Southern Health NHS Foundation Trust, criticised the leaked NHS England report and apologised but said she would not stand down. Findings in the report state that the trust did not sufficiently examine the deaths of mental health and learning disability patients within the last four years. And health secretary Jeremy Hunt, responding to an urgent question in the House of Commons, said the situation was ""totally and utterly unacceptable"" and insisted there is an urgent need for improvements.

The investigation, disclosed to the BBC, was commissioned by NHS England and carried out by audit firm Mazars and looked at all deaths at the trust between April 2011 and March 2015. In total 10,306 people had died - including 1,454 unexpected deaths. The research reveals 272 were treated as critical incidents, of which just 195 - 13 per cent - were treated by the trust as a serious incident requiring investigation (SIRI), it has been reported.

At Stockholm County Council we are currently reviewing our governance structure to be better prepared for the challenges ahead. As a part of this review we would greatly appreciate the opportunity to benchmark against well-managed healthcare organizations. Of main interest are performance indicators used to govern operations that are regularly followed up on an aggregated (group) level, and give a quick overview of the operations. We are particularly interested in indicators focused on vertical integration and cross-disciplinary collaboration related to the patient experience.

We would appreciate if you can tell us what you consider to be the most important key performance indicators in governing a health care organization, concerning:

- Production/output (i.e. consultations, inpatients, surgery etc.)
- Utilization of production resources (i.e. the utilization of e.g. the hospital building, the operating theater, the medical technology equipment, the staff categories)
- Quality (of outcome, medical results, patient experience etc.)
- Costs
- Change management (i.e. the ability to adapt new ways of working, transformation of inpatient to outpatient care etc.)

I would like to see a copy of agenda, minutes and any papers presented to the last three meetings of NHS England's Investment Committee please. This is the committee that would approve extra funding to success regime areas.

FOI-009283 14/12/2015

The NHSE policy document ""managing the end of time-limited contracts for primary medical services"" paragraphs 32 and 33 state that:

NHSE Area Teams (ATs) should ask themselves:

- have you consulted with service users/patients?
- have you consulted with other local providers and other interested parties ie local medical committee (LMC), local members of parliament, review and scrutiny committee and so on?
- have you consulted with the local clinical commissioning groups?

If the answer is 'no' regarding any of the above, the AT should be able to identify the grounds under which they felt consultation was unnecessary and these should be included in the report defined below.

Paragraph 34 goes on to state that the Area Team must develop a detailed report about the investigations undertaken, consultation and outcomes.

Could you please provide me with the report referred to above with specific reference to the service at Darnall and its impact on the population and other service providers as mentioned below.

- Have you considered the potential impact on service users/patients?
- Have you considered the potential impact on other service providers? ie GPs, pharmacy, local trust, out of hours, community services and so on.
- Have you considered the potential impact on the current provider? ie continued viability within the locality.
- Have you considered patient choice and equality?
- Have you considered the potential risks ie reputational (adverse publicity, commissioner/provider relationship), market testing, timescales and financial Consultation Summary of consultation process followed and outcomes to be inserted
- Have you consulted with service users/patients?
- Have you consulted with other local providers and other interested parties ie local medical committee (LMC), local members of parliament, overview and scrutiny Committee and so on?
- Have you consulted with the local clinical commissioning groups? Second, can you confirm which patient representatives from the 4 affected practices have been invited to be part of the selection process and explain how you are supporting them.

FOI-009288 15/12/2015

My name is [REMOVED] and I am a medical student from Singapore. Here in Singapore, the female muslim nurses are not allowed to don the hijab as potentially, some believe, is due to several reasons such as to maintain uniformity of nurse attire, patient-care (trust, rapport, nursing performance) as well as hygiene and infection control.

I have read some of the hospital guidelines in the UK and have found that even in the NHS guidelines, the hijab is allowed for muslim nurses in the UK, which really is a pleasant surprise for me, especially, being a muslim myself. In addition, it was also stated that there was a discussion prior to this decision, in which experts in the field of infectious diseases were consulted and it was concluded that the hijab posed no additional risk to the patient in the healthcare setting and was hence allowed. I was wondering if you could share with me and the other healthcare professionals who like me, are interested to know what were the considerations made and how you ultimately resolved them when producing the guidelines that presumably do not see the donning of the hijab as a breach of professional as well as ethical standards of the medical profession in healthcare. The goal of this email, personally as a future doctor, is for me to learn more about the pertinent factors thought about when NHS was deliberating on this issue and to be directed to any studies or evidences available that were used to support any propositions made in the discussion as this information is crucial and valuable to have if/when Singapore hospitals decide to consider such a concession for our muslim female nurses. The following questions

are useful in understanding further what I would really like to find out from this inquiry.

1. What were the other considerations that were discussed and were there any departments/area in which the nurses are not allowed to wear the hijab due to the nature of the work such as the operating theatre?
2. How you managed to reach that conclusion i.e. was there any data or studies done?
3. How did you deal with the question of whether patient-care is affected by a nurse wearing the hijab (performing her tasks) including the intangibles (trust and rapport)?
4. Were there any terms or guidelines on the wearing of hijab itself i.e. type, material, color etc?
5. Is the hijab made part of the nursing uniform i.e. manufactured specially for this purpose?

1- Under the FOI request, I would like to request a copy of the legal requirements NHS England must comply with to organise an independent enquiry into the poor care and systemic psychological abuse and wilful request patients in a mental health trust suffer and the devastating consequences in our lives. and how this legal requirement must be comply with to investigate NHS mental health Trust and GP surgeries , which have failed to properly investigate the wilful neglect and abuse I had suffered as a patient with mental health problems over 18 years, with an independent inquiry, which the abuse has left me with severely emotional development . Only a perpetrator was sent to prison

I would like to request NHS England an independent inquiry over response to me and other vulnerable patients by circumstances who have been abused in the mental health system by NHS SW LONDON and St Georges Mental health Trust with and the local GP and their agencies at the wilful neglect I suffered under the hands contrary to the protection I should had received since 1997 and the damages I have been caused

Form the abusive and unnecessary use of restraint, like the Improper use of restraint that amount to criminal offences of assault which police recorded as a crime but did not want to investigate , as they discriminated me and regarded me as a poor witness and that it will be difficult to prove

To false imprisonment and wilful neglect which I still suffer up to today

It may also amount to a criminal offence of breach of Regulation 24 or 25 under the Care Standards Act 2000.

The Mental Capacity Act 2005 defines restraint as:

""the use or threat of force to help do an act which the person resists, or the restriction of the person's liberty of movement, whether or not they resist. Restraint may only be used where it is necessary to protect the person from harm and is proportionate to the risk of harm.""

GPs are a trusted source of advice for patients .They therefore play an important role in ensuring that the right changes are made to working conditions to enable employees to continue to be in work and reduce the chances of an employee having to be absent from work due to sickness.

The Equality Act 2010 replaces the Disability Discrimination Act 1995 and 2005, and began to be implemented from October 2010. It means that employers and service providers like NHS GP have to make reasonable changes to ensure that people with a disability are not disadvantaged substantially compared with non-disabled people.

A key theme running through Realising Ambitions, the Perkins review of employment support, in the testimonies of users of mental health services is the importance of support from members of the community mental health team. These professionals can help build self-esteem and confidence and help to reinforce the message that it may take time to find the right adjustments and for these to make a difference. You may want to review the reasonable adjustment agreement after a set time to see if further changes need to be made. You might also have to help your patient, and the employer, to be persistent and tenacious in finding and making the changes that make the positive difference.

Access to Work is a valuable, but underused, Department for Work and Pensions (DWP) scheme designed to financially assist employers with costs beyond that of reasonable adjustments, helping to produce a more efficient support system in the workplace.

Public Health & Safety concern. The concerns behind this FOI request;

The following link demonstrates that reviews and feedback was collected by The Public Administrative Select Committee in February 2015. The link demonstrates that the public's feedback on The Parliamentary Health Service Ombudsman's service delivery failures was accepted as evidence.

<http://www.publications.parliament.uk/pa/cm201415/cmselect/cmpubadm/886/88612.htm>

1)

Please clarify under which legislation is the ""Subject Matter Expert (SME) within NHS Choices"" allowed to block a factually correct review of an NHS site?

2)

If Parliament are willing to accept and publish a review on an NHS site; then please put the spotlight on which authority Brendan Bourne, User Generated Content Lead NHS Choices or The Subject Matter Expert adheres to when they block an edited version of the feedback provided to PASC on the NHS Choices website since April 2013?

3)

If the public have repeatedly provided documentary evidence to the NHS Choices team that demonstrates that their review on an NHS site is based on factually correct data then please point me to that data that justifies NHS Choices NOT publishing an edited review already published by Parliament earlier this year?

I'd like to make the following request for information in relation to the NHS IQ 'Horizons' Team/'The Edge' project.

In 2014/5 and 2015/6 up to 19th December 2015, how much money has been spent on expenses (including travel, attendance and accommodation/food etc) on sending members of the NHS IQ Horizons team to conferences either to attend, speak or present in any way. Could you list the events attended, nationally and internationally and what research has been done to ascertain the value added by attendance in person as opposed to virtually and how NHS England evaluates the benefits to NHS England rather than individual members of the team.

In 2014/5 and 2015/6 to 19th December 2015, what external contracts and ad hoc payments over £100 have been made to parties not employed directly by NHS

England for services delivered to NHS England NHS IQ Horizons team including the production of 'The Edge'. I would like the names of the companies/individuals and the amount paid.

in 2014/5 and 2015/6 to 19th December 2015 how much has been spent by NHS IQ to attend award ceremonies such as those run by HSJ and did these payments include dinner/drinks - how many people attended and were their tickets subsidised by the NHS.

How much money has been spent so far and is intended to be spent on the 'transformathon' run by the NHS IQ Horizons team"

I refer to the recent meeting between Oxfordshire Council and NHS England at Jubilee House and the photographs allegedly taken of peaceful supporters of [REMOVED]

Please see <https://mydaftlife.wordpress.com/2015/12/18/mazars-the-pop-up-display-and-lives/>.

I assume that this is the Jubilee House at 5510 John Smith Drive, Oxford, OX4 2LH – one of your area offices.

Pursuant to The Freedom of Information Act 2000 (as amended), please disclose the following information.

1. Is this the correct location?
2. If not, where did the meeting take place?
3. What organisation arranged the surveillance?
4. Who specifically (by name or job title) authorised the surveillance?
5. Who is Data Controller of the images?
6. Who owns copyright to the images?
7. What was the purpose of photographing the supporters? Clearly, it was not to prevent a breach of the peace and, had there been serious issues of trespass, the police should have been called.
8. Have the photographs been destroyed?
9. Has the photographer retained copies of the images?

10. Have the photographs been shared by the Data Controller with any other organisations?

11. Other than the photography, were any other means of surveillance being used?

This information is requested because:

- i) It is the public interest to know when (and for what purpose) the NHS is carrying out surveillance when there is no obvious reason to do so.
- ii) The data subjects (i.e. those appearing in the images) are entitled to know who is Data Controller.

FOI-009379 24/12/2015

This request relates to information that is held by the NHS England - Birmingham, Solihull and The Black Country Area Team – please redirect this request should they have any kind of separate Fol response process.

On 26 February 2014 the then Director of the Area Team [REMOVED] wrote to [REMOVED] Cannock Chase CCG; I have a copy of this letter provided under a separate FoIA request.

The letter states that NHS England "are content" with the initiation of a procurement phase in respect of End of Life and (separately) Cancer Services. It also states that regular progress reports will be presented to the Area Team.

Please provide the following information:-

1. The information (documents if in that form) used by NHS England in order to make the decision to support the proposal to commence procurement.
2. The minutes of the meeting(s) at which this decision was taken.

3. Copies of the progress reports that have been received by the Area Team since February 2014.

FOI-009380 27/12/2015

Please refer to your previous response to an earlier request under your ref: SDR-214428 which indicated that you are able and willing to provide the requested information.

1. A list of all projects that the Strategic Projects Team (SPT) were involved in during the years 13/14 and 14/15 and 15/16 to date.
2. In respect of each - how the SPT was appointed whether by an internal process (if so how) or through a competitive tender process
3. How much was paid or has been paid to date in respect of the services provided in respect of each such project and which organisation(s) made the payments.
4. What proportion of the payments made to SPT were made to NHS Employees and what proportion to external consultants.

FOI-009381 29/12/2015

I write to request information under the FOI Act.

It relates to NHS England's modelling of activity related savings in the NHS in the coming year.

NHS England's December 2015 board paper on Allocation of resources to NHS England and the commissioning sector for 2016/17 to 2020/21 states:

"18. We have updated and reflected pressures in each commissioning stream (see Annex B).

"19. We have also included within our modelling the projected contribution of each commissioning stream towards the activity related savings that we have identified for the commissioning sector as its contribution to the overall efficiency challenge to 2020/21. Moderating demand growth in this way is, however, partly dependent on effective government action on prevention and sustained availability of social care relative to rising need. If either of these preconditions to fulfilling the Forward View is not met, it will place additional unfunded pressures on the NHS over the period to 2020/21."

The paper also states:

"Activity

“We have developed assumptions based on the underlying historic growth rates of activity across the health system. Using data from 2009/10- 2014/15 we calculate an average secondary care growth rate of 2.7%. In order to project forwards we have taken this historic figure and adjusted it for the impact of the aging and growing population, resulting in an activity pressure of 2.9% per annum. As part of allocations we have apportioned the activity pressure between CCGs and Specialised, resulting in a 4.4% activity pressure within specialised and 2.4% activity pressure within CCGs. This compares to population growth in the region of 0.7% per annum.”

Please provide:

1. Information on the projected contribution of each commissioning stream towards activity related savings; and information on the total projected activity related savings.
2. Information on the projected contributions of all streams towards all savings.
3. The analysis underlying these projected contributions: Please provide the analysis, research and data used within reasonable expectations, for example provide papers summarising/collating the analysis, spreadsheets underlying the analysis, but not, for example, large numerical databases, or data/information which is dispersed around the organisation.
4. Details of activity assumptions, including: projections of growth for different categories of activity; projections for each year if held; projections for population size and age-adjusted population.

In terms of your queries:

- Please confirm what timescale you are requesting the information in relation to?

FY2013/14 and FY2014/15

- Please confirm what costs you are requesting information for. Are you referring to costs of treatment, costs of equipment, costs of beds or something else?

I am interested in the total costs that the NHS had to spend in a given specialty in the above mentioned FY, if these costs can be disaggregated by individual items (treatment, equipment, beds, etc) it would be even better

- Please confirm what you mean by ‘inpatient bedday’

I mean the total number of inpatient days (excluding day patients) divided by the number of discharges in the above mentioned FY

- Please confirm which specialities you are referring to.

I am referring to the "Treatment Specialties" listed in the excel spreadsheet "Treatment Specialties" in this web site

<http://www.hscic.gov.uk/searchcatalogue?productid=19420&topics=1%2fHospital+care%2fAdmissions+and+attendances&sort=Relevance&size=10&page=1#top>

- Please confirm which NHS Trusts you are requesting the information in relation to.

I am interested in the individual hospitals of the Imperial College Trust, in London

Between 17th November 2015 and 23rd November 2015; SERCO presented

a document stating, the following quote;

" ,,, a medical adviser on behalf of NHS England had reviewed ...

medical records and concluded that there was no record or evidence in the notes of any referral letter from Victoria Surgery that states"

I trust that by providing a small window to my query, this will assist your ability to answer my FOI query with transparency.

This FOI query relates to the timescale; May to October 2014;

Ai) How many Medical Advisers were working for NHS England during the aforementioned period?

ii) In respect of the key principles of The Data Protection Act, please clarify how many of those medical advisers were part time, full time or paid as consultants?

Bi) How many of those advisers formally reported back to SERCO during the aforementioned period?

ii) How might an NHS patient view the data exchanged between NHS England and SERCO?

C) Please point/ direct or put the spotlight on which legislation allows NHS England medical advisers to report back to SERCO about a patient's clinical data and medical referrals without the signed consent of the patient in question?

D) Since May 2014; have any Medical Advisers lodged a formal complaint against the NHS or resigned over the tasks or reports that they have been asked to make for SERCO or SERCO's lawyers?

I have been searching through the available data but can not find a reliable estimate of the number of Lumbar discectomies, decompressions, fusions & disc replacements performed within the NHS per year.

I am writing a paper on the potential savings that could be achieved from Endoscopic Minimal Invasive Spine Surgery and need to extrapolate this to the NHS England or NHS as a whole.

The data seems wholly and often includes facet joint injections or Nerve Root Blocks in the interventional numbers.

FOI-009397 30/12/2015

I requested the following a few weeks ago.

'How many times have people staying at Immigration removal centres been given access to receive treatment for problems with their mental health?'

You responded with the following.

It may help if I explain that NHS England only took over responsibility of Immigration Removal Centres (IRCs) in September 2014 and would not be able to provide any information prior to this date.

At the time NHS England took responsibility for IRCs there was not a uniform data capture system across the IRCs. A system is currently in development and we went live with a limited number of pilot sites for national data collection from July this year.

Responding to the information you have given me, I would like to know how many instances you recorded of people staying at immigration removal centres of people receiving help for mental health treatment from September 2014, including the national data collection sites that were launched since July 2015. If you only have data from July 2015 then this is fine.
