# NHS ENGLAND – BOARD PAPER

## Title:

NHS Performance Report

#### Lead Director:

Karen Wheeler, National Director: Transformation and Corporate Operations Matthew Swindells, National Director: Operations and Information

#### Purpose of Paper:

To provide the Board with a summary of recently published NHS performance.

March 2017 saw the best A&E performance in six months, and it was also significantly better than the same time last year. Ambulance responsiveness also hit its best performance since last summer, and was also better than the same time last year. Waits for elective care got shorter in March, continuing the improvements seen over the past three months, and the median wait for non-emergency care is now only just over six weeks.

#### The Board is invited to:

Note the contents of this report.

#### OFFICIAL

| Indicator   | Latest<br>data<br>period | Standard | Latest<br>Performance | Change in<br>performance<br>from previous<br>data period |
|---|--------------------------|----------|-----------------------|--|
| Patients on Care Programme Approach (CPA) who were<br>followed up within 7 days after discharge from<br>psychiatric inpatient care                          | Q3<br>2016/17            | 95%      | 96.7%                 | $\checkmark$   |
| IAPT access rate  | Jan-17                   | 15%      | 16.7%                 | ↑  |
| IAPT recovery rate  | Jan-17                   | 50%      | 50.1%                 | <b>↑</b>   |
| People referred to the IAPT will be treated within 6 weeks of referral  | Jan-17                   | 75%      | 90.2%                 | 1  |
| People referred to the IAPT will be treated within 18 weeks of referral   | Jan-17                   | 95%      | 98.7%                 | 1  |
| Dementia diagnosis rate   | Mar-17                   | 66.7%    | 67.6%                 | $\uparrow$   |
| People experiencing a first episode of psychosis will be treated within two weeks of referral   | Mar-17                   | 50%      | 73.7%                 | ↑  |
| Maximum two-week wait for first outpatient appointment<br>for patients referred urgently with suspected cancer by a<br>GP                                   | Mar-17                   | 93%      | 94.7%                 | ¥  |
| Maximum two-week wait for first outpatient appointment<br>for patients referred urgently with breast symptoms<br>(where cancer was not initially suspected) | Mar-17                   | 93%      | 91.6%                 | $\checkmark$   |
| Maximum 31-day wait from diagnosis to first definitive treatment for all cancers  | Mar-17                   | 96%      | 98.0%                 | 1  |
| Maximum 31-day wait for subsequent treatment where that treatment is surgery  | Mar-17                   | 94%      | 95.8%                 | -  |
| Maximum 31-day wait for subsequent treatment where that treatment is an anti-cancer drug regimen  | Mar-17                   | 98%      | 99.2%                 | $\checkmark$   |
| Maximum 31-day wait for subsequent treatment where<br>the treatment is a course of radiotherapy   | Mar-17                   | 94%      | 97.3%                 | $\checkmark$   |
| Maximum 62-day wait from referral from an NHS screening service to first definitive treatment for all cancers   | Mar-17                   | 90%      | 90.6%                 | $\checkmark$   |
| Maximum 62-day wait from urgent GP referral to first definitive treatment for cancer  | Mar-17                   | 85%      | 83.0%                 | 1  |
| Maximum 62-day wait for first definitive treatment<br>following a consultant's decision to upgrade the priority<br>of the patient (all cancers)             | Mar-17                   | Not set  | 89.4%                 | ↑  |
| Patients on incomplete non-emergency pathways (yet to start treatment) waiting no more than 18 weeks from referral  | Mar-17                   | 92%      | 90.3%                 | ↑  |
| Number of patients waiting more than 52 weeks from referral to treatment  | Mar-17                   | 0        | 1,529                 | <b>1</b>   |
| Patients waiting less than 6 weeks from referral for a diagnostic test  | Mar-17                   | 99%      | 98.9%                 | 1  |
| Patients admitted, transferred or discharged within 4 hours of their arrival at an A&E department   | Mar-17                   | 95%      | 90.0%                 | 1  |
| Category A calls resulting in an emergency response<br>arriving within 8 minutes (Red 1)  | Mar-17                   | 75%      | 70.7%                 | ↑  |
| Category A calls resulting in an emergency response<br>arriving within 8 minutes (Red 2)  | Mar-17                   | 75%      | 64.3%                 | ↑  |
| Category A calls resulting in an ambulance arriving at the scene within 19 minutes  | Mar-17                   | 95%      | 91.5%                 | ↑  |
| Mixed sex accommodation breaches  | Mar-17                   | 0        | 776                   | $\checkmark$   |
| Operations cancelled for non-clinical reasons on or after the day of admission not rescheduled within 28 days   | Q4<br>2016/17            | 0%       | 8.0%                  | ↑  |
